This book is divided into 3 parts, The first part introduces the basic structures of Tibetan language consisting of vowels, consonants, superscribed and subscribed letters and prefixes and suffixes. The second part consists of a collection of articles on Tibetan literature published in the Tibet Journal Series. The third part consists of translations of the three treatises on Tibetan Grammar. *A Grammar of the Tibetan Language* SUNY Press

This textbook will thus not only help you to acquire language skills in colloquial Tibetan, it will simultaneously introduce you to a whole new manner of thinking and viewing yourself and the world. Unlike

all other spoken Tibetan language textbooks that I'm aware of, this one (almost) does not make use of grammatical terms and categories commonly used in European languages. Instead, you will become familiar with the notions, logic and categorizations that are used by Tibetans themselves: namely, the all-pervasive notion of "Self and Other" འགྲོ་བའི་རྒྱལ་ཁབ་ & འགྲོ་བའི་རྒྱལ་ཁབ་, volitional and non-volitional (འགྲོ་བའི་རྒྱལ་ཁབ་འགྲོ་བའི་རྒྱལ་ཁབ་ & འགྲོ་བའི་རྒྱལ་ཁབ་འགྲོ་བའི་རྒྱལ་ཁབ་), etc. In this way, you too, will eventually come to understand the Tibetan mindset. Being a strong advocate of such an approach is not personal philosophy and preference. It is, more importantly, the fruit of teaching Tibetan language from such a point of view over the past seven years. The response of all

of my students to such approach has been extremely positive. You may still ask: "Why bother to learn all these new categories?" As you will soon realize, the Tibetan language is very particular. Letters have genders, an honorific language register is used for certain people and even sacred places and buildings, and the use of an auxiliary indicates whether or not the speaker has direct experience of what is being said. None of this exists in the English language and there are, therefore, no English grammatical categories for such functions. Learning all of these differences may seem like a headache initially – but they are profound and fascinating and I trust you will come to enjoy putting the puzzle pieces together!

In this volume the author has dealt with both literary and colloquial Tibetan mostly in use around Lhasa. The important and elusive subjects of Pronunciation and spelling are given on principle more systematic and accurate treatment highlighting the subtle distinctions. The so-called Verb has also been elaborately treated keeping in view the genius of the Tibetan sentence, the construction of which is unique.

Tashi Daknewa was one of LTWA's resident Tibetan language teachers and with twelve years classroom experience, as well as a one-year sabbatical teaching and studying in the USA, he has developed a keen awareness of students' needs. Through diligently noting the many and various questions he has been asked over the years, as well as the answers he gave, he has been able to compile this book, which illustrates Tibetan grammar from a quite fresh perspective. What he has tried to do is to address the problems that occur in students' minds when initially presented with Tibetan grammar in the traditional way.

In *A Grammar of Purik Tibetan*, Marius Zemp offers a comprehensive description of the phonologically archaic Tibetan variety spoken in Jammu and Kashmir (India). This book goes beyond other language descriptions in that Zemp persistently provides diachronic accounts

for functional divergences.

A Grammar of Purik Tibetan Routledge
Among Asian languages, Tibetan is second only to Chinese in the depth of its historical record, with texts dating back as far as the eighth and ninth centuries, written in an alphabetic script that preserves the contemporaneous phonological features of the language. The Classical Tibetan Language is the first comprehensive description of the Tibetan language and is distinctive in that it treats the classical Tibetan language on its own terms rather than by means of descriptive categories appropriate to other languages, as has traditionally been the case. Beyer presents the language as a medium of literary expression with great range, power, subtlety, and humor, not as an abstract object. He also deals comprehensively with a wide variety of linguistic phenomena as they are actually encountered in the classical texts, with numerous examples of idioms, common locutions, translation devices, neologisms, and dialectal variations.

This is a most useful accomplishment, and one that the student should take some pains to acquire. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. A Textbook in Classical Tibetan is the first comprehensive course book in the Classical Tibetan language written in

English. The textbook describes the grammar of pre-16th-century Classical Tibetan works for beginners and students of intermediate level. It is intended to cover the most essential topics that can be mastered within two semesters of an academic class. Classical Tibetan is a written Middle Tibetan language that has been in use in Tibet from the 9th century. Until the early 20th century it served all purposes, from administrative, to medical, to religious. Nowadays Classical Tibetan remains an important part of religious identity and services for communities also outside of cultural Tibet, foremost in India, Nepal, and Bhutan, but also elsewhere, most importantly in Europe, North America and Australia. The main body of the textbook consists of an introduction to the Tibetan script, eighteen lessons, and a reading section. Each lesson elucidates several grammatical topics which are followed by an exercise and a word list. The chapter readings contain four supplementary readings. In addition to the main parts of the textbook, a brief introduction to Tibetic languages provides linguistic context for the language taught in the textbook, whereas the chapter *Translations of Exercises and Readings* contains translations and explanatory notes to the exercises provided at the end of each lesson, as well as to the readings. *A Textbook in Classical Tibetan* is essential reading for both undergraduate and graduate students without any knowledge of Classical Tibetan, but also for those who would like to deepen their experience of the language by reading annotated excerpts from well-known pieces of Tibetan literature.

Cultural sections are also included in each chapter, as well as a range of exercises and drills to reinforce learning and help students internalize the new information. The book will be of particular interest to linguists and students with some knowledge of either standard

colloquial or literary Tibetan.
