commented on Apr 7, 2018 yeah the workaround didn't work for me too

wgordon17 commented on Apr 26, 2018 error UnicodeDecodeError: 'utf-8' codec can't decode byte ...

text =

textract.process(".txt",encoding="utf8")

I also but the extra option encoding= but

it looks like textract is just ignoring that and keep on trying to detect it. So I then

got this error: UnicodeDecodeError:

'charmap' codec can't decode byte 0x81 in position 40: character maps to

<undefined>

**UnicodeDecodeError: 'utf-8' codec can't decode byte 0xff ...**

UnicodeDecodeError: 'utf-8' codec can't decode byte 0xc9 in position 0: invalid continuation byte .

utf-8 encoding

encoding='utf-8'

python - UnicodeDecodeError: 'utf8' codec can't decode ...

UnicodeDecodeError: 'utf-8' codec can't

decode byte 0x8b in position 1: invalid

start byte while accessing csv file. I am

trying to access csv file from aws s3

bucket and getting error 'utf-8' codec

can't decode byte 0x8b in position 1:

invalid start byte code is below I am

using python 3.7 version.

The error is because there is some non-

ascii character in the dictionary and it

can't be encoded/decoded. One simple

way to avoid this error is to encode such

strings with encode () function as follows

(if a is the string with non-ascii

character): a.encode ('utf-8').strip ()
