With a new decade of my life quickly approaching, it is time to write the next chapter. With my main focus in life being geared toward encouraging, empowering, and enriching the lives of others, I have neglected to fully apply these principles to my own life. I want to walk in my destiny and next chapter with boldness and courage. My faith will be the shield to protect me from fear, doubt, and defeat. My positivity keeps me excited, and I live in expectation every day! Many, O Lord my God, are thy wonderful works which thou hast done, and thy thoughts which are to us-ward: they cannot be reckoned up in order unto thee: if I would declare and speak of them, they are more than can be numbered. (Psalm 40:5)

This book develops a politico-ethical response to climate change that accounts for the novelty and uncertainty that it entails. This volume explores the ethical dimensions of climate change and posits that one must view it as a social construction intimately tied to political issues in order to understand and overcome this environmental challenge. To show how this ethos builds upon the need for new forms of responsiveness, Anfinson analyzes it in terms of four features: commitment, worldly sensitivity, political disposition, and practice. Each of these features is developed by putting four thinkers – Kierkegaard, Nietzsche, Schmitt, and Foucault respectively – in conversation with the literature on climate change. In doing so, this book shows how social habits and norms can be transformed through subjective thought and behavior in the context of a global environmental crisis. Presenting a multidisciplinary engagement with the politics, philosophy, and science of climate change, this book will be of great interest to students and scholars of climate change, environmental politics, environmental philosophy and environmental humanities.

Jacques Lacan's impact upon the theory and practice of psychoanalysis worldwide cannot be

underestimated. Lacanian Psychoanalysis looks at the current debates surrounding Lacanian practice and explores its place within historical, social and political contexts. The book argues that Lacan's elaboration of psychoanalytic theory is grounded in clinical practice and needs to be defined in relation to the four main traditions: psychiatry, psychology, psychotherapy and spirituality. As such topics of discussion include: the intersection between psychoanalysis and social transformation a new way through deadlocks of current Lacanian debate a new approach to 'clinical structures' of neurosis, perversion and psychosis Lacanian Psychoanalysis draws on Lacan's work to shed light on issues relevant to current therapeutic practice and as such it will be of great interest to students, trainees and practitioners of psychoanalysis, psychotherapy, counselling and other domains of personal and social change.
