While Excel remains ubiquitous in the business world, recent Microsoft feedback forums are full of requests to include Python as an Excel scripting language. In fact, it's the top feature requested. What makes this combination so compelling? In this hands-on guide, Felix Zumstein--creator of xlwings, a popular open source package for automating Excel with Python--shows experienced Excel users how to integrate these two worlds efficiently. Excel has added quite a few new capabilities over the past couple of years, but its automation language, VBA, stopped evolving a long time ago. Many Excel power users have already adopted Python for daily automation tasks. This guide gets you started. Use Python without extensive programming knowledge Get started with modern tools, including Jupyter notebooks and Visual Studio code Use pandas to acquire, clean, and analyze data and replace typical Excel calculations Automate tedious tasks like consolidation of Excel workbooks and production of Excel reports Use xlwings to build interactive Excel tools that use Python as a calculation engine Connect Excel to databases and CSV files and fetch data from the internet using Python code Use Python as a single tool to replace VBA, Power Query, and Power Pivot

Cet ouvrage présente les principaux problèmes rencontrés en recherche opérationnelle, tels que les flots maximaux, la gestion de tournées et des chemins optimaux, les programmes de transports et d'affectations ou la planification des stocks et des flux. Deux axes principaux sont proposés : une approche théorique simple qui détaille les fondamentaux mathématiques nécessaires à la compréhension et la résolution des principales difficultés rencontrées et une approche pratique

construite autour d'outils informatiques comme les tableurs, les gestionnaires de projets ou les simulateurs de flux. Outils d'optimisation pour la logistique est illustré d'exemples pratiques et théoriques utilisant des feuilles de calculs avancées. Il propose des outils d'ordonnancement et des applications liées à l'étude des flux ainsi que des exercices avec leurs solutions commentées pour chaque thème abordé.

Ce livre est destiné à vous montrer par la pratique comment concevoir des macros, nom donné aux programmes réalisés dans l'environnement Microsoft® Office et qui permettent de reproduire automatiquement et autant de fois que vous le souhaitez les manipulations récurrentes faites sur Excel. Cet ouvrage s'adresse à ceux qui n'ont aucune notion de programmation mais aussi aux développeurs qui souhaitent améliorer l'exécution de leur programme. Dans chacun des chapitres, des exemples variés sont détaillés, étape par étape, pour comprendre la logique de programmation et les erreurs à éviter. Après la présentation de l'environnement de travail utilisé pour réaliser les macros, vous découvrirez les concepts de base de la programmation sous VBA au travers des objets, de leurs méthodes et de leurs propriétés ; vous réaliserez ensuite votre premier programme grâce à l'Enregistreur de macros puis aborderez les éléments fondamentaux de la programmation VBA que sont les variables, les conditions et les boucles avant d'apprendre à " ; déboguer " votre programme pour corriger les erreurs d'exécution. La partie suivante aborde la notion de programmation modulaire et présente au travers d'exemples concrets les principales fonctions que vous serez amené à utiliser dans un programme comme la gestion des chaînes de caractères, la gestion des dates et heures, la gestion des classeurs et de leurs propriétés ; vous verrez également comment récupérer et travailler sur tout type de fichiers contenus dans les répertoires de votre ordinateur depuis un programme VBA. Pour les développeurs plus aguerris, vous apprendrez à optimiser votre programme grâce aux tableaux en mémoire, aux cellules nommées et à travailler avec des applications externes (envoi d'e-mail, création de fichier pdf, connexion à une base Access). Vous apprendrez enfin à créer des boîtes de dialogue personnalisées avec les contrôles courants (étiquette, zone de texte, bouton...) afin de développer des applications professionnelles et soignées.
