Balancing Societal and Individual Benefits and Risks of Prescription Opioid Use

Center for Social Studies Educ
A tour de force from acclaimed author Alan Gratz (Prisoner B-3087), this timely -- and timeless

-- novel tells the powerful story of three different children seeking refuge. A New York Times bestseller! JOSEF is a Jewish boy living in 1930s Nazi Germany. With the threat of concentration camps looming, he and his family board a ship bound for the other side of the world . . . ISABEL is a Cuban girl in 1994. With riots and unrest plaguing her country, she and her

family set out on a raft, hoping to find safety in America . . . MAHMOUD is a Syrian boy in 2015. With his homeland torn apart by violence and destruction, he and his family begin a long trek toward Europe . . . All three kids go on harrowing journeys in search of refuge. All will face unimaginable dangers -- from drownings to bombings to betrayals.

But there is always the hope of tomorrow. And although Josef, Isabel, and Mahmoud are separated by continents and decades, shocking connections will tie their stories together in the end. This action-packed novel tackles topics both timely and timeless: courage, survival, and the quest for home.

An Introduction with Readings

New Academia+ORM

"Advice and Support: The Early Years, 1941-1960" describes the activities of the U.S. Army in Vietnam

during World War II, military advice and assistance to the French government during the immediate postwar years, and the advisory program that developed after the Geneva Agreements of 1954. Its scope ranges from high-level policy decisions to low-echelon advisory operations in the field, presented against a background of relevant military and political developments. Useful not only as a study of military assistance but as a view of the Army as an agent of national policy, Ronald

Spector's interesting book is a fitting introduction to the overall study of the conflict in Vietnam.

Army Leadership and the Profession (ADP 6-22)

Houghton Mifflin Harcourt

A classic work of

American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a groundbreaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the

men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace,

courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

Eclectic criticism and insightful observations from “one of the most respected cultural historians working today” (Ronald A. Wells, Professor of History

Emeritus, Calvin College). “From cowboy philosopher Will Rogers to popular perceptions of two world wars and Vietnam, from the history of language to the language of film and television, Peter Rollins has devoted his career to exploring the intriguing ways in which the creative impulse both shapes and reflects American culture. His observations are fresh, illuminating and of enduring value.” —John E. O'Connor, co-founder/editor of *Film & History: An*

Interdisciplinary Journal of Film and Television Studies “Examines the roles of language, satire, and film in reflecting the American consciousness through such diverse sources as Orestes Brownson, Benjamin Lee Whorf, Will Rogers, and Hollywood. Readers of *America Reflected* are in for a delightful voyage as they travel through American history and culture with Peter Rollins as their guide providing personal and scholarly insights into the shaping of the American mind.”

—Ron Briley, editor of *The Politics of Baseball: Essays on the Pastime and Power at Home and Abroad* “Even those who have known and admired Peter Rollins’s acclaimed works will here find enlightening surprises. Epistemology, language theory, war’s polemics, filmed history, and an array of significant creators of American culture are all elegantly displayed. This book will make you a wiser person and charm you while it does it.” —John Shelton Lawrence, Emeritus

Professor of Philosophy, Morningside College “Two decades ago I was privileged to work on a book, *America Observed*, with Alistair Cooke. Now we have *America Reflected* by Peter Rollins . . . Not only does Rollins make good observations about our lives and times, his reflections on a diverse set of subjects helps us to see the meanings of our observations.” —Ronald A. Wells, Professor of History Emeritus, Calvin College “Rollins gathers together glimpses of our

shared worlds, so that we may observe their interconnections across media, genres, and time. From down-home values and front-porch philosophy, to tales of wars and chronicles of lives, the subjects considered here are all part of the stories we tell about ourselves and our social worlds.” —Cynthia J. Miller, President, Literature/Film Association

"From one of the most brilliant and influential

lawyers of our time comes an unforgettable true story about the redeeming potential of mercy. Bryan Stevenson was a gifted young attorney when he founded the Equal Justice Initiative, a legal practice dedicated to defending the poor, the wrongly condemned, and those trapped in the furthest reaches of our criminal justice system. One of his first cases was that of Walter McMillian, a young man sentenced to die for a notorious murder he didn't commit. The case drew Stevenson into

a tangle of conspiracy, political machination, and legal brinksmanship - and transformed his understanding of mercy and justice forever."--Back cover.

New evidence this year corroborates the rise in world hunger observed in this report last year, sending a warning that more action is needed if we aspire to end world hunger and malnutrition

in all its forms by 2030. Updated estimates show the number of people who suffer from hunger has been growing over the past three years, returning to prevailing levels from almost a decade ago. Although progress continues to be made in reducing child stunting, over 22 percent of children under five years of age are still affected. Other forms of malnutrition are also growing: adult obesity continues to increase in countries irrespective of their income levels, and

many countries are coping with multiple forms of malnutrition at the same time – overweight and obesity, as well as anaemia in women, and child stunting and wasting.

 Explores the ethical, legal, and societal issues arising from brain imaging, psychopharmacology, and other new developments in neuroscience. Neuroscience increasingly allows us to explain, predict, and even control aspects of human behavior. The ethical issues that arise from these developments

extend beyond the boundaries of conventional bioethics into philosophy of mind, psychology, theology, public policy, and the law. This broader set of concerns is the subject matter of neuroethics. In this book, leading neuroscientist Martha Farah introduces the reader to the key issues of neuroethics, placing them in scientific and cultural context and presenting a carefully chosen set of essays, articles, and excerpts from longer works that

explore specific problems in neuroethics from the perspectives of a diverse set of authors. Included are writings by such leading scientists, philosophers, and legal scholars as Carl Elliot, Joshua Greene, Steven Hyman, Peter Kramer, and Elizabeth Phelps. Topics include the ethical dilemmas of cognitive enhancement; issues of personality, memory and identity; the ability of brain imaging to both persuade and reveal; the legal implications of neuroscience; and the

many ways in which neuroscience challenges our conception of what it means to be a person. Neuroethics is an essential guide to the most intellectually challenging and socially significant issues at the interface of neuroscience and society. Farah's clear writing and well-chosen readings will be appreciated by scientist and humanist alike, and the inclusion of questions for discussion in each section makes the book suitable for classroom use.  Lewis "Shoe" Blake is used to the joys and difficulties of life on the Tuscarora Indian reservation in 1975: the joking, the Fireball games, the snow blowing through his roof. What he's not

used to is white people being nice to him -- people like George Haddonfield, whose family recently moved to town with the Air Force. As the boys connect through their mutual passion for music, especially the Beatles, Lewis has to lie more and more to hide the reality of his family's poverty from George. He also has to deal with the vicious Evan Reininger, who makes Lewis the special target of his wrath. But when everyone else is on Evan's side, how can he be defeated? And

if George finds out the truth about Lewis's home -- will he still be his friend? Acclaimed adult author Eric Gansworth makes his YA debut with this wry and powerful novel about friendship, memory, and the joy of rock 'n' roll.

ADP 6-22 describes enduring concepts of leadership through the core competencies and attributes required of leaders of all cohorts and all organizations, regardless of mission or

setting. These principles reflect decades of experience and validated scientific knowledge. An ideal Army leader serves as a role model through strong intellect, physical presence, professional competence, and moral character. An Army leader is able and willing to act decisively, within superior leaders' intent and purpose, and in the organization's best interests. Army leaders recognize that organizations, built on mutual trust and confidence, accomplish

missions. Every member of the Army, military or civilian, is part of a team and functions in the role of leader and subordinate. Being a good subordinate is part of being an effective leader. Leaders do not just lead subordinates—they also lead other leaders. Leaders are not limited to just those designated by position, rank, or authority.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all

time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States—which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean—it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day,

from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts—it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7—it is nevertheless an essential record of one of the most transformational events of

modern times.

"If a historian were allowed but one book on the American involvement in Vietnam, this would be it." — Foreign Affairs
When first published in 1979, four years after the end of one of the most divisive conflicts in the United States, *The Irony of Vietnam* raised eyebrows. Most students of the war argued that the United States had "stumbled into a quagmire in Vietnam through hubris and miscalculation," as the

New York Times's Fox Butterfield put it. But the perspective of time and the opening of documentary sources, including the Pentagon Papers, had allowed Gelb and Betts to probe deep into the decisionmaking leading to escalation of military action in Vietnam. The failure of Vietnam could be laid at the door of American foreign policy, they said, but the decisions that led to the failure were made by presidents aware of the risks, clear about their aims, knowledgeable

about the weaknesses of their allies, and under no illusion about the outcome. The book offers a picture of a steely resolve in government circles that, while useful in creating consensus, did not allow for alternative perspectives. In the years since its publication, *The Irony of Vietnam* has come to be considered the seminal work on the Vietnam War.

Ever since our nation's founding, after a nearly decade-long struggle with

Great Britain, America has found itself almost continuously at war. And at the forefront of every struggle—large or small, foreign or domestic, celebrated or forgotten—has been the president, who as commander-in-chief of the armed forces has to make the impossible choice of when to hazard American lives. Michael Beschloss is a lauded historian and one of the keenest observers of the White House. In *Presidents of War*, he offers an authoritative portrait of our major

wartime presidents in action, from the War of 1812 to the Vietnam War. Whether examining Lincoln's controversial military leadership, Wilson's idealistic and authoritarian approach to World War I, or LBJ sinking into the quagmire of Vietnam, Beschloss employs deep research and unsurpassed storytelling to bring these presidents to life in moments of public oratory and private doubt. He also charts their relationships with the public, which has consigned them to fame

or infamy, and with Congress, which has continually struggled to define and redefine the president's wartime powers. Provocative and illuminating, *Presidents of War* is a definitive work of presidential history and an invaluable guide to leadership and decision-making in times of crisis.

The #1 New York Times bestseller! This chapter book edition of the #1 New York Times bestseller by luminaries Ibram X.

Kendi and Jason Reynolds is an essential introduction to the history of racism and antiracism in America RACE. Uh-oh. The R-word. But actually talking about race is one of the most important things to learn how to do. Adapted from the groundbreaking bestseller *Stamped: Racism, Antiracism, and You*, this book takes readers on a journey from present to past and back again. Kids will discover where racist ideas came from, identify how they impact America today, and meet those

who have fought racism with antiracism. Along the way, they'll learn how to identify and stamp out racist thoughts in their own lives. Ibram X. Kendi's research, Jason Reynolds's and Sonja Cherry-Paul's writing, and Rachele Baker's art come together in this vital read, enhanced with a glossary, timeline, and more.

The long-awaited follow-up to the Pulitzer Prize-winning *The Sympathizer*, which has sold more than one million copies worldwide, *The Committed* follows the man of two minds as he arrives in Paris in the early 1980s with his blood brother Bon. The pair try to overcome their pasts and ensure their futures by engaging in capitalism in one of its purest forms:

drug dealing. Traumatized by his reeducation at the hands of his former best friend, Man, and struggling to assimilate into French culture, the Sympathizer finds Paris both seductive and disturbing. As he falls in with a group of left-wing intellectuals whom he meets at dinner parties given by his French Vietnamese “aunt,” he finds stimulation for his mind but also customers for his narcotic merchandise. But the new life he is making has perils he has not foreseen,

whether the self-torture of addiction, the authoritarianism of a state locked in a colonial mindset, or the seeming paradox of how to reunite his two closest friends whose worldviews put them in absolute opposition. The Sympathizer will need all his wits, resourcefulness, and moral flexibility if he is to prevail. Both highly suspenseful and existential, *The Committed* is a blistering portrayal of commitment and betrayal that will cement Viet Thanh

Nguyen's position in the firmament of American letters.

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll

of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences,

Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.
