The volume presents
the research
experience of young
researchers and PhD
candidates, dealing
with the Italian
scientific area 08-C1
(Design and

Technology of
Architecture), with a
discussion about
scientific issues and
methodologies applied.
The aim is to express
the methodological and
investigation features
of the issues faced by
the researchers, along
with the effectiveness
of their researches
design, giving the
reader an immediate
overview of the 08-C1
doctoral experience.
Beside young
researchers
statements as

witnesses of this research path, the volume collects professors critical contribution, to enrich the comprehensive picture of the progression and methodologies of the doctoral researches presented.

Research Board
Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem

posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).

Investigating Human Behavior SAGE Publications

This book contains 11 papers from the 8th Workshop on Global Sourcing, held in Val d'Isère, France, during March 23–26, 2014, which were carefully reviewed and selected from 42 submissions. They are based on a vast empirical base brought together by leading researchers in information systems, strategic management, and operations. This volume is intended for students, academics, and practitioners interested in research results and experiences in outsourcing and

offshoring of information technology and business processes. Topics discussed in this book combine theoretical and practical insights regarding challenges that industry leaders, policy makers, and professionals face; and they predominantly focus on how sourcing relationships are governed at the national, industry, and firm level. The contributions also examine current and future trends in outsourcing, paying particular attention to cloud services and their impact on the outsourcing sector.

An Integrated Decision Analysis Framework for the Prevention of Terrorist Attacks as Example Springer

This multidisciplinary book focuses on best

practices in sustainability research in the Asia-Pacific Region. Drawing links between research, practice, education for sustainability and the needs of industry, it addresses the sustainable development goals (SDGs). The book also presents research undertaken by a wide range of universities on matters related to sustainable development, in order to promote research in this area across multiple disciplines. Four key themes are explored: (1) Education for Sustainability. (2) Sustainable Cities. (3) Sustainable Buildings. (4) Sustainable Infrastructure. This unique book documents and disseminates the wealth of know-how on

sustainable development research in the Asia-Pacific Region today. It presents lessons learned and comparative case studies from various countries, including India, China, Indonesia, the Philippines, Bangladesh, New Zealand and Australia. Research Methods for Graduate Business and Social Science Students Routledge
Key Features --
Securing Public Transportation Systems Exceller Books
Conventional marketing strategies that focus on product differentiation and positioning often fail to deliver faster growth. In this re-published book, Jaworski and Lurie offer a novel approach to this

problem of growth.
Critical Issues in Teaching English and Language Education
CRC Press
How can you establish a customer-centric culture in an organization? This is the first comprehensive book on how to actually do service design to improve the quality and the interaction between service providers and customers. You'll learn specific facilitation guidelines on how to run workshops, perform all of the main service design methods, implement concepts in reality, and embed service design successfully in an organization. Great customer experience needs a common language across disciplines to break

down silos within an organization. This book provides a consistent model for accomplishing this and offers hands-on descriptions of every single step, tool, and method used. You'll be able to focus on your customers and iteratively improve their experience. Move from theory to practice and build sustainable business success.
Applying Service Design Thinking in the Real World Springer
Nature
Research Methods for Graduate Business and Social Science Students is a fundamental and easy guide to studying research methods. In addition to the general concepts relating to research methods, broad research issues and theoretical

concepts critical to research are discussed. The book is written in a highly reader-friendly manner and contains plenty of examples and helpful practical exercises at the end of each chapter to reinforce and enjoy learning. Divided into 16 chapters, the authors aim to clearly and concisely explain the basics of quantitative and qualitative analysis and research to students, including: - Research ethics - Formulation and process of research - Literature analysis and critical reading - How to plan and implement a research project - Data collection, survey research and data management - Practical research techniques - Elementary and

advanced statistical analyses - Assessment, reliability and validity of research work - Guidelines on research writing and structures of dissertation
Doing Research in Sound Design Springer
 Today, most large port hubs include the circular economy transformation challenge, together with smart digitalization and Internet of Things (IoT), in their strategic priorities. However, many ports do not seem to have progressed beyond incremental, small-scale sustainable innovations or the support of rather fragmented sustainability initiatives. The challenges are complex, since ports do not only have to

reconsider their own core activities but also their role in the supply chain of shippers, to lift themselves out of the linear lock-in.

Opportunities are also created, and port authorities and businesses need to embrace circular learning and turn these projects into sustainable business models. This strategic change or refocus requires new insights into innovative governance and business frameworks, the link between strategy and commercially viable business models, systems innovation, intensified stakeholder collaboration and co-creation, altered traffic segments and hinterland focus, amongst others. These Special Issue articles

address current CE transition concerns salient to port strategists and managers, such as first strategic changes towards circular ports, building awareness on the importance of sustainability data and available space, and how port authorities can develop circular business models.

15th IFIP WG 8.5 International Conference, EGOV 2016, Guimarães, Portugal, September 5-8, 2016,

Proceedings Pearson Education India

This book constitutes the refereed proceedings of the 18th International Conference on Product-Focused Software Process Improvement, PROFES 2017, held in Innsbruck, Austria, in November/December

2017. The 17 revised full papers presented together with 10 short papers, 21 workshop papers, 3 posters and tool demonstrations papers, and 4 tutorials were carefully reviewed and selected from 72 submissions. The papers are organized in topical sections on : Agile software Development; Data science and analytics; Software engineering processes and frameworks; Industry relevant qualitative research; User and value centric approaches; Software startups; Serum; Software testing.

101 Design Methods

Bloomsbury Publishing
This edited book brings together a collection of research-based chapters that address a variety of topics related to the teaching

of English in different contexts around the world. The chapters are informed by a critical approach to research, employing a variety of research methods to question and problematize taken-for-granted definitions and practices in areas such as classroom pedagogy, testing, curriculum, language policy, the position of English as a medium of instruction, educational management, teacher education, materials and evaluation. This book addresses a major gap in theoretical and research literature in the area of teaching English, and it will be of interest to trainee and practising teachers, research students and scholars of EFL and TESOL, and

researchers in applied linguistics.

Understanding and Evaluating Research

Marshall Cavendish International Asia Pte Ltd

The first step-by-step guidebook for successful innovation planning Unlike other books on the subject, 101 Design Methods approaches the practice of creating new products, services, and customer experiences as a science, rather than an art, providing a practical set of collaborative tools and methods for planning and defining successful new offerings.

Strategists, managers, designers, and researchers who undertake the challenge of innovation, despite a lack of established

procedures and a high risk of failure, will find this an invaluable resource. Novices can learn from it; managers can plan with it; and practitioners of innovation can improve the quality of their work by referring to it.

Looking to methods and tools for the Research in Design and Architectural Technology

John Wiley & Sons

In this book, all primary research scope and dimensions are considered, which will help the researcher have a self-evaluation of the work he/she is carrying out. This book focuses on each possible way of research steps – beginning from problem identification to report generation.

This book has eight chapters. Chapter I

deal with Research Methodology: An Introduction it has included especially the values and ethics in social research through it the students and the researcher would get knowledge about the ethical manners of research. Chapter II deals with Research Methods under it exclusively focus on the utility of socio-legal research and the relevance of empirical research. Chapter III deals with the Identification of Research Problem; it has covered criteria of research problem, evaluation of research problem, survey of available literature, and bibliography research through point researcher can understand how literature review helpful in

accomplishing the research work? Purpose of the literature review, what types of legislative material can refer by the researcher? How is the juristic writing vital in the socio-legal research? Chapter IV deals with the Hypothesis. Chapter V deals with the Preparation of the research design under this chapter. I have tried to discuss devising tools and techniques for collecting data with the help of juristic literature, the use of historical and comparative research materials, observation studies, and questionnaires, jurimetrics, computerized research, etc. Chapter VI deals with the classification and tabulation of data.

Chapter VII deals with Report writing. Chapter VIII deals with Legal citation methods; it is the exclusive chapter in this book because there is no need for the researcher to refer another text for Standard Indian legal citation style. It is well-organized book deals with a variety of research methods used in legal and social sciences. A Handbook of "A Socio-legal research & citation methods" is recommended for researchers and useful during Ph. D Course Work.

Volume 12 (Year of publication: 2019)

Springer Nature
The second edition of Qualitative Research Methods for Community Development teaches the basic skills, tools,

and methods of qualitative research with special attention to the needs of community practitioners. This book teaches students entering planning, community development, nonprofit management, social work, and similar applied fields the core skills necessary to conduct systematic research designed to empower communities and promote social change. Focusing on the basic elements of qualitative research, such as field observation, interviewing, focus groups, and content analysis, this second edition of this book provides an overview of core methods and theoretical underpinnings of successful research. It

also includes two new chapters on qualitative data analysis software and techniques for conducting online qualitative interviews and focus groups. From housing, community organizing, neighborhood planning, and urban revitalization, this book gives students the skills they need to undertake their own projects and provides professionals a valuable reference for their future research. This book serves as a primary text for courses in applied qualitative research and as a reference book for professionals and community-based researchers.

Cases on Active Blended Learning in Higher Education IGI Global

This book concerns EU

Cohesion Policy and the economic convergence of underdeveloped regions in Italy and Spain from the first programming period to the present: it investigates the political and institutional factors that determine the success or failure of implementing EU Cohesion Policy at national and sub-national level, as well as their impact on economic growth. On the wave of the American tradition of development studies, this book suggests that public policy analysis can be fruitful for understanding economic growth and cohesion, if it were to reconstruct domestic public interventions for development and the institutional

characteristics of the subjects responsible for pursuing development goals. To do so, this book derives its theoretical foundations from the traditional debate on the role of state actors in promoting economic development and on the institutional characteristics that the public authorities involved in the process of economic development should display. More precisely, by adopting an Hirschmanian approach to development, it elaborates an original framework to compare different Cohesion Policy implementations and to understand its economic results in different countries, using Italy and Spain as pilot studies.

Understanding and

Evaluating Research: A

Critical Guide shows

students how to be

critical consumers of

research and to

appreciate the power

of methodology as it

shapes the research

question, the use of

theory in the study, the

methods used, and

how the outcomes are

reported. The book

starts with what it

means to be a critical

and uncritical reader of

research, followed by a

detailed chapter on

methodology, and then

proceeds to a

discussion of each

component of a

research article as it is

informed by the

methodology. The book

encourages readers to

select an article from

their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.

SAGE Publications
This book presents a series of in-depth examinations, by leading experts from banking institutions, academia and civil society, of key aspects of the rapidly evolving practice of IAMs, and of the implications of such practice for environmental and social governance.

Activate High-Yield Behaviors To Achieve Extraordinary Results - Every Time

Springer
Active blended

learning (ABL) is a pedagogical approach that combines sensemaking activities with focused interactions in appropriate learning settings. ABL has become a great learning tool as it is easily accessible online, with digitally rich environments, close peer and tutor interactions, and accommodations per individual learner needs. It encompasses a variety of concepts, methods, and techniques, such as collaborative learning, experiential learning, problem-based learning, team-based learning, and flipped classrooms. ABL is a tool used by educators to develop learner autonomy, engaging students in knowledge construction,

reflection, and critique. In the current educational climate, there is a strong case for the implementation of ABL. *Cases on Active Blended Learning in Higher Education* explores strategies and methods to implement ABL in higher education. It will provide insights into teaching practice by describing the experiences and reflections of academics from around the world. The chapters analyze enablers, barriers to engagement, outcomes, implications, and recommendations to benefit from ABL in different contexts, as well as associated concepts and models. While highlighting topics such as personalized university

courses, remote service learning, team-based learning, and universal design, this book is ideal for in-service and preservice teachers, administrators, instructional designers, teacher educators, practitioners, researchers, academicians, and students interested in pedagogical approaches aligned to ABL and how this works in higher education institutions. *Principles and Processes* Springer Introducing the key questions and challenges faced by the researcher of digital discourse, this book provides an overview of the different methodological dimensions associated with this type of

research. Bringing together a team of experts, chapters guide students and novice researchers through how to conduct rigorous, accurate, and ethical research with data from a wide range of online platforms, including Facebook, Instagram, Twitter, YouTube, and online dating apps. *Research Methods for Digital Discourse Analysis* focuses on the key issues that any digital discourse analyst must consider, before tackling more specific topics and approaches, including how to work with multilingual or multimodal data. Emphasizing concrete, practical advice and

illustrated with plentiful examples from research studies, each chapter introduces a new research dimension for consideration, briefly exploring how other discourse analysts have approached the topic before using an in-depth case study to highlight the main challenges and provide guidance on methodological decision-making. Supported by a range of pedagogical tools, including discussion questions and annotated further-reading lists, this book is an essential resource for students and any researcher new to analyzing digital discourse.
