Facial Plastic Surgery Photography Techniques for Facial Plastic Surgery With the adoption of digital photography on a wide scale and advent of new

technologies such as 3-D patient imaging, this is an area that is rapidly changing and of interest to both established and novice facial plastic surgeons. Most surgeons have limited experience with photography prior to starting a practice and need guidance in regard to selecting proper equipment, setting up a portrait studio, and obtaining high-quality standardized series of photos that can be used in presentations and publications. There are also a multitude of issues related to managing the vast amount of data that surgeons are now accumulating. Topics in this publication include: Camera and lens selection; Setting up a medical portrait studio; Photography consent and related legal issues; Pre- and post-operative portrait photography/standardized photos for various procedures; Pitfalls of nonstandardized photography; Morphing images to demonstrate potential surgical outcomes; Photoshop tools and tricks every facial plastic surgeon should know; Intraoperative photography; Digital asset management; Objective facial photograph analysis using imaging software; Evaluating symmetry and facial motion using 3D videography; Research and

clinical applications for 3D imaging.

Facial Plastic and Reconstructive Surgery Springer Science & Business Media Facial Plastic and Reconstructive Surgery is a comprehensive and practical guide to performing facial surgical procedures, and contains a balance of aesthetic and reconstructive procedures that mirrors typical European practice. It has arisen as an initiative of the European Academy of Facial Plastic Surgery (EAFPS), and in accordance with this status is a comprehensive book that gives a complete

update on the speciality as it is practised in Europe. The contributors have many years of clinical practice as well as research experience in facial plastic and reconstructive surgery. The book's practical 'how-to' style is amply supported with excellent line illustrations and colour photographs, and serves as a comprehensive reference for surgeons in clinical practice as well as in training. Each chapter is structured within a uniform framework to increase the accessibility of the text, and in this way improves the book's utility as a textbook for trainees.

Photography Techniques for Facial Plastic Surgery Elsevier Health Sciences Facial Plastic Surgeons continually strive to improve their patients' results and procedure experience. The material in this issue presents how to stay on "the cutting edge with innovative tools and techniques while performing efficacious, innovative, and relatively safe procedures. The topics include latest laser procedures, ultrasound treatment, platelet fibrin matrix gels, stem cell studies, and chemical peel techniques, among other innovations. These reviews of procedures, techniques, and devices should be considered in the light of

evidence based medicine. There may be limited data as to their potential outcomes and complications, as is frequently the case with innovations in Facial Plastic Surgery. A comprehensive overview of the emerging procedures and tools and discussion of outcomes, considerations, complications, and successes are presented here.

Otolaryngology--head and Neck Surgery

Elsevier Health Sciences

Evidence base in 2015 remains a subject of controversy for surgeons related to its application in surgery that cannot be approached as it is in medical evidence. Academic surgeons acknowledge that evidence base is necessary and private practitioners know it is woven into the fabric of their practice. Dr. Lisa Ishii and Dr. Travis Tollefson, editors of this publication, are at the forefront of clinical use of and research into evidence based surgery. The Oxford Centre system of evidence is used for this issue. Currently, evidence is dominant in the reconstructive aspect, more so than the cosmetic aspect; as such, this resource focuses on the nerve and microvascular procedures. Topics include Facial vascular anomalies,

Cleft lip and palate; Trauma; Facial reanimation; System reviews and meta-analyses; and Skin care, Laser treatments; and Rhinoplasty. Audience for this resource is facial plastic surgeons, otolaryngologists, plastic surgeons, laser therapists, dermatologists, and skin researchers.
