and Life, 1991-2018 brings together texts by Canadian artist Ken Lum. They include a letter to an editor, diary entries, articles, catalogue essays, curatorial statements, and more. Along the way, the reader learns about late modern, postmodern, and contemporary art practices, as well as debates around issues like race, class, and monumentality. Penetrating, insightful, and often moving, Lum's writings are essential for understanding his practice, which has been prescient of developments within contemporary art, as well as the international art world over the last three decades."--

 Inorganic biomaterials include materials for e.g. dental restorations, biocompatible materials for orthopedic appliances and bioactive materials. However, inorganic biomaterials are also developed for use in tissue regeneration, e.g. wound healing. These products either consist of crystalline phases, such as Al₂O₃ or ZrO₂, which makes them suitable for use in hip bone replacement or they are composed of tricalcium phosphate and used as resorbable biomaterials. Or, they contain glassy phases, such as BIOGLASS®, and are employed as bioactive biomaterials to bond to living bone. Inorganic

biomaterials are also used to develop inorganic - organic composites which are suitable for use as bioactive products or to produce dental filling materials. In general, the development of composites is state of the art. However, it is also a future technology. Biomaterials for dental restorations consist of glassy or crystalline phases. Glass-ceramics represent a special group of inorganic biomaterials for dental restorations. Glass-ceramics are composed of at least one inorganic glassy phase and at least one crystalline phase. These products demonstrate a combination of properties, which include excellent aesthetics and the ability to mimic the optical properties of natural teeth, as well as high strength and toughness. They can be processed using special

processing procedures, e.g. machining, moulding and sintering, to fabricate high quality products. Sintered oxide ceramics, such as Al_2O_3 or ZrO_2 , are also used for the fabrication of dental restorations. These products can be veneered with other biomaterials, or they can be polished to achieve the best possible surface quality. The manuscripts dealing with inorganic biomaterials should focus on the development of the products, especially on their chemical nature, the phase formation processes and all the details related to their processing. Very important are the mechanisms of phase formation. The reader of the manuscript should understand all of these reactions in detail. As far as application is concerned, it is important to describe

the main properties of the developed products based on the valid standards, e.g. the ISO standards. The papers published should show that the products comply with these standards. It is very important to understand the relationship between biomass and biomaterials. This will help young scientists to follow the development of biomaterials with new, unexpected properties. He manuscripts published in "Frontiers" should also focus on the application of the biomaterials. Every manuscript should show the most important application of the material presented. There are different journals that deal with specific product categories, eg "Dental Materials". However, "Frontiers" should allow young scientists to publish their research results using all kinds of inorganic

biomaterials. On the other hand, fundamental discussion and analysis of the findings should be encouraged and conclusions about possible applications in the field of medicine and dentistry should be drawn.

bestselling author Jay Crownover returns with a heart-stopping new series...

Welcome to the Point. There's a difference between a bad boy and a boy who's bad . . . meet Shane Baxter. Sexy, dark, and dangerous, Bax isn't just from the wrong side of the tracks, he is the

wrong side of the tracks. A criminal, a thug, and a brawler, he's the master of bad choices, until one such choice landed him in prison for five years. Now Bax is out and looking for answers, and he doesn't care what he has to do or who he has to hurt to get them. But there's a new player in the game, and she's much too innocent, much too soft...and standing directly in his way. Dovie Pryce knows all about living a hard life and the tough choices that come with it. She's always tried to be good, tried to help others, and tried not to let the darkness pull her down. But the streets are fighting back, things have gone from bad to worse, and the only person who can help her is the scariest, sexiest, most complicated ex-con The Point has ever produced. Bax terrifies

her, awakening feelings she never thought she'd have for a guy like him. But it doesn't take Dovie long to realize . . . some boys are just better when they're bad.

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY SLATE • Includes an

exclusive conversation between Lev Grossman and Lauren Owen For fans of Anne Rice, *The Historian*, and *The Night Circus*, an astonishing debut, a novel of epic scope and suspense that conjures up all the magic and menace of Victorian London 1892: James Norbury, a shy would-be poet newly down from Oxford, finds lodging with a charming young aristocrat. Through this new friendship,

he is introduced to the drawing-rooms of high society and finds love in an unexpected quarter. Then, suddenly, he vanishes without a trace. Alarmed, his sister, Charlotte, sets out from their crumbling country estate determined to find him. In the sinister, labyrinthine London that greets her, she uncovers a hidden, supernatural city populated by unforgettable characters: a female rope walker turned vigilante, a street urchin with a deadly secret, and the chilling “Doctor Knife.” But the answer to her brother’s disappearance ultimately lies within the doors of the exclusive, secretive Aegolius Club, whose predatory members include the most ambitious, and most bloodthirsty, men in England. In her first novel, Lauren Owen has created a fantastical world that is

both beguiling and terrifying. The Quick will establish her as one of fiction’s most dazzling talents. Look for special features inside. Join the Random House Reader’s Circle for author chats and more. “A suspenseful, gloriously atmospheric first novel, and a feast of gothic storytelling that is impossible to resist.”—Kate Atkinson “A cracking good read . . . Owen takes the gothic conventions of the vampire novel in a refreshing new direction.”—Deborah Harkness, author of *A Discovery of Witches* and *The Book of Life* “A good old-fashioned vampire novel . . . What fun.”—The New York Times Book Review (Editor’s Choice) “The Quick is that rare book that reviewers and readers live for: both plot- and character-driven, a stay-up-all-night reading romp. . . . This is

elegant, witty, force-of-nature writing.”—The Dallas Morning News “The book’s energy, its wide reach and rich detail make it a confident example of the ‘unputdownable’ novel.”—The Economist “A seamless blend of Victorian London and rich imagination.”—Tana French, author of *In the Woods* “A thrilling tale . . . This book will give you chills even on a hot day.”—Minneapolis Star Tribune “Stylishly sinister . . . will have you sleeping with the lights on.”—O: The Oprah Magazine “A sly and glittering addition to the literature of the macabre.”—Hilary Mantel, author of *Wolf Hall* “A big, sly bucketful of the most tremendous fun . . . [Owen] weaves what’s here with what’s beyond as easily as J. K. Rowling does.”—Slate “[An author of] prodigious gifts . . . Owen

captures Dickens’s London with glee and produces a number of characters Dickens would be happy to call his own.”—Pittsburgh Post-Gazette

Over the last few decades, the study of microbial biofilms has been gaining interest among the scientific community. These microbial communities comprise cells adhered to surfaces that are surrounded by a self-produced exopolymeric matrix that protects biofilm cells against different external stresses. Biofilms can have a negative impact on different sectors within society, namely in agriculture, food industries, and veterinary and human health. As a consequence of their metabolic state and matrix protection,

biofilm cells are very difficult to tackle with antibiotics or chemical disinfectants. Due to this problem, recent advances in the development of antibiotic alternatives or complementary strategies to prevent or control biofilms have been reported. This book includes different strategies to prevent biofilm formation or to control biofilm development and includes full research articles, reviews, a communication, and a perspective.

Inorganic Biomaterials Harper Collins Anno Domini 1112. Zoya è convinta che non troverà mai l'amore a causa delle cicatrici che le attraversano il viso come graffi di una fiera. La sua vita è cambiata undici anni prima, quando era ancora una ragazzina innamorata, ma ora è una donna e sa cosa desidera: ricominciare a

vivere in un luogo lontano dal passato. Per questo parte per la rocca di Rostock, dove spera di liberarsi dei pensieri che le avvolgono la mente e il cuore... Il castello sul fiordo di Rostock è stato assegnato a uno spietato guerriero, arrogante e violento, che tutti chiamano Der Bär, l'Orso, ma il cui vero nome è Andreas. Proprio in lui Zoya riconosce il suo amico di infanzia e primo segreto amore, tornato dall'Oriente dopo aver affrontato e superato terribili prove. Lei è stata la sola donna che abbia mai toccato lo spirito di Andreas prima che si trasformasse in roccia. L'amore tra i due riemerge con forza, ma a separarli c'è un abisso di segreti che solo il sentimento più potente può colmare. L'Impero vacilla, la corona è contesa, Enrico V e il duca Lotario si affrontano in sanguinosi

conflitti... Amore o guerra? La scelta spetta a un cuore di pietra.

One of the revelations with photography is that monochrome images often enable us to see the world and people in new, and often deeper, ways. Colour is such a dominant part of our vision that we often overlook more subtle variations in tones and textures. This book is a companion volume to the colour book "Rewilding the Human Spirit", but instead of repeating the contemporary narrative contained in that book, this work includes a range of directly relevant quotations which show

and help to explain humans' deep and intrinsic connection to our natural world. The importance of landscape, nature and our natural world is shown both through these quotations and through just over 130 monochrome fine art nude images, involving 15 different women aged 24 to 43. The works have been shot in a range of natural locations around Europe.

How to Be an Authentic American

This book deals with the phenomenon of third language (L3) acquisition. As a research field, L3 acquisition is established as a branch of multilingualism that is concerned with how multilinguals learn additional languages and the role that their multilingual background plays in the

process of language learning. The volume points out some current directions in this particular research area with a number of studies that reveal the complexity of multilingual language learning and its typical variation and dynamics. The eight studies gathered in the book represent a wide range of theoretical positions and offer empirical evidence from learners belonging to different age groups, and with varying levels of proficiency in the target language, as well as in other non-native languages belonging to the learner's repertoire. Diverse linguistic phenomena and language combinations are viewed from a perspective where all previously acquired languages have a potential role to play in the process of learning a new language. In the six empirical studies,

contexts of language learning in school or at university level constitute the main outlet for data collection. These studies involve several language backgrounds and language combinations and focus on various linguistic features. The specific target languages in the empirical studies are English, French and Italian. The volume also includes two theoretical chapters. The first one conceptualizes and describes the different types of multilingual language learning investigated in the volume: i) third or additional language learning by learners who are bilinguals from an early age, and ii) third or additional language learning by people who have previous experience of one or more non-native languages learned after the critical period. In particular, issues related to

the roles played by age and proficiency in multilingual acquisition are discussed. The other theoretical chapter conceptualizes the grammatical category of aspect, reviewing previous studies on second and third language acquisition of aspect. Different models for L3 learning and their relevance and implications for representations of aspect and for potential differences in the processing of second and third language acquisition are also examined in this chapter. As a whole, the book presents current research into third or additional language learning by young learners or adults, considering some of the most important factors for the complex process of multilingual language learning: the age of onset of the additional language and that of

previously acquired languages, social and affective factors, instruction, language proficiency and literacy, the typology of the background languages and the role they play in shaping syntax, lexicon, and other components of a L3. The idea for this book emanates from the symposium Multilingualism, language proficiency and age, organized by Camilla Bardel and Laura Sánchez at Stockholm University, Department of Language Education, in December 2016. Third language acquisition Andreas e Zoya. Il fiore di pietra This unique guide provides a systematic overview of the idea of architectural space. Bryan Lawson provides an ideal introduction to the topic, breaking down the complex and abstract terms used by many design theoreticians when writing

about architectural space. Instead, our everyday knowledge is reintroduced to the language of design. Design values of 'space' are challenged and informed to stimulate a new theoretical and practical approach to design. This book views architectural and urban spaces as psychological, social and partly cultural phenomena. They accommodate, separate, structure, facilitate, heighten and even celebrate human spatial behaviour.

"Science of Synthesis: Water in Organic Synthesis" provides a comprehensive overview of a rapidly progressing field and a critical review of aqueous reactions by 47 experts. It covers almost all types of organic reactions, including

special techniques with water and industrial applications, and has an emphasis on environmental aspects. This resource helps the organic chemist in gaining a thorough appreciation of the latest and most reliable available methods for using water in organic synthesis. It illustrates how water can often be a viable and green solvent in the laboratory and provides a detailed introduction to the subject: background information, evaluated methods, practical applications, industrial applications, special techniques, and an overview of the latest trends. // The content of this e-book was originally published in February 2012.

This book examines the undergraduate teaching experiences and collegial

relationships of university faculty who hold appointments in social science, humanities, or natural science and engineering, and who have received undergraduate teaching or service-to-diversity nominations and awards. Documenting and interpreting faculty members' social identities and pedagogical practices, *Faculty Identities and the Challenge of Diversity* explores how professors address the diverse racial, ethnic, gender, and sexual identities of their students. By carefully considering how this unique group of faculty makes sense of their instruction and classrooms, this book provides practical advice that will prove beneficial to both experienced and new teachers looking to improve their practice in a changing educational landscape.

Over the past few decades, India has experienced a sudden and spectacular urban transformation. Gleaming business complexes encroach on fields and villages. Giant condominium communities offer gated security, indoor gyms, and pristine pools. Spacious, air-conditioned malls have sprung up alongside open-air markets. In *Landscapes of Accumulation*, Llerena

Guiu Searle examines India's booming developments and offers a nuanced ethnographic treatment of late capitalism. India's land, she shows, is rapidly transforming from a site of agricultural and industrial production to an international financial resource. Drawing on intensive fieldwork with investors, developers, real estate agents, and others, Searle documents the new private sector partnerships and practices that are transforming India's built environment, as well as widely shared stories of growth and development that themselves create self-fulfilling prophecies of success. As a result, India's cities are becoming ever more inaccessible to the country's poor. *Landscapes of Accumulation* will be a welcome contribution to the

international study of neoliberalism, finance, and urban development and will be of particular interest to those studying rapid—and perhaps unsustainable—development across the Global South.

NEW YORK TIMES BESTSELLER • A young Jamie Fraser learns what it really means to become a man in this *Outlander* prequel novella. Featuring all the trademark suspense, adventure, and history of Diana Gabaldon's #1 bestselling novels and the Starz original series, *Virgins* is now available for the first time as a standalone ebook. Mourning the death of his father and gravely injured at the hands of the English, Jamie Fraser finds himself

running with a band of mercenaries in the French countryside, where he reconnects with his old friend Ian Murray. Both are nursing wounds; both have good reason to stay out of Scotland; and both are still virgins, despite several opportunities to remedy that deplorable situation with ladies of easy virtue. But Jamie's love life becomes infinitely more complicated—and dangerous—when fate brings the young men into the service of Dr. Hasdi, a Jewish gentleman who hires them to escort two priceless treasures to Paris. One is an old Torah; the other is the doctor's beautiful granddaughter, Rebekah, destined for an arranged marriage. Both Jamie and Ian are instantly drawn to the bride-to-be—but they might be more cautious if they had

any idea who they're truly dealing with. Praise for Diana Gabaldon's *Outlander* series "Marvelous and fantastic adventures, romance, sex . . . perfect escape reading."—San Francisco Chronicle, on *Outlander* "History comes deliciously alive on the page."—New York Daily News, on *Outlander* "Gabaldon is a born storyteller. . . . The pages practically turn themselves."—The Arizona Republic, on *Dragonfly in Amber* "Triumphant . . . Her use of historical detail and a truly adult love story confirm Gabaldon as a superior writer."—Publishers Weekly, on *Voyager* "Unforgettable characters . . . richly embroidered with historical detail."—The Cincinnati Post, on *Drums of Autumn* "A grand adventure written on a canvas that probes the heart, weighs the soul
