VILLEGAS BRAIDEN

African Americans : a Self-portrait

Jonathan Ball Publishers

"When I was performing, it didn't matter that I'd handed in a dodgy techniques assignment, or that Justin had slept with Mia instead of me. It didn't matter that my parents didn't want to know me, or that my brother had done a runner with Clara's money. With a bow in my hand I was able to eradicate anything I didn't

want to think about. But playing for Matt was different. The emotions were his, the secrets and desires his... I never felt closer to him than when I was playing his music." Music is Abby's lifeline. She dreams of being a concert violinist; escaping her tiny Australian home town- and a disastrous relationship with her childhood best friend Justin. At eighteen, she is given a chance at her dream: a place at the Melbourne Conservatorium. But when she falls for charismatic composer Matt, Abby discovers love for a person can be as consuming as love

for music. Their passionate relationship has her questioning everything she thought she ever wanted. Abby realises that to face the future, she must first confront the past; uncovering some uncomfortable truths about herself, her family and the passion that has shaped her life.

Capturing Sunlight, Book 1

Strelbytskyy Multimedia Publishing
New York Times bestselling poet and multi-platinum singer-songwriter Jewel explores her unconventional upbringing and extraordinary life in an inspirational memoir that covers her childhood to fame, marriage, and motherhood. When Jewel's first album, *Pieces of You*, topped the charts in 1995, her emotional voice and vulnerable performance were groundbreaking. Drawing comparisons to

Joan Baez and Joni Mitchell, a singer-songwriter of her kind had not emerged in decades. Now, with more than thirty million albums sold worldwide, Jewel tells the story of her life, and the lessons learned from her experience and her music. Living on a homestead in Alaska, Jewel learned to yodel at age five, and joined her parents' entertainment act, working in hotels, honky-tonks, and biker bars. Behind a strong-willed family life with an emphasis on music and artistic talent, however, there was also instability, abuse, and trauma. At age fifteen, she moved out and tasked herself with a mission: to see if she could avoid being the kind of statistic that her past indicated for her future. Soon after, she was accepted to the prestigious Interlochen Arts Academy in Michigan,

and there she began writing her own songs as a means of expressing herself and documenting her journey to find happiness. Jewel was eighteen and homeless in San Diego when a radio DJ aired a bootleg version of one of her songs and it was requested into the top-ten countdown, something unheard-of for an unsigned artist. By the time she was twenty-one, her debut had gone multiplatinum. There is much more to Jewel's story, though, one complicated by family legacies, by crippling fear and insecurity, and by the extraordinary circumstances in which she managed to flourish and find happiness despite these obstacles. Along her road of self-discovery, learning to redirect her fate, Jewel has become an iconic singer and songwriter. In *Never Broken* she reflects

on how she survived, and how writing songs, poetry, and prose has saved her life many times over. She writes lyrically about the natural wonders of Alaska, about pain and loss, about the healing power of motherhood, and about discovering her own identity years after the entire world had discovered the beauty of her songs.

Lessons in Regenerative Grazing

Atria/Emily Bestler Books

"A can't-put-it-down modern Western."

—Kirk Siegler, NPR Longlisted for the

PEN/ESPN Award for Literary Sports

Writing *The Last Cowboys* is Pulitzer

Prize-winning reporter John Branch's epic

tale of one American family struggling to

hold on to the fading vestiges of the Old

West. For generations, the Wrights of

southern Utah have raised cattle and

world-champion saddle-bronc riders—many call them the most successful rodeo family in history. Now they find themselves fighting to save their land and livelihood as the West is transformed by urbanization, battered by drought, and rearranged by public-land disputes. Could rodeo, of all things, be the answer? Written with great lyricism and filled with vivid scenes of heartache and broken bones, *The Last Cowboys* is a powerful testament to the grit and integrity that fuel the American Dream.

Skills & Ideas for Intensive Grazing, Sustainable Pastures, Healthy Soils, & Grassfed Livestock Flatiron Books

"Powerful . . . equal parts heartwarming and heart-wrenching. White is a gifted storyteller." —Washington Post From the

streets of Baltimore to the halls of the New Mexico Philharmonic, a musician shares his remarkable story in *I'm Possible*, an inspiring memoir of perseverance and possibility. Young Richard Antoine White and his mother don't have a key to a room or a house. Sometimes they have shelter, but they never have a place to call home. Still, they have each other, and Richard believes he can look after his mother, even as she struggles with alcoholism and sometimes disappears, sending Richard into loops of visiting familiar spots until he finds her again. And he always does—until one night, when he almost dies searching for her in the snow and is taken in by his adoptive grandparents. Living with his grandparents is an adjustment with rules

and routines, but when Richard joins band for something to do, he unexpectedly discovers a talent and a sense of purpose. Taking up the tuba feels like something he can do that belongs to him, and playing music is like a light going on in the dark. Soon Richard gains acceptance to the prestigious Baltimore School for the Arts, and he continues thriving in his musical studies at the Peabody Conservatory and beyond, even as he navigates racial and socioeconomic disparities as one of few Black students in his programs. With fierce determination, Richard pushes forward on his remarkable path, eventually securing a coveted spot in a symphony orchestra and becoming the first African American to earn a doctorate in music for tuba performance.

A professor, mentor, and motivational speaker, Richard now shares his extraordinary story—of dreaming big, impossible dreams and making them come true.

My Antonia A&C Black

In Bedford-Stuyvesant, Brooklyn, pianist Randy Weston and bassist Ahmed Abdul-Malik celebrated with song the revolutions spreading across Africa. In Ghana and South Africa, drummer Guy Warren and vocalist Sathima Bea Benjamin fused local musical forms with the dizzying innovations of modern jazz. These four were among hundreds of musicians in the 1950s and '60s who forged connections between jazz and Africa that definitively reshaped both their music and the world. Each artist identified in particular ways with Africa's

struggle for liberation and made music dedicated to, or inspired by, demands for independence and self-determination. That music was the wild, boundary-breaking exultation of modern jazz. The result was an abundance of conversation, collaboration, and tension between African and African American musicians during the era of decolonization. This collective biography demonstrates how modern Africa reshaped jazz, how modern jazz helped form a new African identity, and how musical convergences and crossings altered politics and culture on both continents. In a crucial moment when freedom electrified the African diaspora, these black artists sought one another out to create new modes of expression. Documenting individuals and places,

from Lagos to Chicago, from New York to Cape Town, Robin Kelley gives us a meditation on modernity: we see innovation not as an imposition from the West but rather as indigenous, multilingual, and messy, the result of innumerable exchanges across a breadth of cultures.

Patient First Second

This in-depth, multi-authored work originally published in France takes readers deep into traditional world of shepherds. Far from a nostalgic glimpse into a romanticized lifestyle, this book teaches how this sophisticated art and set of tangible skills has application in modern, North American range/livestock management. Through academic study and analysis and in-depth interviews with master shepherds readers will be

amazed by the deep connection between the nutritional need for animals to feed, the powers of observation used by the shepherds to effectively care for and manage large herds, and how the traditional moving of the animals is more fitting to many landscapes than even the most progressive rotational grazing and moveable fencing systems. The compilation carries enough weight to dazzle the most ardent student and enough real-world know-how to equip the 21st-century herdsman with new insights and philosophies.

Modern Jazz in Revolutionary Times

University of Chicago Press

Odyssey Works infiltrates the life of one person at a time to create a customtailored, life-altering performance. It may last for one day or a

few months and consists of experiences that blur the boundaries of life and art—is that subway mariachi band, used book of poetry, or meal with a new friend real or a part of the performance?

Central to this book is their 2013 performance for Rick Moody, author of *The Ice Storm*. His *Odyssey* lasted four months and included a fake children's book, introducing the themes of his performance, and a cello concert in a Saskatchewan prairie (which Moody almost missed after being stopped at customs with, suspiciously, no idea why he was traveling to Canada). The book includes Moody's interviews with *Odyssey Works*, an original short story by Amy Hempel, and six proposals for a new theory of making art.

Harvard University Press
 Heidi has captivated and enthralled readers since it was first published. Heidi, an orphan, has to move in with her stern, demanding grandfather in the Swiss Alps, and just as she begins to feel at home she finds herself back in a city caring for a sick relative. This classic coming of age story explores the balance between freedom and family responsibilities. The joyously triumphant resolution will stay with the reader for a long time.

The Art and Science of Shepherding W.

W. Norton & Company

On 21 March 1960, Robert Mangaliso Sobukwe, leader of the Pan Africanist Congress (PAC), led a mass defiance of South Africa's pass laws. He urged blacks to go the nearest police station

and demand arrest. When police opened fire on a peaceful crowd in the township of Sharpeville, 68 people were killed. The protest changed the course of South Africa's history. Afrikaner rule stiffened and black resistance to apartheid went underground. Sobukwe was jailed for three years on charges of incitement, but the government, fearful of his power, rushed through the 'Sobukwe Clause' to keep him in prison without trial. For the next six years, Sobukwe was kept in solitary confinement on Robben Island, the infamous apartheid prison near Cape Town. How Can Man Die Better is the story of this South African hero, but it also the story of the friendship between Robert Sobukwe and Benjamin Pogrund, former Deputy Editor of the Rand Daily Mail. Their joint experiences and debates

chart the course of a tyrannical regime and the growth of black resistance.

Songs of My People Chelsea Green Publishing

Abigail is happy on the island of Inisheer, but God has other plans for her! An angel asks Abigail to search for nine white deer in the woods across the sea. When she finds them, Abigail will also find the place where God wants her to be. Journey with Abigail as she listens to ONE angel, sails with TWO fishermen, finds THREE deer, then SIX, then more! Count with Abigail all the way to her true home. A board book for children ages 1 to 5. From Ancient Faith Publishing, your source for books on Orthodox Christianity.

Still GrazingThe Musical Journey of Hugh MasekelaCrown

Never Broken ABC-CLIO

Greg Judy was forced to liquidate his cow herd to pay debt in 1996. By the end of the following year he was dead broke and figured the family farm was history. A quote from Allan Nation, editor of The Stockman Grass Farmer magazine changed his whole view of ranching. Nation said, "Your sole purpose should be not to own the land, but to make a living from the land." Inspired by that approach, Judy started looking for idle, non-developed pastureland. By focusing

on leasing rather than owning land, his grazing operation grew from 40 stockers to 1100 head. By custom grazing on leased land he was able to pay his entire farm and home loan within three years. Today he has four farms and leases 12. No Risk Ranching, Custom Grazing on Leased Land describes how he found and managed his first and subsequent leases. He offers a detailed guide for other graziers to follow on how to find idle land to lease; calculate the cost of a lease; draft and write a land lease contract (with examples included); develop good water and portable fencing on leased land; promote wildlife and improve timber stands; keep accurate records and more. No Risk Ranching was written to help other graziers from making the same mistakes Judy made.

He writes, "I am convinced that in the USA our pastures are one of our most underutilized natural resources. I am not against land ownership. I just feel like it is an awful hardship on a new blooming grazing business."

The Last Cowboys: A Pioneer Family in the New West Acres USA

A system for regenerating land, storing carbon, and creating climate resilience. The concept of silvopasture challenges our notions of both modern agriculture and land use. For centuries, European settlers of North America have engaged in practices that separate the field from the forest, and even the food from the animal. Silvopasture systems integrate trees, animals, and forages in a whole-system approach that offers a number of benefits to the farmer and the

environment. Such a system not only offers the promise of ecological regeneration of the land, but also an economical livelihood and even the ability to farm extensively while buffering the effects of a changing climate: increased rainfall, longer droughts, and more intense storm events. Silvopasture, however, involves more than just allowing animals into the woodlot. It is intentional, steeped in careful observation skills and flexible to the dynamics of such a complex ecology. It requires a farmer who understands grassland ecology, forestry, and animal husbandry. The farmer needn't be an expert in all of these disciplines, but familiar enough with them to make decisions on a wide variety of time scales. A silvopasture system will

inevitably look different from year to year, and careful design coupled with creativity and visioning for the future are all part of the equation. In this book, farmer Steve Gabriel offers examples of diverse current systems that include: A black locust plantation for fence posts coupled with summer grazing pastures for cattle in central New York; Oxen and pigs used to clear forested land in New Hampshire to create space for new market gardens and orchards; Turkeys used for controlling pests and fertilization on a cider orchard and asparagus farm in New York; and Sheep that graze the understory of hybrid chestnut and hickory trees at a nut nursery in Minnesota. All of these examples share common goals, components, and philosophies. The

systems may take several years to establish, but the long-term benefits include healthier animals and soils, greater yields, and the capacity to sequester atmospheric carbon better than forests or grasslands alone. For all these reasons and more, Silvopasture offers farmers an innovative and ecological alternative to conventional grazing practice.

Tapping the Wisdom of French Herders
Wilder Pubns Limited

A New York Times Notable Book of the Year: “Unforgettable . . . Few have told such a compelling life-story as skillfully” (San Francisco Chronicle). In the summer of 1992, on the eve of an American tour, singer/songwriter Ben Watt, one half of the Billboard-topping pop duo Everything But The Girl, was taken to a London

hospital complaining of chest pain. As his condition worsened, doctors were baffled. He was eventually he was diagnosed with a rare life-threatening autoimmune disease called Churg-Strauss Syndrome. “To paraphrase Joseph Heller,” Ben says, “you know it’s something serious when they name it after two guys.” By the time he came home, two-and-half-months later, his ravaged body was forty-six pounds lighter, and he was missing most of his small intestine. “Unfold[ing] like a page-turning mystery” (The Los Angeles Times), and “told with great wit and without self-pity, Patient is a sobering look at how life can suddenly be transformed into a humbling vaudeville of tests, IV’s, catheters, and bedpans” (The New York Times Book Review).

Injecting a frankness and natural humility into his “funny, frightening, and piercingly vulnerable” (Interview) chronicle of a medical nightmare, Ben writes about his childhood, reflects on family, and his shared life with band member and partner, Tracey Thorn. The result is “a vivid, finely wrought look at having one’s future yanked away, and surviving physically and emotionally” (Dallas Morning Star-Telegram). Stargazing HarperCollins

My Antonia is a novel by an American writer Willa Cather. It is the final book of the "prairie trilogy" of novels, preceded by *O Pioneers!* and *The Song of the Lark*.

The novel tells the stories of an orphaned boy from Virginia, Jim Burden, and Antonia Shimerda, the daughter of Bohemian immigrants. They are both became pioneers and settled in Nebraska in the end of the 19th century. The first year in the very new place leaves strong impressions in both children, affecting them lifelong. The narrator and the main character of the novel *My Antonia*, Jim grows up in Black Hawk, Nebraska from age 10 Eventually, he becomes a successful lawyer and moves to New York City.

Farm Less, Profit More Broadway Books

"When Chris Hani, leader of the South African Communist Party and heir apparent to Nelson Mandela, was brutally slain in his driveway in April

1993, he left a shocked and grieving South Africa on the precipice of civil war. But to 12-year-old Lindiwe, it was the love of her life, her daddy, who had been shockingly ripped from her life. In this intimate and brutally honest memoir, 36-year-old Lindiwe remembers the years she shared with her loving father, and the toll that his untimely death took on the Hani family."--

I Got Your Back Penguin

Any listener knows the power of music to define a place, but few can describe the how or why of this phenomenon. In *Lonesome Roads and Streets of Dreams: Place, Mobility, and Race in Jazz of the 1930s and '40s*, Andrew Berish attempts to right this wrong, showcasing how American jazz defined a culture particularly preoccupied with place. By

analyzing both the performances and cultural context of leading jazz figures, including the many famous venues where they played, Berish bridges two dominant scholarly approaches to the genre, offering not only a new reading of swing era jazz but an entirely new framework for musical analysis in general, one that examines how the geographical realities of daily life can be transformed into musical sound.

Focusing on white bandleader Jan Garber, black bandleader Duke Ellington, white saxophonist Charlie Barnet, and black guitarist Charlie Christian, as well as traveling from Catalina Island to Manhattan to Oklahoma City, *Lonesome Roads and Streets of Dreams* depicts not only a geography of race but how this geography was disrupted, how these

musicians crossed physical and racial boundaries—from black to white, South to North, and rural to urban—and how they found expression for these movements in the insistent music they were creating.

Grazing management might seem simple: just put livestock in a pasture and let them eat their fill. However, as Sarah Flack explains in *The Art and Science of Grazing*, the pasture/livestock relationship is incredibly complex. If a

farmer doesn't pay close attention to how the animals are grazing, the resulting poorly managed grazing system can be harmful to the health of the livestock, pasture plants, and soils. Well-managed pastures can instead create healthier animals, a diverse and resilient pasture ecosystem, and other benefits. Flack delves deeply below the surface of "let the cows eat grass," demonstrating that grazing management is a sophisticated science that requires mastery of plant and animal physiology, animal behavior, and ecology. She also shows readers that applying grazing management science on a working farm is an art form that calls on grass farmers to be careful observers, excellent planners and record-keepers, skillful interpreters of their observations, and

creative troubleshooters. The Art and Science of Grazing will allow farmers to gain a solid understanding of the key principles of grazing management so they can both design and manage successful grazing systems. The book's unique approach presents information first from the perspective of pasture plants, and then from the livestock perspective—helping farmers understand both plant and animal needs before setting up a grazing system. This book is an essential guide for ruminant farmers who want to be able to create grazing systems that meet the needs of their livestock, pasture plants, soils, and the larger ecosystem. The book

discusses all the practical details that are critical for sustained success: how to set up a new system or improve existing systems; acreage calculations; paddock layout; fence and drinking water access; lanes and other grazing infrastructure; managing livestock movement and flow; soil fertility; seeding and reseeding pastures; and more. The author includes descriptions of real grazing systems working well on dairy, beef, goat, and sheep farms in different regions of North America. The book covers pasture requirements specific to organic farming, but will be of use to both organic and non-organic farms.
