Turn and Spin. The Turn and Spin tool allows you to create a 3D component by turning or spinning a cross section (an open vector) Turn. Turn takes a profile and turns (rotates) it around line from start point to end point to create a rounded symmetrical shape. Turn and Spin - Aspire V9.0 User Manual "Spin" refers to

the ball's rotation along its axis as it moves down the lane, and is largely dependent on how you release the ball. As the ball travels along the boards towards the pins, the rotating axis gradually tilts upwards, causing a hook delivery that enters the pin deck at an angle and increases your chance of a strike. [1] How to Spin a Bowling Ball: 13 Steps (with Pictures) - wikiHow  
Let yourself spin twice. When you are heading on your second turn whip your head around, spotting twice. As you slow, return your lift leg to the ground and relax both arms out to your side at mid chest height to stop completely. Gently bring your feet back to the ground and let your momentum and weight

slow you down naturally, coming to the ...How to Do a Double Turn: 9 Steps (with Pictures) - wikiHowSpin is a synonym of turn. Turn is a hypernym of spin. In context|transitive|lang=en terms the difference between spin and turn is that spin is {{context|transitive|lang=en}} to make yarn by twisting and winding fibers together while turn is {{context|transitive|lang=en}} to shape (something) symmetrically by rotating it against a stationary cutting tool, as on a lathe.What is the difference between spin and turn? | WikiDiffspin: how politics has the power to turn marketing on its head.
