Grade A Secrets offers

a useful mock exam. Inside each pack, actual GCSE examiners reveal inside information on the forthcoming 2001 exams. They also add tips on how to attain A/A* grades.

Polyesters and Polyamides Cambridge University Press
Exam Board: OCR
Level: A-Level Subject: Chemistry First
Teaching: September 2015 First Exam: Summer 2016 Create confident, literate and well-prepared students with skills-focused, topic-specific workbooks. Our Student Workbooks build students' understanding, developing the confidence and exam skills they need, whilst providing ready prepared lesson solutions. -

Supplements key resources such as textbooks to adapt easily to existing schemes of work - Offers time-saving and economical lesson solutions for both specialist and non-specialist teachers - Provides flexible resource material to reinforce and apply topic understanding throughout the course, as classwork or extension tasks, or for revision - Creates opportunities for self-directed learning and assessment with answers to tasks and activities supplied online - Prepares students to meet the demands of the specification by practising exam technique and developing their literacy skills
Coding Streams of

Language CSU Open Press

Puts the development of chemical ideas in the context of social and industrial needs. This book uses OCR terminology, and contains a glossary of the key terms from the specification. It is structured in line with the OCR specification with colour content, photographs and illustrations.

Perspectives on Health Equity and Social Determinants of Health Oxford

University Press - Children

Based on principles of cognitive science, this three-step approach to effective revision combines knowledge, retrieval and interleaving, and extensive exam-style practice to help students master

knowledge and skills for GCSE success. UK schools save 50% off the RRP! Discount will be automatically applied when you order on your school account.

Chemistry for the IB Diploma Coursebook with Free Online

Material Philip Allan
This highly respected and valued textbook has been the book of choice for Cambridge IGCSE students since its publication. This new edition, complete with CD-ROM, continues to provide comprehensive, up-to-date coverage of the core and extended curriculum topics specified in the IGCSE Chemistry syllabus. The book is supported by a CD-ROM containing extensive revision and exam practice questions,

background information and reference material.

Higher Tier Elsevier

Ensure your students get to grips with the core practicals and develop the skills needed to succeed with an in-depth assessment-driven approach that builds and reinforces understanding; clear summaries of practical work with sample questions and answers help to improve exam technique in order to achieve higher grades. Written by experienced teacher Nora Henry, this Student Guide for practical Chemistry: - Help students easily identify what they need to know with a concise summary of required practical work examined in the A-level specifications. - Consolidate

understanding of practical work, methodology, mathematical and other skills out of the laboratory with exam tips and knowledge check questions, with answers in the back of the book. - Provide plenty of opportunities for students to improve exam technique with sample answers, examiners tips and exam-style questions. - Offer support beyond the Student books with coverage of methodologies and generic practical skills not focused on in the textbooks.

GCSE Chemistry

Cambridge University Press

Written by curriculum and specification experts, this student book supports and extends students through the new

course whilst delivering the breadth, depth, and skills needed to succeed in the new AS and beyond.

An Introduction to Computational Fluid Dynamics The Finite Volume Method, 2/e

James Currey
Publishers

Offers complete in-depth preparation for the Cambridge IGCSE in English as a Second Language (E2L) examination. The revised edition of this highly successful course offers complete preparation for all papers of the Cambridge IGCSE in English as a Second Language examination. The book is endorsed by Cambridge for use with the revised syllabus. Key features include: stimulating topics, international in perspective and

relevant to IGCSE students educational needs and interests; step-by-step development of the four skills to build confidence and competence; particular attention to developing a mature writing style with a focus on tone, register and audience awareness; exercises in grammar, vocabulary and spelling.

[The Essential Revision Guide](#) Cambridge University Press

Polyesters and polyamides remain the most used group of

synthetic fibres. This authoritative book reviews methods of their production, ways of improving their functionality and their wide range of applications. The first part of the book describes raw materials and manufacturing processes, including environmental issues. Part two considers ways of improving the functionality of polyester and polyamide fibres, including blending, weaving, coloration and other finishing techniques as well as new techniques such as nanotechnology. The final part of the book reviews the range of uses of these important fibres, from apparel and sportswear to automotive, medical and civil engineering

applications. With its distinguished editors and international team of contributors, *Polyesters and polyamides* is a standard reference for all those using this important group of fibres. Reviews the chemical and physical properties of each fibre and their manufacture. Analyses how the functionality of polyester and polyamides can be improved. Provides examples of how the fibres are used in applications.

Organic Sulfur Compounds Humana Press

Easing the transition from GCSE to AS level, this textbook meets the 2004 Edexcel specifications and provides numerous worked examples and solutions to aid

understanding of key concepts.

Salters-Nuffield Advanced Biology
Cambridge University Press

The Cambridge IGCSE® Combined and Co-ordinated Sciences series is tailored to the 0653 and 0654 syllabuses for first examination in 2019, and all components of the series are endorsed by Cambridge International Examinations.

Cambridge IGCSE® Combined and Co-ordinated Sciences Coursebook is tailored to the 0653 and 0654 syllabuses for first examination in 2019 and is endorsed for full syllabus coverage by Cambridge International Examinations. This interdisciplinary coursebook

comprehensively covers the knowledge and skills required in these courses, with the different syllabuses clearly identified.

Engaging activities in every chapter help students develop practical and investigative skills while end-of-chapter questions help to track their progress. The accompanying CD-ROM contains self-assessment checklists for making drawings, constructing and completing results tables, drawing graphs and designing experiments; answers to all the end-of-chapter questions and auto-marked multiple-choice self tests.

Learning to Program in Python Vantage Press, Inc

This title covers the entire syllabus for

Cambridge International Examinations' International AS and A Level Biology (9700). It is divided into separate sections for AS and A Level making it ideal for students studying both the AS and the A Level and also those taking the AS examinations at the end of their first year. - Explains difficult concepts using language that is appropriate for students around the world - Provides practice throughout the course with carefully selected past paper questions at the end of each chapter

We are working with Cambridge International Examinations to gain endorsement for this title.

Cambridge IGCSE®

Combined and Co-ordinated Sciences Coursebook with CD-ROM Cambridge University Press
The OCR A level Lab Books support students in completing the A level Core Practical requirements. This lab book includes: all the instructions students need to perform the Core Practicals, consistent with our A level online teaching resources writing frames for students to record their results and reflect on their work CPAC Skills Checklists, so that students can track the practical skills they have learned, in preparation for their exams practical skills practice questions a full set of answers. This lab book is designed to help students to: structure their A level lab work

to ensure that they cover the Core Practical assessment criteria track their progress in the development of A level practical skills create a record of all of the Core Practical work they will have completed, in preparation for revision.
Cambridge International AS and A Level Biology Letts & Lonsdale
Revise for AS & A2 Biology with confidence! Providing complete study support throughout the two A Level years, this Edexcel Chemistry study guide matches the curriculum content and provides in-depth course coverage.
Written by experienced AS and A2 examiners this book includes invaluable advice on

how to get the best results in the exams. Providing plenty of exam practice and frequent progress checks and questions to consolidate learning, this AS & A2 Edexcel Chemistry study guide contains invaluable advice and preparation for the exam.

Extensive coverage of the Edexcel course: * AS & A2 specification checklists to organise your studies * tick boxes to record your progress and plan your revision * in-depth coverage of core AS & A2 topics Also included in this book: *

examiner's tips that reveal how to achieve higher marks * exam board labels that allow students to identify content relevant to their course * topics subdivided into short, manageable sections *

highlighted key points and terminology, and examiner's hints to offer guidance * progress check questions to test recall and understanding * sample questions and model answers that reveal what examiners are looking for * exam-style questions and answers that provide crucial exam practice

Synthesis and Analytical Techniques Philip Allan

Endorsed by WJEC, and written by a team of experienced senior examiners this is the only study and revision guide that precisely matches the WJEC AS Chemistry course. It contains essential course notes, revision advice, and examiner tips on how to boost grades as well as a Q&A section with

model student answers, examiner commentaries and marks.

OCR A Level Chemistry Student Book 2 Hodder Education

Produced in partnership with OCR for the 2008 OCR A Level Chemistry B (Salters) specification, the Chemical Storylines Student Book for A2 conveys the excitement of contemporary chemistry using a unique context-led approach that inspires and engages students. Written by experienced examiners, teachers and members of the University of York Science Education Group (UYSEG). Revised storylines tailored to the new specification introduce chemical ideas in the context of relevant

contemporary stories. Assignments provided throughout develop understanding and skills. Information boxes provide further background to support understanding of the module or extra details such as case studies of chemistry in context. Lively, up-to-date resources tailored to the 2008 specification. Fully cross-referenced to the accompanying "Chemical Ideas Student Book" and activities.

Chemistry A Elsevier

What does pleasure have to do with morality? What role, if any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these

questions and many more. Key ideas in the fields of normative ethics, metaethics and applied ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is

tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.

Skills for IGCSE

Student's Book

Cambridge University Press

Chemistry for the IB Diploma, Second edition, covers in full the requirements of the IB syllabus for Chemistry for first examination in 2016.

This digital version of Chemistry for the IB Diploma Coursebook, Second edition, comprehensively covers all the knowledge and skills students need during the Chemistry IB Diploma course, for first examination in

2016, in a reflowable format, adapting to any screen size or device. Written by renowned experts in Chemistry teaching, the text is written in an accessible style with international learners in mind. Self-assessment questions allow learners to track their progress, and exam-style questions help learners to prepare thoroughly for their examinations. Answers to all the questions from within the Coursebook are provided.
