Beginning with the
introduction of abortion
law in the nineteenth
century, this reader
includes important
documents from nearly
two hundred years of
debate over abortion.

These legal briefs, oral
arguments, court
opinions, newspaper
reports, opinion pieces,
and contemporary
essays are introduced
with headnotes that
place them in historical
context. Chapters
cover the birth control
movement, changes in
abortion law in the
1960s, Roe v. Wade,
the Hyde Amendment
and the Freedom of
Access to Clinic
Entrances Act, state
and federal regulation
of abortion practices,
and the freedom of
speech cases
surrounding anti-
abortion clinic protests.
The first section of
each chapter sets the
stage and explains the
choice of documents.

This rich, balanced collection is an indispensable reference tool for the study of one of the most passionate debates in American history. It brings together the writings of doctors, lawyers, scientists, philosophers, elected officials, judges, and scholars as few other legal readers do, and it is essential reading for those engaged in the ongoing debate about abortion law in the United States.

Those Who from Afar Look Like Flies is an anthology of poems and essays that aims to provide an organic profile of the evolution of Italian poetry after World War II. Beginning

with the birth of *Officina* and *Il Verri*, and culminating with the crisis of the mid-seventies, this tome features works by such poets as Pasolini, Pagliarani, Rosselli, Sanguineti and Zanzotto, as well as such forerunners as Villa and Cacciatore. Each section of this anthology, organized chronologically, is preceded by an introductory note and documents every stylistic or substantial change in the poetics of a group or individual. For each poet, critic, and translator a short biography and bibliography is also provided.

Since 1971, the International Congress for Neo-Latin Studies has been organised

every three years in various cities in Europe and North America. In August 2009, Uppsala in Sweden was the venue of the fourteenth Neo-Latin conference, held by the International Association for Neo-Latin Studies. The proceedings of the Uppsala conference have been collected in this volume under the motto *Litteras et artes nobis traditas excolere Reception and Innovation*. Ninety-nine individual and five plenary papers spanning the period from the Renaissance to the present offer a variety of themes covering a range of genres such as history, literature, philology, art history, and religion. The contributions will be of relevance not only for scholarly

readers, but also for an interested non-professional audience.

Giuseppe Tartini è un giovane violinista che come tanti, per realizzare i propri sogni, è posto davanti

al dilemma se seguire la via più giusta per raggiungerli o affidarsi a percorsi più rapidi, ma oscuri. All'inizio del XVIII secolo egli si impossessa, con l'inganno, di alcuni spartiti musicali, dando così inizio ad una vita di grandi successi, ma travagliata.

L'intelligenza e l'intraprendenza gli consentiranno di progredire negli studi della più varia natura, tra cui la Magia e la Teurgia, e quindi di scoprire il segreto per non morire. Molti anni dopo, la vita del conte decaduto, André D'Aguilles, attento studioso di antropologia del Sud-est europeo, viene sconvolta dalle Guerre Napoleoniche. Audace ufficiale di cavalleria verrà involontariamente

risucchiato nella terribile Crisi di Vampirismo che sconvolgeva l'area carpato-balcanico-danubiana. Fra Moravia, Regno d'Ungheria e Balkan selvaggio, fra indovinelli, saggi ebrei sefarditi, duelli, dolore, morte, sangue e folklore si sviluppa la caccia al misterioso Signore dei Vampiri. Tartini, Paganini e André simboleggiano il Male e il Bene, e le scelte che fin da giovani si è chiamati a fare.

OpereDiscorsi sopra le deche di Tito LivioMastering Italian 2Italian Life and Language "This is must reading for historians of science and a delight for the interested public. From his access

to many primary sources in the Vatican Library and from his broad knowledge of the history of the 17th century, Finocchiaro acquaints readers in an interesting manner with the historical facts of Galileo's trial, its aftermath, and its repercussions. Unlike many other works which present predetermined and, at times, prejudiced judgments, this work provides exhaustive evidence to allow readers to develop their own informed opinion on the subject."—George V. Coyne, Director, Vatican Astronomical Observatory "The tragic condemnation of Galileo by the Roman Catholic Church in 1633 has become the single most potent symbol of authoritarian

opposition to new ideas. Pioneering in its scope, Finocchiaro's book provides a fascinating account of how the trial and its cultural significance have been freshly reconstructed by scholars and polemicists down the ages. With a philosopher's eye for fine distinctions, the author has written an exciting commentary on the successive appearance of new primary sources and their exploitation for apologetic and secular purposes."—John Hedley Brooke, author of *Science and Religion: Some Historical Perspectives* "If good history begins with good facts, then *Retrying Galileo* should be the starting point for all future discussions of the post-

trial phase of the Galileo affair. Maurice Finocchiaro's myth-busting documentary history is not only a repository of little-known sources but a pleasure to read as well.”—Ronald L. Numbers, co-editor of *When Christianity and Science Meet* “Retrying Galileo tells the less well-known half of the Galileo affair: its long and complex history after 1633. Finocchiaro has performed an invaluable service in writing a book that explores how the trial and condemnation of Galileo has been received, debated, and reinterpreted for over three and a half centuries. We are not yet done with this contentious story.”—Paula E. Findlen, Ubaldo Pierotti Professor of Italian

 Thirty-four years have elapsed since the publication of the late Professor P. Maheshwari's text, *An Introduction to the Embryology of Angiosperms*, a work which for many years served as an invaluable guide for students and a rich source book for research workers. Various texts dealing with sections of the broad spectrum of topics encompassed by Maheshwari in his

book have appeared in the interim, but a compendious modern work dealing with the whole field has been lacking. This present volume splendidly meets the need, and it is altogether fitting that Professor B. M. Iohri, long an associate and close colleague of Professor Maheshwari and himself a prolific contributor to the subject, should have undertaken the task of editing it. When Maheshwari wrote, it was still feasible for one author to handle the subject, but today even someone with his fine breadth of vision and depth of understanding could not, alone, do it justice. So the effort has to be a collaborative one; and Professor Iohri's achievement has been to bring together a

team of authoritative collaborators, assign them their responsibilities, and put them to work to produce a text as integrated in its treatment as the diversity of the subject would allow. The product vividly illustrates the advances that have been made in the study of angiosperm reproductive systems in the last 30 years, and the book is surely destined to become the new standard for student and researcher alike.
