Hazardous Goods Transport - ADR Express, UK Dangerous goods are subject to transport, workplace, storage, consumer and environment protection regulations, to prevent accidents to persons, property or the environment, to other goods or to the means of transport employed. To ensure consistency between all these regulatory systems, the United Nations has developed mechanisms for the harmonization of hazard classification criteria and communication tools, and for transport conditions for all modes for transport. Dangerous Goods - Transport - UNECE- 425 - 38.3.2.3 For the purposes of classification, the following definitions apply: Aggregate lithium content means the sum of the grams of lithium content contained by the cells comprising a

battery. Battery means two or more cells or batteries which are electrically connected together and fitted with devices necessary for use, for example, case, terminals, marking or protective devices. Recommendations on the TRANSPORT OF DANGEROUS GOODS At its ninth session (7 December 2018), the Committee adopted a set of amendments to the Model Regulations on the Transport of Dangerous Goods, concerning, inter alia, electric storage systems (including lithium batteries installed in cargo transport units and defective batteries), explosives, infectious waste of Category A, waste gas cartridges, harmonization with the 2018 Edition of IAEA's Regulations for the Safe Transport of Radioactive Material, listing of dangerous goods,
