W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. One of the most neglected and obscure books by W. E. B. Du Bois, *In Battle for Peace* frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial—he was later acquitted—and faced political persecution for over a decade. Part autobiography and part political statement, *In Battle for Peace* remains today a powerful analysis of race in America. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by Manning Marable, this edition is essential for anyone interested in African American history.

It's hard to think of a single aspect of American culture, past or present, in which religion has not played a major role. The roles religion plays, moreover, become more bewilderingly complex and diverse every day. For all those who want—whether out of curiosity, necessity, or civic duty—a vivid picture and fuller understanding of the current reality of religion in America, this *Very Short Introduction* is the go-to book they need. Timothy Beal describes many aspects of religion in contemporary America that

are typically ignored in other books on the subject, including religion in popular culture and counter-cultural groups; the growing phenomenon of "hybrid" religious identities, both individual and collective; the expanding numbers of new religious movements, or NRMs, in America; and interesting examples of "outsider religion," such as Paradise Gardens in Georgia and the People Love People House of God in Ohio. He also offers an engaging overview of the history of religion in America, from Native American traditions to the present day. Beal sees three major forces shaping the present and future of religion in America: first, unprecedented religious diversity, which will continue to grow in the decades to come; second, the information revolution and the emergence of a new network society; and third, the rise of consumer culture. Taken together, these forces offer the potential to create a new American pluralism that would enrich society in unimaginable ways, but they also threaten the great ideal of *e pluribus unum*. With visual aids that help readers navigate America's diverse religious landscape, this informative, thoughtful, and provocative book is a must-read in the emerging public conversation concerning religion in America. About the Series: Combining authority with wit, accessibility, and style, *Very Short Introductions* offer an introduction to some of life's most interesting topics. Written by experts for the newcomer, they demonstrate the finest contemporary thinking about the central problems and issues in hundreds of key topics, from philosophy to Freud, quantum theory to Islam.

A single volume that gathers together three of the most remarkable novels from Jean Echenoz, the "most distinctive French voice of his generation" (*The Washington Post*), *Three* by Echenoz demonstrates the award-winning author's extraordinary versatility and elegant yet playful style at its finest. "A parodic thriller sparkling with wit" (*L'Humanité*), *Big Blondes* probes our universal obsession with fame as a television documentary producer tries to track down a renowned singer who has mysteriously disappeared. A darkly comedic, noir-style tour de force, it finally answers the age-old question: do blondes have more fun? "Fluid, never forced...like a garment that fits beautifully even inside-out" (*Elle*), *Piano* brings Dante's *Inferno* to

contemporary Paris, following Max Delmarc, a concert pianist suffering from paralyzing stage fright and alcoholism, as he meets his untimely death and descends through purgatory—part luxury hotel, part minimum-security prison—into a modern vision of hell. Running is "a small wonder of writing and humanity" (*L'Express*)—a portrait of the legendary Czech athlete Emil Zátopek, who became a national hero, winning three gold medals at the 1952 Helsinki Olympics even as he was compelled to face the unyielding realities of life under an authoritarian regime.

Pocket Genius: Cats Penguin

From the New York Times bestselling author of *Sepulchre* and *Labyrinth*-a compelling story of love, ghosts and remembrance. World War I robbed England and France of an entire generation of friends, lovers and futures. In Freddie Watson's case, the battlefields took his beloved brother and, at times, his peace of mind. In the winter of 1928, still seeking some kind of resolution, Freddie is travelling through the beautiful but forbidding French Pyrenees. During a snowstorm, his car spins off the mountain road. Freezing and dazed, he stumbles through the woods, emerging in a tiny village, where he finds an inn to wait out the blizzard. There he meets Fabrisa, a lovely young woman also mourning a lost generation. Over the course of one night, Fabrisa and Freddie share their stories. By the time dawn breaks, Freddie will have unearthed a tragic mystery that goes back through the centuries, and discovered his own role in the life of this old remote town. By turns thrilling, poignant, and haunting, this is a story of two lives touched by war and transformed by courage.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fast-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural

perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Roland Huntford's brilliant history begins 20,000 years ago in the last ice age on the icy tundra of an unformed earth. Man is a travelling animal, and on these icy slopes skiing began as a means of survival. That it has developed into the leisure and sporting pursuit of choice by so much of the globe bears testament to its elemental appeal. In polar exploration, it has changed the course of history. Elsewhere, in war and peace, it has done so too. The origins of skiing are bound up in with the emergence of modern man and the world we live in today.
