House Books for Young  
Readers

From multi-award-winning  
Neil Gaiman comes a  
spectacularly silly, mind-  
bendingly clever,  
brilliantly bonkers

adventure – with lip-  
smackingly gorgeous  
illustrations by Chris  
Riddell. Mum's away.

Dad's in charge. There's  
no milk. So Dad saves the  
day by going to buy some.  
Really, that's all that  
happens. Very boring.  
YAAAAAAAAAWN. There  
are absolutely none of the  
following inside: GLOBBY  
GREEN ALIENS!  
INTERGALACTIC POLICE!  
PIRATES! And most

definitely NOT a time-

It's Milking Time Bullfrog  
Books

Following a day in the life  
of Clarabelle, one of 1,200  
cows on a Wisconsin dairy  
farm, we learn what it  
takes for a cow to  
produce life-giving milk  
and also by-products like  
electricity. The manure  
that Clarabelle and her

herdmates create not only generates electricity, it provides fresh bedding for cow stalls and fertilizer for the crops grown to feed the cows. Vibrant close-up photographs capture Clarabelle, her calf, and the youngest members of this multi-generational farm family, Josh and Sam, sharing the workload.

Jill Winger, creator of the award-winning blog The Prairie Homestead, introduces her debut The

Prairie Homestead Cookbook, including 100+ delicious, wholesome recipes made with fresh ingredients to bring the flavors and spirit of homestead cooking to any kitchen table. With a foreword by bestselling author Joel Salatin The Pioneer Woman Cooks meets 100 Days of Real Food, on the Wyoming prairie. While Jill produces much of her own food on her Wyoming ranch, you don't have to grow all—or even any—of your own food to cook and eat like a homesteader. Jill teaches

people how to make delicious traditional American comfort food recipes with whole ingredients and shows that you don't have to use obscure items to enjoy this lifestyle. And as a busy mother of three, Jill knows how to make recipes easy and delicious for all ages. "Jill takes you on an insightful and delicious journey of becoming a homesteader. This book is packed with so much easy to follow, practical, hands-on information about steps you can take towards

integrating homesteading into your life. It is packed full of exciting and mouth-watering recipes and heartwarming stories of her unique adventure into homesteading. These recipes are ones I know I will be using regularly in my kitchen." - Eve Kilcher  
These 109 recipes include her family's favorites, with maple-glazed pork chops, butternut Alfredo pasta, and browned butter skillet corn. Jill also shares 17 bonus recipes for homemade sauces, salt rubs, sour cream, and the like—staples that many

people are surprised to learn you can make yourself. Beyond these recipes, The Prairie Homestead Cookbook shares the tools and tips Jill has learned from life on the homestead, like how to churn your own butter, feed a family on a budget, and experience all the fulfilling satisfaction of a DIY lifestyle.

Before We Eat has been adopted by the USDA's Agriculture in the Classroom program. Before we eat, many people work very hard—planting grain, catching fish, tending farm animals, and filling crates of vegetables. With

vibrant illustrations by Caldecott Medalist Mary Azarian, this book reminds us what must happen before food gets to our tables to nourish our bodies and spirits. This expanded edition of Before We Eat includes back-of-book features about school gardens and the national farm-to-school movement. Fountas & Pinnell Level L Milk Astra Publishing House  
By the big red barn In the great green field, There was a pink pig Who was learning to squeal. There

were horses and sheep and goats and geese--and a jaunty old scarecrow leaning on his hoe. And they all lived together by the big red barn. In joyous and exuberant Pictures, Felicia Bond lovingly evokes Margaret Wise Brown's simple, rhythmic text about the cycle of a day on a farm, where a family of animals peacefully plays and sleeps. In the barnyard there are roosters and cows, horses and goats, and a pink piglet who is learning to squeal. Margaret Wise Brown's

lulling story about a day in the life of a barnyard is now available as a sturdy board book. Felicia Bond's atmospheric illustrations add to the tranquil simplicity of this story.

*The Cow Who Climbed a Tree* Turtleback

For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been

said about the evidence in question - the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action - from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our

genome. Why Evolution is True weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

*Fortunately, the Milk . . .*  
Tilbury House Publishers  
and Cadent Publishing

Milk and dairy products are a vital source of nutrition for many people. They also present livelihood opportunities for farm families, processors and other stakeholders in dairy value chains. Consumers, industry and governments

need up-to-date information on how milk and dairy products can contribute to human nutrition and how dairy-industry development can best contribute to increasing food security and alleviating poverty. This publication is unique in drawing together

information on nutrition, and dairy-industry development, providing a rich source of useful material on the role of dairy products in human nutrition and the way that investment in dairy-industry development has changed.
