Christopher Shaw, the book's author said, "Through preferential postage rates for nonprofits the Postal Service facilitates civic involvement and a healthy democracy." Nader also noted, "Postal employees are fairly remunerated in an increasingly low-wage, low benefit 'Wal-Mart' economy." According to Nader, "Post offices serve as the heart of community life in neighborhoods and towns nationwide and the presence of postal workers on community streets make them safer, as the many beneficiaries of their frequently heroic efforts attest." "The lack of citizen-consumers' involvement in the recently passed postal reform legislation has highlighted the need for a public dialogue about the future of our postal system. The book provides a starting point for that conversation," stated Nader.

Individual preparedness is an important element of our nation's strategy for homeland security. This report adopts a scenario-driven approach that provides a rigorous way to identify actions-linked specifically to terrorist attacks-individuals can take to protect their health and safety. The result is an individual's strategy across four types of terrorist attacks-chemical, radiological, nuclear, and biological-consisting of overarching goals and simple and directive response and preparatory actions. The actions are appropriate regardless of likelihood of an attack, scale of attack, or government alert level; designed to be sensitive to potential variations; and defined in terms of simple rules that should be easy for individuals to adopt.

Twelve-term Texas Congressman, Presidential candidate, and #1 New York Times bestselling author Ron Paul returns with a highly provocative treatise about how we need to fundamentally change the way we think about America's broken education system in order to fix it. Whether or not you have children, you know that education is vital to the prosperity and future of our society. Yet our current system simply doesn't work. Parents feel increasingly powerless, and nearly half of Americans give our schools a grade of "C". Now, in his new book, Ron Paul attacks the problem head-on and provides a focused solution that centers on strong support for home schooling and the application of free market principles to the American education system. Examining the history of education in this country, Dr. Paul identifies where we've gone wrong, what we can do about it, and how we can change the way we think about education in order to provide a brighter future for Americans.

- ... release reputation bearers from the burden of being constantly mo- tored and reduce the likelihood of government or public supervision and control. • ... strengthen client trust, ease the recruitment and retention of capable employees and improve access to capital markets or attract investors. • ... legitimate positions of power and build up reserves of trust which - lowed companies and politicians - but also researchers and journalists - to put their

issues on the public agenda, present them credibly and mould them in their own interests. But a fear of loss is not the only reason for the steadily increasing importance of reputation in corporate management today (or more especially, in the minds of top management). Rather, the main reason is that corporate reputation has shifted from being an unquantifiable 'soft' factor to a measurable indicator in the sense of management control. And it is a variable that is obviously relevant to a company's

performance: recent studies by the European Centre for Reputation Studies and the Ludwig-Maximilians-Universität of Munich compared the stock market performance of a portfolio of the top 25% of reputation leaders (based on regular reputation measurements in the wider public) with that of the German DAX 30 stock market index. The results show that a portfolio consisting of reputation leaders 1 outperformed the stock market index by up to 45% – and with less risk. Fig. 1. Performance of 'reputation portfolios' vs.
