An International Overview Mimesis

This edited volume sets the groundwork for a dialogue between transformative learning and continental theories of Bildung in adulthood. Both theoretical frameworks bring meaning to the complex learning process of individuals as they develop a more critical worldview. In this volume, a variety of authors from different countries and theoretical backgrounds offer new understandings about Bildung and transformative learning through discussion of theoretical analyses, educational practices, and empirical research. As a result, readers gain greater insight into these theories and related implications for teaching for change. From the various chapters an exciting relationship between both theories begins to emerge and provides impetus for greater discussion and further research about two important theories of change in the field of adult education. /div

Writing and Translating for Children Peter Lang

This new book by Malcolm Parkes makes a fundamental contribution to the history of handwriting.

Handwriting is a versatile medium that has always allowed individual scribes the opportunity for self-expression, despite the limitations of the pen and the finite number of possible movements. The purpose of this study is to focus on the writing of scribes from late antiquity to the beginning of the sixteenth century, and to identify those features which are a scribe's personal contribution to the techniques and art of handwriting. The book opens with three chapters surveying the various environments in which scribes worked in the medieval West. The following five, based on the author's Lyell Lectures at the University of Oxford, then examine different aspects of the subject, starting with the basic processes of handwriting and copying. Next come discussions of developments in rapid handwriting, with its consequent influence on new alphabets; on more formal 'set hands'; and on the adaptation of movements of the pen to produce elements of style corresponding to changes in the prevailing sense of decorum. The final chapter looks at the significance of some customized images produced by handwriting on the page. The text is illustrated with 69 plates, and accompanied by a glossary of the technical terms applied to handwriting, which in itself makes a significant contribution to the subject.

Italian National Identity in the Scramble for Africa Oxford University Press

This book sheds new light on the role of the military in Italian society and culture during war and peacetime by bringing together a whole host of contributors across the interdisciplinary spectrum of Italian Studies. Divided into five thematic units, this volume examines the continuous and multifaceted impact of the military on modern and contemporary Italy. The Italian context offers a particularly fertile ground for studying the cultural impact of the military because the institution was used not only for defensive/offensive purposes, but also to unify the country and to spread ideas of socio-cultural and technological development across its diverse population.

Writing the Planet One Place at a Time Taylor & Francis

This book identifies, through an interdisciplinary lens, literary works that treat the theme of the journey from multiple angles: religious, psychological, psychoanalytical, philosophical, educational, and historical.

Cultural Perspectives from Unification to Contemporary Italy Rowman & Littlefield

Italy's First African War (1880-1896) pitted a young and ambitious European nation against the ancient Empire of Ethiopia. The Least of Europe's Great Powers rashly assailed Africa's most formidable military power. The outcome was humiliating defeat for Italy and the survival, uniquely for any African nation in the years of the European Scramble for that continent, of Ethiopian independence. Notwithstanding Italy's disastrous first experience in the colonial fray, this book argues that the impact of the war went well beyond the battlefields of the Ethiopian highlands and reached into the minds of the Italian people at home. Through a detailed and exhaustive study of Italian popular culture, this book asks how far the First African War impacted on the Italian nation-building project and how far Italians were themselves changed by undergoing the experience of war and defeat in East Africa. Finaldi argues, for the first time in historiography on the subject, that there was substantial support for and awareness of Italy's military campaign and that 'Empire', as has come to be regarded as fundamental in the histories of other European countries, needs to be brought firmly into the mainstream of Italian national history. This book is an essential contribution to debates on the relationship between European national identity and culture and imperialism in

the late 19th century.

Occasional, Critical, and Political Writing SEE Editrice Firenze

This book examines the sociocultural networks between the courts of early modern Italy and Europe, focusing on the Florentine Medici court, and the cultural patronage and international gendered networks developed by the Grand Duchess of Tuscany, Vittoria della Rovere. Adelina Modesti uses Grand Duchess Vittoria as an exemplar of pan-European 'matronage' and proposes a new matrilineal model of patronage in the early modern period, one in which women become not only the mediators but also the architects of public taste and the transmitters of cultural capital. The book will be the first comprehensive monographic study of this important cultural figure. This study will be of interest to scholars working in art history, gender studies, Renaissance studies and seventeenth-century Italy.

This book offers to the reader a tool to address the still largely uncharted territory of contemporary literature of migration. In addition to presenting and commenting on the production of the prolific writer Helen Barolini, the author Margherita Ganeri has a further ambition: to investigate the question that runs through the debate on the relationship between literary writing and socio-cultural groups, namely the possibility to define literature, and in particular Italian American literature, on the basis of ethnicity. The book includes a preface by Melania G. Mazzucco and an exclusive excerpt of Helen Barolini's forthcoming Visits.

This book offers insights into the history of mathematics education, covering both the current state of the art of research and the methodology of the field. History of mathematics education is treated in the book as a part of social history. This book grew out of the presentations delivered at the International Congress on Mathematics Education in Hamburg. Modern development and growing internationalization of mathematics education made it clear that many urgent questions benefit from a historical approach. The chapters present viewpoints from the following countries: Belgium, Brazil, Cambodia, China, Cyprus, Germany, Iceland, Italy, the Netherlands, Russia, Spain and Sweden. Each chapter represents significant directions of historical studies. The book is a valuable source for every historian of mathematics education and those interested in mathematics education and its development.

The Encyclopedia of Italian Literary Studies is a two-volume reference book containing some 600 entries on all aspects of Italian literary culture. It includes analytical essays on authors and works, from the most important figures of Italian literature to little known authors and works that are influential to the field. The Encyclopedia is distinguished by substantial articles on critics, themes, genres, schools, historical surveys, and other topics related to the overall subject of Italian literary studies. The Encyclopedia also includes writers and subjects of contemporary interest, such as those relating to journalism, film, media, children's literature, food and vernacular literatures. Entries consist of an essay on the topic and a bibliographic portion listing works for further reading, and, in the case of entries on individuals, a brief biographical paragraph and list of works by the person. It will be useful to people without specialized knowledge of Italian literature as well as to scholars.

Epos and Storitelling in Helen Barolini Routledge

Latin books are among the most numerous surviving artifacts of the Late Antique, Mediaeval, and Renaissance periods in European history; written in a variety of formats and scripts, they preserve the literary, philosophical, scientific, and religious heritage of the West. The Oxford Handbook of Latin Palaeography surveys these books, with special emphasis on the variety of scripts in which they were written. Palaeography, in the strictest sense, examines how the changing styles of script and the fluctuating shapes of individual letters allow the date and the place of production of books to be determined. More broadly conceived, palaeography examines the totality of early book

production, ownership, dissemination, and use. The Oxford Handbook of Latin Palaeography includes essays on major types of script (Uncial, Insular, Beneventan, Visigothic, Gothic, etc.), describing what defines these distinct script types, and outlining when and where they were used. It expands on previous handbooks of the subject by incorporating select essays on less well-studied periods and regions, in particular late mediaeval Eastern Europe. The Oxford Handbook of Latin Palaeography is also distinguished from prior handbooks by its extensive focus on codicology and on the cultural settings and contexts of mediaeval books. Essays treat of various important features, formats, styles, and genres of mediaeval books, and of representative mediaeval libraries as intellectual centers. Additional studies explore questions of orality and the written word, the book trade, glossing and glossaries, and manuscript cataloguing. The extensive plates and figures in the volume will provide readers with clear illustrations of the major points, and the succinct bibliographies in each essay will direct them to more detailed works in the field.

Report on Education in Europe, to the trustees of the Girard College for Orphans. By Alex. Dallas Bache Springer

The Vatican's opening of its archives in 2006 for the period of the papacy of Pius XI (1922-1939) has prompted a burst of historical research which is not only shedding new light on the role of the Holy See and the Church in this period of extraordinary political and social turmoil, but also on some of the major world events of this period. In 2008, a number of institutions created a research network, bringing together scholars from different countries who are working in these archives and highlighting its emerging work to the broader scholarly community. This book represents the proceedings from a conference of this research network, held in Providence, Rhode Island, at the Brown University in October 2010. (Series: Christianity and History. Series of the John XXIII Foundation for Religious Studies in Bologna - Vol. 11) *** "As the essays reveal, such a historic decision will impact the way that scholars interpret modern church history for years to come. Yet, as coeditor Charles Gallagher, S.J., reminds us in his introduction, the opening will also allow scholars 'to uncover a history which is not only papal, but political, cultural, economic, and global' (p. 17)." - The Catholic Historical Review, Vol. 100, No. 2, Spring 2014~
