An Introduction to Thermogeology John Wiley & Sons

"A thought-provoking multinational tale . . . [that] will challenge your crime solving skills and teach you lots about the Scottish Highlands." —The St. Augustine Record From a writer who's been praised for her "intelligence, heart, wit" (Richard Russo, Pulitzer Prize-winning author of *Empire Falls*), *The Ice House* follows the beleaguered MacKinnons as they weather the possible loss of the family business, a serious medical diagnosis, and the slings and arrows of familial discord. Johnny MacKinnon might be on the verge of losing it all. The ice factory he married into, which he's run for decades, is facing devastating OSHA fines following a mysterious accident and may have to close. The only hope for Johnny's livelihood is that someone in the community saw something, but no one seems to be coming forward. He hasn't spoken to his son Corran back in Scotland since Corran's heroin addiction finally drove Johnny to the breaking point. And now, after a collapse on the factory floor, it appears Johnny may have a brain tumor. Johnny's been ordered to take it easy, but in some ways, he thinks, what's left to lose? This may be his last chance to bridge the gap with Corran—and to have any sort of relationship with the baby granddaughter he's never met. "Smith weaves their stories expertly, moving from Jacksonville to Scotland and back, from another disaster to a laugh-out-loud moment. Her tenderness toward her characters and subtle understanding of class differences in American society are reminiscent of such novelists as Richard Russo and Jennifer Egan, but this heartbreaking, heartwarming novel is an original."—Tampa Bay Times "A beautiful character-driven novel."—Indie Picks Magazine

The Lockheed Plant William Andrew

The Lockheed Plant in Marietta has been building many of the world's most legendary aircraft for the past 60 years--and that doesn't even count its service building B-29 bombers for the Bell Aircraft Company during World War II. Lockheed's six decades have seen the plant build jet bombers, like the B-47 Stratojet; the world's most dominant fighter jet (the F-22 Raptor); and the most vaunted cargo planes (C-130 Hercules, C-141 StarLifter, and C-5 Galaxy). In *Images of America: The Lockheed Plant*, readers will learn about those planes, the people who designed and assembled them, and the plant in which they were built. The striking images in this book were shared by Lockheed Martin and the Marietta Daily Journal and depict the plant from its construction through today.

Icy cold air conditioning is very common in many people's lives, but there was a time when this popular luxury did not exist. People had to think of other ways to keep cool on hot, humid days. It was also too hot in factories and hospitals, theaters and cars. Willis Carrier changed all that. Authors Alison and Stephen Eldridge explore how his love of science and fixing things led to a lifetime of adventure, research, and the discovery of air conditioning.
