Carlson breaks down the complexity of student loans by taking a step-by-step approach to understanding your loans, repayment options, and more. The Federal Trade Commission receives more complaints about rogue debt collecting than about any activity besides identity theft. Dramatically and entertainingly, *Bad Paper* reveals why. It tells the story of Aaron Siegel, a former banking executive, and Brandon Wilson, a former armed robber, who become partners and go in quest of "paper"—the uncollected debts that are sold off by banks for pennies on the dollar. As Aaron and Brandon learn, the world of consumer debt collection is an unregulated shadowland where operators often make unwarranted threats and even collect debts that are not theirs. Introducing an unforgettable cast of strivers and rogues, Jake Halpern chronicles their lives as they manage high-pressure call centers, hunt for paper in Las Vegas casinos, and meet in parked cars to sell the social security numbers and account information of unsuspecting consumers. He also tracks a "package" of debt that is stolen by unscrupulous collectors, leading to a dramatic showdown with guns in a Buffalo corner store. Along the way, he reveals the human cost of a system that compounds the troubles of hardworking Americans and permits banks to ignore their former customers. The result is a

vital exposé that is also a bravura feat of storytelling.

#1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A "brilliant" (Lupita Nyong'o, Time), "poignant" (Entertainment Weekly), "soul-nourishing" (USA Today) memoir about coming of age during the twilight of apartheid "Noah's childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa's history that must never be forgotten."—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Time, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah's unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. *Born a Crime* is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious,

and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love.

From bestselling author of *The \$100 Startup* and *Side Hustle* comes Chris Guillebeau's engaging story about the power you have to create your own financial destiny. Like financial classics *The Latte Factor* and *The Richest Man in Babylon*, *The Money Tree* uses a compelling story with captivating characters to share its core insight: you are never at the mercy of fortune as long as you have an appetite for hard work and a willingness to step outside your comfort zone. Jake Arons is in trouble. He's being evicted from his apartment in less than 30 days, the bill for his \$50,000 in overdue student loans is almost due, and the digital marketing agency he works at just implemented a new military-style grading system that might cost him his job. To top it off, Jake's new relationship with Maya was going so well... but with everything else falling down around him, he might lose her, too. In search of answers, Jake reluctantly

attends a weekly group meeting at the invitation of a coworker. Everyone in the group is trying to create a lucrative side hustle with one key requirement: they can only spend up to \$500 before earning a profit. Over the course of several weeks, Jake undertakes a series of challenges, first learning how to make \$1,000 in a single weekend, and ultimately how to discover the untapped skills he needs to take control of his finances--and his life.

It's been said that software is eating the planet. The modern economy—the world itself—relies on technology. Demand for the people who can produce it far outweighs the supply. So why do developers occupy largely subordinate roles in the corporate structure? *Developer Hegemony* explores the past, present, and future of the corporation and what it means for developers. While it outlines problems with the modern corporate structure, it's ultimately a play-by-play of how to leave the corporate carnival and control your own destiny. And it's an emboldening, specific vision of what software development looks like in the world of developer hegemony—one where developers band together into partner firms of "efficiencers," finally able to command the pay, respect, and freedom that's earned by solving problems no one else can. Developers, if you grow tired of being treated like geeks who can only be trusted to take orders and churn out code, consider this your call to arms. Bring about the autonomous future that's rightfully yours. It's time for developer hegemony.

Erin Skye Kelly wrote *Get the Hell Out of Debt* after her own struggle to become consumer-debt free. She was tired of listening to middle-aged men in suits tell her to consolidate and refinance her debt when all that seemed to happen was she'd end up in more of it while they profited from it. When Kelly figured out the two most important tools to money management—and started achieving massive results—other women wanted to join in on the debt-free journey. With her sense of humor and straight-shooting sensibilities, Erin began transforming lives. This book is not only a step-by-step process that will walk you through how to pay off your debt—it's a deeply personal journey centered around changing your mindset. As you master each of the three phases through repetition, you will create your own financial freedom, allowing you to live debt-free forever and create wealth and abundance that will positively impact your life—and the people you love and serve. No matter how much consumer debt you carry, this book is a judgment-free zone from cover-to-cover. Your dreams are welcome here.

"This book delivers completely new and

refreshing ideas on how to create value in the world.”—Mark Zuckerberg, CEO of Meta “Peter Thiel has built multiple breakthrough companies, and Zero to One shows how.”—Elon Musk, CEO of SpaceX and Tesla The great secret of our time is that there are still uncharted frontiers to explore and new inventions to create. In Zero to One, legendary entrepreneur and investor Peter Thiel shows how we can find singular ways to create those new things. Thiel begins with the contrarian premise that we live in an age of technological stagnation, even if we’re too distracted by shiny mobile devices to notice. Information technology has improved rapidly, but there is no reason why progress should be limited to computers or Silicon Valley. Progress can be achieved in any industry or area of business. It comes from the most important skill that every leader must master: learning to think for yourself. Doing what someone else already knows how to do takes the world from 1 to n, adding more of something familiar. But when you do something new, you go from 0 to 1. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won’t make a search engine. Tomorrow’s champions will not win by competing ruthlessly in today’s marketplace. They will escape competition altogether, because their businesses will be unique. Zero to One presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to find value in unexpected places.

NEW YORK TIMES BESTSELLER For the first time, Curtis “50 Cent” Jackson opens up about his amazing comeback—from tragic personal loss to thriving businessman and cable’s highest-paid executive—in this unique self-help guide, his first since his blockbuster New York Times bestseller *The 50th Law*. In his early twenties Curtis Jackson, known as 50 Cent rose to the heights of fame and power in the cutthroat music business. A decade ago the multi-platinum selling rap artist decided to pivot. His ability to adapt to change was demonstrated when he became the executive producer and star of *Power*, a high-octane, gripping crime drama centered around a drug kingpin’s

family. The series quickly became “appointment” television, leading to Jackson inking a four-year, \$150 million contract with the Starz network—the most lucrative deal in premium cable history. Now, in his most personal book, Jackson shakes up the self-help category with his unique, cutting-edge lessons and hard-earned advice on embracing change. Where *The 50th Law* tells readers “fear nothing and you shall succeed,” *Hustle Harder, Hustle Smarter* builds on this message, combining it with Jackson’s street smarts and hard-learned corporate savvy to help readers successfully achieve their own comeback—and to learn to flow with the changes that disrupt their own lives. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don’t make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life’s most important topics.

Simple Money, Rich Life One World

Lead a life of adventure, meaning and purpose—and earn a good living.

“Thoughtful, funny, and compulsively readable, this guide shows how ordinary people can build solid livings, with independence and purpose, on their own terms.”—Gretchen Rubin, author of the #1 New York Times bestseller *The Happiness Project* Still in his early thirties, Chris Guillebeau completed a tour of every country on earth and yet he’s never held a “real job” or earned a regular paycheck. Rather, he has a special genius for turning ideas into income, and he uses what he earns both to support his life of adventure and to give back. Chris identified 1,500 individuals who have built businesses earning \$50,000 or more from a modest investment (in many cases, \$100 or less), and focused on the 50 most intriguing case studies. In nearly all cases, people with no special skills discovered aspects of their personal passions that could be monetized, and were able to restructure their lives in ways that gave them greater freedom and fulfillment. Here, finally, distilled into one easy-to-use guide, are the most valuable lessons from those who’ve

learned how to turn what they do into a gateway to self-fulfillment. It's all about finding the intersection between your "expertise"—even if you don't consider it such—and what other people will pay for. You don't need an MBA, a business plan or even employees. All you need is a product or service that springs from what you love to do anyway, people willing to pay, and a way to get paid. Not content to talk in generalities, Chris tells you exactly how many dollars his group of unexpected entrepreneurs required to get their projects up and running; what these individuals did in the first weeks and months to generate significant cash; some of the key mistakes they made along the way, and the crucial insights that made the business stick. Among Chris's key principles: If you're good at one thing, you're probably good at something else; never teach a man to fish—sell him the fish instead; and in the battle between planning and action, action wins. In ancient times, people who were dissatisfied with their lives dreamed of finding magic lamps, buried treasure, or streets paved with gold. Today, we know that it's up to us to change our lives. And the best part is, if we change our own life, we can help others change theirs. This remarkable book will start you on your way.
