Simcenter Femap - Siemens Digital Industries Software Introduction To Femap Siemens Plm Femap is an advanced engineering simulation application for creating, editing and importing/re-using mesh-centric finite element analysis models of complex products or systems. You can use Femap to model components, assemblies or systems and to determine the behavioral response for a given operating environment. Introduction To Femap Siemens Plm Community Femap Femap 101. The FEMAP 101 course provides the engineer who is new to Femap with a substantial introduction to the software, its structure, capabilities, and how to take advantage of its efficiency and strengths. For the engineer who already is using Femap, this course will fill in the grey areas, provide important time-saving knowledge, and guide them on their way to becoming a Femap expert. Siemens Learning Advantage: Femap 101 Siemens PLM Software's Femap™ system is a part of the Simcenter portfolio of

simulation products and facilitates an advanced engineering analysis environment. CAD-neutral and solver-neutral technology and cost-effective functionality have enabled Femap to become the world's most popular engineering analysis environment for Nastran users.
