A Navy Admiral's Bronze Rules uses case studies to explore the inherent risks of leadership and the tools available to those who nevertheless wish to shoulder those

responsibilities. Real world examples are used and inevitably expose hitherto unrevealed history. The latter includes a secret of the Yom Kippur War, the background of the 1986 bloodless revolution in the Philippines, how Admiral Bud Zumwalt was such a unique Chief of Naval Operations, why our National War Plan suddenly had to be revised during the Reagan years and what spurred President Clinton's anti-nuclear proliferation success.

Rear Adm. Oliver sketches the problems a leader will routinely (and not-so routinely) face. He invites the reader to consider the attributes which will help best prepare them for future challenges. These thirty case studies demonstrate that few real leadership problems will yield to a "one-hammer" solution. No matter how good a practitioner may become with one leadership style, one knock-them-dead ability seldom serves to get a leader all

the way through their problem or conflict. Adm. Oliver thus provides a range of tools for different personalities and situations. The potential leader thus has a range of solutions to fit the problem as well as an individual's personal comfort zone.

"The Leader's Bookshelf" identifies the "Top 50" books that can help anyone become a better leader. The works selected were based on hundreds of interviews with the most senior active and retired four-star U.S. military leaders who identified books from which they gained

the special insights which helped propel them to success in the most demanding leadership challenges. Each of those fifty works -- novels, memoirs, biographies, autobiographies, leadership works -- are concisely summarized and the key leadership lessons extracted and presented. Admiral Jim Stavridis and his co-author, R. Manning Ancell, have been surveying very senior military leaders for the past several years regarding their reading habits and favorite books. They have spoken to over 200 four-star officers, including those both currently on active duty and retired. Each of those admirals and generals was asked for a list of books that strongly influenced their leadership skills. Stavridis and Mancell then collated the data and analyzed which books were mentioned most frequently and which ones were most compelling in the leadership lessons offered the reader. The survey, while not scientific, was quite comprehensive. From it, Stavridis and Ancell built a powerful set of recommended readings. Whether individuals work their way through the entire top 50 list and read each book cover to cover, or read the summaries provided

in "The Leader's Bookshelf" to determine which appeal to them most -- this book will provide a roadmap to better leadership. "The Leader's Bookshelf" highlights the value of reading for leaders in a philosophical and practical sense, provides advice on how to build an extensive library, lists other books worth reading to improve leadership skills, and analyzes how leaders use what they read to achieve their goals. "The Leader's Bookshelf" is a book for anyone who wants to improve their ability to lead -- whether in their family life, their professional endeavors, or within our society and civic organizations. America's First Sea Warrior iUniverse Following the success of his #1 New York Times bestseller *Make Your Bed*, which has sold over one million copies, Admiral William H. McRaven is back with amazing stories of bravery and heroism during his career as a Navy SEAL and commander of America's Special Operations Forces. Admiral William H. McRaven is a part of American military history, having been involved in some of the most famous missions in recent memory, including the capture of Saddam Hussein, the rescue of Captain Richard Phillips, and the raid to kill

Osama bin Laden. Sea Stories begins in 1963 at a French Officers' Club in France, where Allied officers and their wives gathered to have drinks and tell stories about their adventures during World War II—the place where a young Bill McRaven learned the value of a good story. Sea Stories is an unforgettable look back on one man's incredible life, from childhood days sneaking into high-security military sites to a day job of hunting terrorists and rescuing hostages. Action-packed, humorous, and full of valuable life lessons like those exemplified in McRaven's bestselling *Make Your Bed*, Sea Stories is a remarkable memoir from one of America's most accomplished leaders.

Dive! World War II Stories of Sailors & Submarines in the Pacific tells the incredible story of America's little known "war within a war" -- US submarine warfare during World War II. Following the attack on Pearl Harbor, the US entered World War II in December 1941 with only 44 Naval submarines -- many of them dating from the 1920s. With the Pacific

battleship fleet decimated after Pearl Harbor, it was up to the feisty and heroic sailors aboard the US submarines to stop the Japanese invasion across the Pacific. Including breakouts highlighting submarine life and unsung African-American and female war heroes, award-winning author Deborah Hopkinson uses first-person accounts, archival materials, official Naval documents, and photographs to bring the voices and exploits of these brave service members to life.

The French Admiral A Sailor's Story Autobiography of a former vice admiral of Indian Navy. The Sailor's Bookshelf Fifty Books to Know the Sea This fresh look at America's first sea warrior avoids the hero worship of past biographies and provides a more complete understanding of his accomplishments. Writing from the perspective of a naval officer with more than thirty years of experience and a seaman with a lifetime of sailing know-how, Callo examines Jones' extraordinary career by going beyond his legendary naval achievements to establish him as a key player in the American Revolution. Analyzing his relationships with important civilian leaders of the

Revolution, such as Benjamin Franklin, the author demonstrates how Jones' handling of those often difficult dealings contributed to the nation's concept of civilian control of the military. In this acclaimed biography, Jones is shown to be not only a highly-skilled and relentless commander, but the first serving American naval officer to emphasize the role the Navy could play in the rise of the United States as a global power.

A Life of Richard Badiley One World

From one of the most distinguished admirals of our time and a former Supreme Allied Commander of NATO, a meditation on leadership and character refracted through the lives of ten of the most illustrious naval commanders in history. In *Sailing True North*, Admiral Stavridis offers lessons of leadership and character from the lives and careers of history's most significant naval commanders. He also brings a lifetime of reflection to bear on the subjects of his study--naval history, the vocation of the admiral, and global geopolitics. Above all, this is a book that will help you navigate your own life's voyage: the voyage of leadership of course, but more important,

the voyage of character. Sailing True North helps us find the right course to chart. Simply as epic lives, the tales of these ten admirals offer up a collection of the greatest imaginable sea stories. Moreover, spanning 2,500 years from ancient Greece to the twenty-first century, Sailing True North is a book that offers a history of the world through the prism of our greatest naval leaders. None of the admirals in this volume were perfect, and some were deeply flawed. But from Themistocles, Drake, and Nelson to Nimitz, Rickover, and Hopper, important themes emerge, not least that serving your reputation is a poor substitute for serving your character; and that taking time to read and reflect is not a luxury, it's a necessity. By putting us on personal terms with historic leaders in the maritime sphere he knows so well, James Stavridis gives us a compass that can help us navigate the story of our own lives, wherever that voyage takes us.

Alan Lewrie is a scandalous young rake whose amorous adventures ashore lead to his being shipped off to the Navy. Lewrie finds that he is a born sailor, although life at sea is a stark contrast to the London social whirl to which he had become accustomed. As his career advances, he finds the life of a naval officer suits him. *Managing Risk and Leadership* Bloomsbury Publishing

When Argentinian forces invaded the Falklands in April 1982, the British government responded by despatching a task force to the Atlantic to wrest back control of the islands. The resulting war saw modern weapon systems tested in combat for the first time, to tragic effect. In the aftermath, official documents were released, but many were heavily censored, and others withheld altogether, so that a full understanding of those events could not be gained. Drawing from recently declassified and previously unpublished reports from the official inquiry, Dr Paul Brown details the true story behind the dramatic events that led to the loss of six British ships – HMS Antelope, Ardent, Coventry and Sheffield, RFA Sir Galahad and SS Atlantic Conveyor – as well as the

controversial sinking of the Argentinian cruiser ARA General Belgrano by HMS Conqueror.

Gear Up, Mishaps down Rowman & Littlefield

Born in the hellish aftermath of Pearl Harbor, the Seabees began as barely armed civilians with no military training. They had an average age of 35. GIs would joke, "Never hit a Seabee, for his son might be a Marine." America's bulldozing, jungle-hacking, Jap-cracking Construction Battalion or the Seabees (C.B.'s) soon proved themselves miracle-construction-workers in seemingly impassable combat zones. Before World War 2, Marines were the ones to get their first, but the need for roads in the muddy battlefields of the Pacific meant that claim would pass to the Construction Battalion. Their early motto was "Can Do!"

 Roger Keyes was the archetype of 19th to 20th century Royal Navy officers. A superb seaman, inspiring leader and fearless fighter he immediately caught the eye of senior figures in the naval establishment as well as the up and coming politician, Winston Churchill. The relationship between these two brave men survived disappointment, disagreement and eventually disillusion. Unlike some of his contemporaries, Keyes was unable to make the transition from sailor to politician and was inclined to embarrass his friends and allies by his intemperate language and total lack of political acumen. Always eager to lead from the front and hurl himself at the enemy his mind set tended to be that of a junior officer trying to prove himself, not that of a senior Admiral. Trained in some of the last of Britain's sailing warships, Keyes served in submarines in the North Sea, destroyers in China and as a senior staff officer in the disastrous Gallipoli campaign. As commander of the Dover Patrol he planned and led the highly controversial Zeebrugge Raid and

successfully combated U-boats passing along the English Channel. In World War II he begged to be given a combat command but, in spite of their close personal friendship, Churchill realized that he was too old to be suitable for a front line role and his undisguised contempt for many senior Naval and Airforce officers made him extremely unpopular in official circles. To his credit, Churchill did not let his personal friendship and admiration of Keyes blind him to his temperamental and intellectual limitations. Both men were big enough not to let professional conflict destroy mutual personal admiration and friendship.

hairpins and prayers, steams toward a deadly conflict in the South Pacific - the Battle of the Java Sea. As the apparently doomed vessel prepares to defend the U.S. from the crack Imperial Fleet, young Lieutenant Ross Fraser fights his own battles - with his suicidal captain, with a virtually defenseless and ancient ship, and with a complement of salty sailors drawn from the old China station, men as reckless in bars and brothels as they are facing the enemy. New York Times Book Review • Time • NPR • The Washington Post • Shelf Awareness • Library Journal • Publishers Weekly • Kirkus Reviews Antiracism is a transformative concept that reorients and reenergizes the conversation about racism—and, even more fundamentally, points us toward liberating new ways of thinking about ourselves and each other. At its core, racism is a powerful system that creates false hierarchies of human value; its warped logic extends beyond race, from the way we regard people of different ethnicities or skin colors to the way we treat people of different sexes, gender identities, and body types. Racism intersects with class and culture and geography and even changes the way we see and value ourselves. In *How to Be an Antiracist*, Kendi takes readers through a widening circle of antiracist ideas—from the most basic concepts to visionary possibilities—that will help readers see all forms of racism clearly, understand their poisonous consequences, and work to oppose them in our systems and in ourselves. Kendi weaves an electrifying combination of ethics, history, law, and science with his own personal story of

awakening to antiracism. This is an essential work for anyone who wants to go beyond the awareness of racism to the next step: contributing to the formation of a just and equitable society. Praise for *How to Be an Antiracist* “Ibram X. Kendi’s new book, *How to Be an Antiracist*, couldn’t come at a better time. . . . Kendi has gifted us with a book that is not only an essential instruction manual but also a memoir of the author’s own path from anti-black racism to anti-white racism and, finally, to antiracism. . . . *How to Be an Antiracist* gives us a clear and compelling way to approach, as Kendi puts it in his introduction, ‘the basic struggle we’re all in, the struggle to be fully human and to see that others are fully human.’ ”—NPR “Kendi dissects why in a society where so few people consider themselves to be racist the divisions and inequalities of racism remain so prevalent. *How to Be an Antiracist* punctures the myths of a post-racial America, examining what racism really is—and what we should do about it.”—Time

Today, war is more complicated than it

has ever been. When considering military strategy, a commander must be aware of several theaters of war. There's ground strength, air power, naval combat and even cyber warfare. In the late 19th century, however, the true military might of a nation rested primarily on the strength of its navy. In 1890, United States Navy Captain Alfred Thayer Mahan published a book titled "The Influence of Sea Power Upon History." The monumental text addressed the importance of both military and commercial fleets in the success of a nation in war and peacetime. Mahan begins with a discussion of the elements he considers to be the key to a nation's success on the seas. He theorizes that a ground force could not sustain the pressure of a naval blockade. Mahan then applies his principles to wars of the past. He analyzes the use of a navy in various engagements and considers the resulting influence on the outcome of the wars. The book was readily accepted by commanders and tacticians all over the world and his principles and theories were utilized throughout the 20th century. His arguments, along with technological

advances, were influential in the strengthening of the United States Navy. Presently, Mahan's work is considered the most important work on naval strategy in history.
