The Event A&C Black

"Ours is a rich world filled with misery. This gives rise to a pressing question: how should the well-off respond to the needy? Peter Singer famously argued that just as we have an obligation to save a drowning child, we have an obligation to support charities like Oxfam. Inspired by Singer, Effective Altruism holds that we ought to support those charities doing the most good. Being Good in a World of Need powerfully challenges these views. Drawing on many sources, Temkin illustrates many disanalogies between saving a drowning child and supporting international

charities, involving: intervening agents; effects of one's actions; corruption; responsibility; accidents versus injustice; and aid beneficiaries. These disanalogies raise complex issues requiring a pluralistic approach, rather than Effective Altruism's monistic, "do the most good" approach. Being Good discusses: ways aid may reward corrupt leaders and incentivize disastrous policies; charities ignoring or covering up negative impacts; the ethical disaster of aid efforts in Goma; brain and character drains; difficulties in replicability or scaling up model aid projects; ethical imperialism, paternalism, autonomy, and respect; Angus Deaton's contention that aid undermines government responsiveness; Jeffrey Sachs and the Millennium Villages Project; conflicts between individual and collective morality; fairness and responsibility; focusing on badly off people rather than countries;

humanitarian versus development aid; and ways of aiding other than on-the-ground charities"--

The Enigma of Reason Columbia University Press

This groundbreaking inquiry into the centrality of place in Martin Heidegger's thinking offers not only an illuminating reading of Heidegger's thought but a detailed investigation into the way in which the concept of place relates to core philosophical issues. In Heidegger's *Topology*, Jeff Malpas argues that an engagement with place, explicit in Heidegger's later work, informs Heidegger's thought as a whole. What guides Heidegger's thinking, Malpas writes, is a conception of philosophy's starting point: our finding ourselves already "there," situated in the world, in "place". Heidegger's concepts of being and place, he argues, are inextricably bound together. Malpas follows the development of Heidegger's topology through three stages: the early period of the 1910s and 1920s, through *Being and Time*, centered on the "meaning of being"; the middle period of the 1930s into the 1940s, centered on the "truth of being"; and the late period from the mid-1940s on, when the "place of being" comes to the fore. (Malpas also challenges the widely repeated arguments that link Heidegger's notions of place and belonging to his entanglement with Nazism.) The significance of Heidegger as a thinker of place, Malpas claims, lies not only in Heidegger's own investigations but also in the way that spatial and topographic thinking has flowed from Heidegger's work into that of other key thinkers of the past 60 years.

Exploring the lifeworlds of Halima, Omar and Mohamed, three middle-aged Somalis living in Melbourne, Australia, the author discusses the interrelated meanings of emplacement and displacement as experienced in people's everyday lives. Through their experiences of displacement and placemaking, *Being-Here*

examines the figure of the refugee as a metaphor for societal alienation and estrangement, and moves anthropological theory towards a new understanding of the crucial existential links between Sein (Being) and Da (Here).

"What is the meaning of being?" This is the central question of Martin Heidegger's profoundly important work, in which the great philosopher seeks to explain the basic problems of existence. A central influence on later philosophy, literature, art, and criticism—as well as existentialism and much of postmodern thought—Being and Time forever changed the intellectual map of the modern world. As Richard Rorty wrote in the *New York Times* Book Review, "You cannot read most of the important thinkers of

recent times without taking Heidegger's thought into account."

This first paperback edition of John Macquarrie and Edward Robinson's definitive translation also features a new foreword by Heidegger scholar Taylor Carman.

THE Interview That Solves The Human Condition And Saves The World! Duke University Press

How do humans explore beauty, virtue, love, justice, and goodness? This book argues that philosophical attention to our lives, shaped in part by our choices, is our instrument for investigating these parts of reality. Constructing a life is a philosophical act. Philosophical acts that are shaped by a life, and that shape a life, constitute philosophical style. Everyone has a philosophical style, which is fundamentally about the way we live in the world through our bodies, our reason, our imagination, and our virtue. It is about what we love and how we are loved. Beauty, suffering, and being in the world are placeholders for everything that makes up our lived experience. As we live our lives between beauty and suffering, we learn most about being in the world. The argument of the book moves from a discussion of philosophical style, through the three placeholders for human experience as they are affected by philosophy (beauty, suffering, and being in the world), arriving at a reworking of Pascal's wager about living in relationship to the presence or absence of God as a way of understanding the commitments that are our only way into the truth of our life.

Heidegger's Being and Time Routledge

This book offers a philosophical analysis of what it is to be a human being in all her aspects. It analyses what is meant by the self and the I and how this feeling of a self or an I is connected to the brain. It studies specific cases of brain disorders, based on the idea that in order to understand the common, one has to study the specific. The book shows how the self is thought of as a three-fold emergent self, comprising a relationship between an objective neural segment, a subjective neural segment and a subjective transcendent segment. It explains that the self in the world tackles philosophical problems such as the problem of free will, the problem of evil, the problem of human uniqueness and empathy. It demonstrates how the problem of time also has its place here. For many people, the world includes ultimate reality; hence the book provides an analysis and evaluation of different relationships between human beings and Ultimate Reality (God). The book presents an answer to the philosophical problem of how one could understand divine action in the world.

Brain, body, and world are united in a complex dance of circular causation and extended computational activity. In *Being There*, Andy Clark weaves these several threads into a pleasing whole and goes on to address foundational questions concerning the new tools and techniques needed to make sense of the emerging sciences of the embodied mind. Clark brings together ideas and techniques from robotics, neuroscience, infant psychology, and artificial intelligence. He addresses a broad range of adaptive behaviors, from cockroach locomotion to the role of linguistic artifacts in higher-level thought.

Heidegger's Black Notebooks Indiana University Press

From the 1930s through the 1970s, the philosopher Martin Heidegger kept a running series of private writings, the so-called Black Notebooks. The recent publication of the Black Notebooks volumes from the war years have sparked international controversy. While Heidegger's engagement with National Socialism was well known, the Black Notebooks showed for the first time that this anti-Semitism was not merely a personal resentment. They contain not just anti-Semitic remarks, they show Heidegger incorporating basic tropes of anti-Semitism into his philosophical thinking. In them, Heidegger tried to assign a philosophical significance to anti-Semitism, with "the Jew" or "world Judaism" cast as antagonist in his project. How, then, are we to engage with a philosophy that, no matter how significant, seems contaminated by anti-Semitism? This book brings together an international group of scholars from a variety of disciplines to discuss the ramifications of the Black Notebooks for philosophy and the humanities at large. Bettina Bergo, Robert Bernasconi, Martin Gessmann, Sander Gilman, Peter E. Gordon, Hans Ulrich Gumbrecht, Michael Marder, Eduardo Mendieta, Richard Polt, Tom Rockmore, Peter Trawny, and Slavoj Žižek discuss issues including anti-Semitism in the Black Notebooks and Heidegger's thought more broadly, such as German conceptions of Jews and Judaism, Heidegger's notions of metaphysics, and anti-Semitism's entanglement with Heidegger's views on modernity and technology, grappling with material as provocative as it is deplorable. In contrast to both those who seek to exonerate Heidegger and those who simply condemn him, and rather than an all-or-nothing view of Heidegger's anti-Semitism, they urge

careful reading and rereading of his work to turn Heideggerian thought against itself. These measured and thoughtful responses to one of the major scandals in the history of philosophy unflinchingly take up the tangled and contested legacy of Heideggerian thought.

On Heidegger's Being and Time Springer

In *Being and Time* Heidegger gives an account of the distinctive features of human existence, in an attempt to answer the question of the meaning of being. He finds that underlying all of these features is what he calls 'original time'. In this clear and straightforward introduction to the text, Paul Gerner takes the reader through the work, examining its detail and explaining the sometimes difficult language which Heidegger uses. The topics which he covers include being-in-the-world, being-with, thrownness and projection, truth, authenticity, time and being, and historicity. His book makes *Being and Time* accessible to students in a way that conveys the essence of Heidegger's project and remains true to what is distinctive about his thinking.

On Being in the World (Routledge Revivals) Harper Collins

On Heidegger's Being and Time is an outstanding exploration of Heidegger's most important work by two major philosophers. Simon Critchley argues that we must see *Being and Time* as a radicalization of Husserl's phenomenology, particularly his theories of intentionality, categorial intuition, and the phenomenological concept of the a priori. This leads to a

reappraisal and defense of Heidegger's conception of phenomenology. In contrast, Reiner Schürmann urges us to read Heidegger 'backward', arguing that his later work is the key to unravelling *Being and Time*. Through a close reading of *Being and Time* Schürmann demonstrates that this work is ultimately aporetic because the notion of Being elaborated in his later work is already at play within it. This is the first time that Schürmann's renowned lectures on Heidegger have been published. The book concludes with Critchley's reinterpretation of the importance of authenticity in *Being and Time*. Arguing for what he calls an 'originary inauthenticity', Critchley proposes a relational understanding of the key concepts of the second part of *Being and Time*: death, conscience and temporality.

A Boston Globe Best Book of 2021: "Lyrical, closely observed" essays on being Black in the US, Canada, and Trinidad, and how those experiences differed (Kirkus Reviews). Finalist for the 2021 Hilary Weston Writers' Trust Prize for Nonfiction With that one eloquent word, disorientation, Scotiabank Giller Award winner Ian Williams captures the impact of racial encounters on racialized people—the whiplash of race that occurs while minding one's own business. Sometimes the consequences are only irritating, but sometimes they are deadly. Spurred by the police killings and street protests of 2020, Williams offers a perspective that is distinct from that of US writers addressing similar themes. Williams has lived in Trinidad (where he was never the only Black person in the room), in Canada (where he often was), and in the United States (where as a Black man from the Caribbean, he was a different kind of "only"). He brings these formative experiences

fruitfully to bear on his theme in *Disorientation*. Inspired by the essays of James Baldwin, in which the personal becomes the gateway to larger ideas, Williams explores such matters as the unmistakable moment when a child realizes they are Black; the ten characteristics of institutional whiteness; how friendship forms a bulwark against being a target of racism; the meaning and uses of a Black person's smile; and blame culture—or how do we make meaningful change when no one feels responsible for the systemic structures of the past. *Disorientation* is a book for all readers who believe that civil conversation on even the most charged subjects is possible. Employing his wit, his empathy for all, and his vast and astonishing gift for language, Ian Williams gives readers an open, candid, and personal perspective on an undeniably important subject. "Honest, vulnerable, courageous and funny." —Lawrence Hill, author of *The Book of Negroes*

Intolerance and bigotry lie at the heart of all human suffering. So claims Bertrand Russell at the outset of "In Praise of Idleness," a collection of essays in which he espouses the virtues of cool

reflection and free enquiry; a voice of calm in a world of maddening unreason. With characteristic clarity and humour, Russell surveys the social and political consequences of his beliefs. From a devastating critique of the ancestry of fascism to a vehement defense of 'useless' knowledge, with consideration given to everything from insect pests to the human soul, "In Praise of Idleness" is a tour de force that only Bertrand Russell could perform.

The Philosophy of Merleau-Ponty Penguin

Breaking fresh ground in Woolfian scholarship, this study presents a timely and compelling interpretation of Virginia Woolf's textual treatment of the relationship between self and world from the perspective of the philosophy of Martin Heidegger. Drawing on Woolf's novels, essays, reviews, letters, diary entries, short stories, and memoirs, the book explores the political and the ontological, as the individual's connection to the world comes to be defined by an involvement and engagement that is always already situated within a particular physical, societal, and historical context. Emma Simone argues that at the heart of what it means to be an individual making his or her way in the world, the perspectives of Woolf and Heidegger are founded upon certain shared concerns, including the sustained critique of Cartesian dualism, particularly the resultant binary oppositions of

subject and object, and self and Other; the understanding that the individual is a temporal being; an emphasis upon intersubjective relations insofar as Being-in-the-world is defined

by Being-with-Others; and a consistent emphasis upon average everydayness as both determinative and representative of the individual's relationship to and with the world.
