Jane's Defence Industry Litres

The Global Arms Trade is a timely, comprehensive and in-depth study of this topic, a phenomenon which has continued to flourish despite the end of the Cold War and the preoccupation with global terrorism after 11 September 2001. It provides a clear description and analysis of the demand for, and supply of, modern weapons systems, and assess key issues of concern. This book will be especially useful to scholars, policy analysts, those in the arms industry, defence professionals, students of international relations and security studies, media professionals, government officials, and those generally interested in the arms trade.

Technonationalism and its Impact on Local Defense Industries Equinox Publishing
 Contents: (1) Introduction; (2) Background: Deepwater Missions; Origin, and Structure of Deepwater Acquisition Effort; Deepwater Assets Planned for Acquisition; Fleet Mix Analysis;

Examples of Deliveries of Deepwater Assets; Deepwater Acquisition Funding: Criticism of Deepwater Mgmt. in 2007; Coast Guard Reform Actions in 2007; Justice Dept. Invest.; (3) Oversight Issues for Congress: Management of Deepwater Programs in General: Cost Growth; Reporting of Costs and Planned Procurement Quantities; National Security Cutter; Sentinel Class Fast Response Cutter; 110/123-Foot Patrol Boat Modernization; Revolving Door and Potential for Conflicts of Interest; (4) Potential Options for Congress; (5) Legislative Activity in 111th Congress.

Bitzinger examines the phenomenon of attempted self-reliance in arms production within Asia, and assesses the extent of success in balancing this independence with the growing requirements of next-generation weapons systems. He analyzes China, India, Japan, South Korea, and Southeast Asia. The overarching question in the book is whether self-reliance is a strategically viable solution for development and manufacturing of arms. Given the ever-changing dynamics and increasing demand for sophisticated next-generation weaponry, will these countries be able to individually sustain their domestic defense industries and constantly update their technologies? This is the first

book to analyze arms production from a regional perspective.

NewSpot Routledge

This book examines the security dynamics of the Indian Ocean and the Western Pacific, concentrating upon an analysis and evaluation of the air power capabilities of the various powers active in the two regions. The volume is designed to help improve understanding of the heritage and contemporary challenges confronting the global community in the Indian Ocean and the Western Pacific, as well as to illuminate the policies of the various powers involved in the affairs of these regions, and the military capabilities that are available in support of those policies. The 16 individual chapters examine both the traditional and the non-traditional threats that confront the various Indian Ocean and Western Pacific powers, and assess the roles played by land-based and naval, fixed-wing and rotary-wing, manned and unmanned aircraft, as well as by offensively and defensively capable ballistic and cruise missiles in addressing these challenges. In doing so, the various chapters analyze and evaluate the air power doctrine, capabilities, deployment patterns, and missions of the respective states. In addition, they assess the future issues, challenges, and

responses involving air power as it, acting in concert with other military instruments, seeks to contribute to securing and promoting the interests of the state. This book will be of much interest to students of air power, strategic studies, Asian and Middle Eastern politics, and International Relations.

The Military Balance is The International Institute for Strategic Studies' annual assessment of the military capabilities and defence economics of 170 countries worldwide. It is an essential resource for those involved in security policymaking, analysis and research. The book is a region-by-region analysis of the major military and economic developments affecting defence and security policies, and the trade in weapons and other military equipment. Comprehensive tables detail major military training activities, UN and non-UN deployments, and give data on key equipment holdings and defence-expenditure trends over a ten year period. Key Features: Region-by-region analysis: major military issues affecting each region, changes in defence economics, weapons and other military equipment holdings and the trade in weapons and military equipment Comprehensive tables: key data on weapons and defence economics, such as comparisons of international defence expenditure and military manpower Analysis: significant military and economic developments Wallchart: detailed world map that shows current areas of conflict, with explanatory tables. This new edition of The Military Balance provides a unique compilation of data and information enabling the reader to access all required information from one single publication.

Hearing Before the Subcommittee on Coast Guard and Maritime Transportation of the Committee on Transportation and Infrastructure, House of Representatives, One Hundred Ninth Congress, First Session, June 21, 2005 DIANE Publishing

"With the United States facing two major revisionist powers, Russia and China, as well as additional security threats from North Korea, Iran, and jihadist terrorism, a critical advantage for the United States is its global network of alliances and strategic partners. As the 2018 National Defense Strategy states, 'Alliances and partnerships are crucial to our strategy, providing a durable asymmetric strategic advantage that no competitor or rival can match.' The advantage of having military allies and partners is enhanced by the core capacity of the American military having remained largely the same over the past decade, though the global security environment grew more complex and difficult during that time. In short, the United States needs allies and security partners. But the United States needs allies and partners that can pull their weight militarily if the country is going to be able to maintain a favorable balance of power in critical regions of the world.

The second edition of A Hard Look at Hard Power provides an in-depth examination of the overall strategic perspective, defense plans, budgets, and capabilities of seven key European and Asian allies, three frontline strategic partners, and NATO"--Publisher's web site.

On the Wings of Time Routledge

This book provides a comprehensive basics-to-advanced course in an aero-thermal science vital to the design of engines for either type of craft. The text classifies engines powering aircraft and single/multi-stage rockets, and derives performance parameters for both from basic aerodynamics and thermodynamics laws. Each type of engine is analyzed for optimum performance goals, and mission-appropriate engines selection is explained. Fundamentals of Aircraft and Rocket Propulsion provides information about and analyses of: thermodynamic cycles of shaft engines (piston, turboprop, turboshaft and propfan); jet engines (pulsejet, pulse detonation engine, ramjet, scramjet, turbojet and turbofan); chemical and non-chemical rocket engines; conceptual design of modular rocket engines (combustor, nozzle and turbopumps); and conceptual design of different modules of aero-engines in their design and off-design state. Aimed at graduate and final-year undergraduate students, this textbook provides a thorough grounding in the history and classification of both aircraft and rocket engines, important design features of all the engines detailed, and particular consideration of special aircraft such as unmanned aerial and short/vertical takeoff and landing aircraft. End-of-chapter exercises make this a valuable student resource, and the provision of a downloadable solutions manual will be of further benefit for course instructors.

Background, Oversight Issues, and Options for Congress Ireland Army, National Security and Defense Policy Handbook Volume 1 Strategic Information and Developments

Driven by dramatically reduced defense budgets and spiraling weapons systems costs, defense firms on both sides of the Atlantic are seeking increased access to each other's markets through collaborations and other ventures. This book examines the current European defense market, focusing on the countries with the largest defense industries in Europe. While European firms have become more competitive worldwide, they lag U.S. companies in overall size and U.S. firms seem to dominate sales in all defense market segments except land systems.

Every week CastleAsia's team of experienced analysts produces timely commentary on important political events in Indonesia. Senior executives from over 125 leading companies in Indonesia subscribe to these authoritative reports which cover changes in Indonesian politics and news highlights. "Indonesia: Political Pulse 2010" offers focused, common-sense analysis of the latest political and policy developments in Indonesia. The alert is written for business executives who need a more comprehensive understanding of Indonesia's political complexities and provides an insider's view of the facts behind the headlines. At the end of each year these concise briefs are compiled into a compact book that provides a detailed summary and trend line of important developments that is essential reading for business executives, scholars and anyone with a professional interest in one of the world's fastest-growing economies. The CastleAsia team is led by James Castle and Andri Manuwoto. Mr. Castle has been producing regular reports on Indonesia since 1980. Mr. Manuwoto has been CastleAsia's senior political and economic analyst since 2002.
