Taken from the *The Philosophy of the Common Task and Essays*, this is a selection of the writings of the Russian mystic philosopher who had an influence on such contemporaries as Tolstoy and Solov'ev. His ideas, once thought far-fetched, are now found to have been prophetic. He lived at a time of intense intellectual controversy, artistic creativity and scientific development in Russia, while at the same time, there was growing world-wide militarism, civic strife and labour unrest. Fedorov was deeply distressed by this state of discord and looked for a means to develop brotherly feeling and ways to divert human energies from war towards dealing more effectively with such natural disasters as floods, droughts, earthquakes and hurricanes.

Valentine's Way SP Books

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Conservation of Ancient Sites on the Silk Road Rutgers University Press

Completely revised and updated, *Reaching Teens* provides communication strategies to effectively engage with today's teenagers. It is an invaluable resource for anyone who works with teens, pediatricians and other physicians, mental health care providers, social service workers, and educators. This groundbreaking multimedia resource combines video and text to show how recognizing, reinforcing, and building on inherent strengths supports positive youth development.

The Eisenstein Collection James Leasor Publishing

"Day By Day in Jewish Sports History covers every day of the year and includes thousands of names, records, events, and achievements of all kinds, from virtually every sport you can think of and some you can't, this book is the definitive picture of the role Jews have played in world sports - informative, enlightening, easy to read, and entertaining in a 432-page calendar book format including over 100 photographs." "It gives all the basic information and statistics, from baseball to figure skating, from boxing to track and field, from hockey to bowling, tennis, gymnastics, soccer, Olympic winners, including 160 sports quiz questions and sports trivia, American and international, amateur and professional."--BOOK JACKET.

My Adventurous Life and Times Getty Publications

Astronomy, perhaps the first of the sciences, was already well developed by the time of Christ. Seventeen centuries later, after Newton showed that the movements of the planets could be explained in terms of gravitation, it became the paradigm for the mathematical sciences. In the nineteenth century the analysis of star-light allowed astrophysicists to determine both the chemical composition and the radial velocities of celestial bodies, while the development of photography enabled distant objects invisible to the human eye, to be studied and measured in comfort. Technical developments during and since the Second World War have greatly enlarged the scope of the science by permitting the study of radiation. This is a fascinating introduction to the history of Western astronomy, from prehistoric times to the origins of astrophysics in the mid-nineteenth century. Historical records are first found in Babylon and Egypt, and after two millennia the arithmetical astronomy of the Babylonians merged with the Greek geometrical approach to culminate in the *Almagest* of Ptolemy. This legacy was transmitted to the Latin West via Islam, and led to Copernicus's claim that the Earth is in motion. In justifying this Kepler converted astronomy into a branch of dynamics, leading to Newton's universal law of gravity. The book concludes with eighteenth- and nineteenth-century applications of Newton's law, and the first explorations of the

universe of stars. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Abramovich Simon and Schuster

"This publication seeks to identify the relationship between freedom of expression and Internet privacy, assessing where they support or compete with each other in different circumstances. The book maps out the issues in the current regulatory landscape of Internet privacy from the viewpoint of freedom of expression. It provides an overview of legal protection, self-regulatory guidelines, normative challenges, and case studies relating to the topic. With this publication UNESCO aims to provide its Member States and other stakeholders, national and international, with a useful reference tool containing up-to-date and sharp information on emerging issues relevant to both developed and developing countries. Multiple stakeholders, preferably in dialogue, can use it in their own spheres of operation, adapting where appropriate from the range of experiences as recorded in these pages. The publication also supplies additional sources of reference for interested readers to use to further investigate each of the subjects highlighted. The publication explores a range of issues, such as: (1) threats to privacy that have developed through the Internet, (2) international legal standards on privacy and responses to these emerging issues, (3) complex intersections between the rights to privacy and freedom of expression, (4) UNESCO recommendations to states and corporations for better practice, (5) overview of literature, background material and tools on international and national policy and practice on privacy and freedom of expression on the Internet. In the coming years, UNESCO will specifically seek to disseminate information about good practices and international collaboration concerning the points of intersection between freedom of expression and privacy. Research on safeguarding the principle of freedom of expression in Internet policy across a range of issues will continue to be part of UNESCO's normative mandate and technical advice to stakeholders."--Publisher's description

War by Other Means University of California Office for

A comprehensive, up-to-date description of the properties and mechanisms of classical novae—and the first such effort in the subject since Payne-Gaposchkin's influential (but out of date) *The Galactic Novae*. Contributors present a balanced mix of observation and theory, and discuss information gathered at optical, radio, infrared, ultraviolet, and x-ray wavelengths. Discussion begins with an overview of the general properties of novae, then covers the accretion process in nova systems and the physics of the nova outburst. Classical novae are then placed in the broader family of cataclysmic variables. Final chapter is devoted to data on novae, including an atlas.

A Probe into the Realities That Are Hiding Inside "The Greatest Country in the World" Oxford University Press

This text provides a guide to understanding the mechanisms involved in the pathogenesis of musculoskeletal sepsis. It covers areas such as bone, cartilage, soft tissue, and biomaterial interaction in the face of infection.

An Illustrated Compendium of Sports History and the 150 Greatest Jewish Sports Stars Routledge

Provides brief descriptions of the careers of more than 240 Jewish athletes in numerous sports
Antiviral Drug Discovery and Development Simon and Schuster
 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer

warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Philosophy of the Common Task : Selected Works Da Capo Press

A skewering of the American underbelly by the New York Times bestselling author of *Seven Deadly Sins*, *A Funny Thing Happened on the Way to Heaven*, and *You're Making Me Hate You* The always-outspoken hard rock vocalist Corey Taylor begins *America 51* with a reflection on what his itinerant youth and frequent worldwide travels with his multiplatinum bands Slipknot and Stone Sour have taught him about what it means to be an American in an increasingly unstable world. He examines the way America sees itself, specifically with regard to the propaganda surrounding America's origins (like a heavy-metal Howard Zinn), while also celebrating the quirks and behavior that make a true-blue American. Taylor likewise takes a look at how the world views us, and his findings should come as a surprise to no one. But behind Taylor's ranting and raving is a thoughtful and intelligent consideration, and even a sadness, of what America is compared to what it could and should be. Expertly balancing humor, outrage, and disbelief, Taylor examines the rotting core of America, evaluating everything from politics and race relations to modern family dynamics, millennials, and "man buns." No element of what constitutes America is safe from his adept and scathing eye. Continuing the wave of moral outrage begun in *You're Making Me Hate You*, Taylor flawlessly skewers contemporary America in his own signature style.

Twelve Years a Slave iUniverse

The Eisenstein Collection brings together Sergei Eisenstein's key writings in one volume for the first time and includes new material not previously available. This edition covers the period from Eisenstein's dispute over the authorship of his first feature film, *The Strike*, in 1925 to his filmmaking and polemical activities during World War II, including his correspondence with Soviet leaders over *Ivan the Terrible*.

Jews and the Sporting Life KTAV Publishing House, Inc.

Volume XXIII of the distinguished annual *Studies in Contemporary Jewry* explores the role of sports in modern Jewish history. The centrality of sports in modern life--in popular and even in high culture, in economic life, in the media, in international and national politics, and in forging ethnic identities--can hardly be exaggerated, but in the field of Jewish studies this subject has been somewhat neglected, at least until recently. Students of American Jewish history, for example, often emphasize the role of sports in the Americanization of the immigrants, while students of Jewish nationalism pay closer attention to its appeal for the regeneration of the Jewish nation, as well as the creation of a new, healthy, Jewish body. The essays brought together in *Jews and the Sporting Life* expand the body of knowledge about the place sports occupied, and continue to occupy, in Jewish life. They examine the connection between sports and Jewish nationalism, particularly Zionism, and how organized Jewish sports have been an agent of nation-building. They consider the role of Jews as owners of sports teams, as amateur and professional athletes, and as fans and bettors. Other themes include sports and Jewish literature, and boxing as a sport that enabled Jewish men to prove their masculinity in a world that often stereotyped them as weak and "feminine." This volume concentrates on twentieth century developments in Israel, Europe, and the United States.

Reaching Teens UNESCO Publishing

When you think of famous Jews, sports may not be the first thing that comes to mind. But from Sandy Koufax to Mark Spitz, Jews have made tremendous contributions to the history of sports. The Horvitzs have created a logical ranking system that uses hard statistical evidence to identify the 100 greatest Jewish athletes of all time. Drawing on their academic backgrounds and expert sports knowledge, the authors bring us a proven scientific framework for objectively comparing athletes across various sports, including: Football, Baseball, Boxing, Tennis, Golf, plus many others! Features include: Little-known interviews with sports heroes of the past and present; Nearly 200 rare photographs throughout; Fascinating anecdotes that bring your favorite athletes to life.

Herbs To Help You Heal OUP Oxford

Neville Agnew, senior principal project specialist at the GCI, is the author of numerous publications in research chemistry and conservation, including (with two coauthors) the book *Cave Temples of Mogao: Art and History on the Silk Road*. --Book Jacket.

Power, Politics, and the Games Intellect Books

This book summarizes state-of-the-art antiviral drug design and discovery approaches starting from natural products to de novo design, and provides a timely update on recently approved antiviral drugs and compounds in advanced clinical development. Special attention is paid to viral infections with a high impact on the world population or highly relevant from the public health perspective (HIV, hepatitis C, influenza virus, etc.). In these chapters, limitations associated with adverse effects and emergence of drug resistance are discussed in detail. In addition to classical antiviral strategies, chapters will be dedicated to discuss the non-classical drug development strategies to block viral infection, for instance, allosteric inhibitors, covalent antiviral agents, or antiviral compounds targeting protein-protein interactions. Finally, current prospects for producing broad-spectrum antiviral inhibitors will be also addressed. The book is distinctive in providing the most recent update in the rapidly evolving field of antiviral therapeutics. Authoritative reviews are written by international scientists well known for their contributions in their topics of research, which makes this book suitable for researchers not only within the antiviral research community but also attractive to a broad audience in the drug discovery field. This book covers molecular structures and biochemical mechanisms mediating the antiviral effects, while discussing various ligand design

strategies, which include traditional medicinal chemistry, computational chemistry, and chemical biology approaches. The book provides a comprehensive review of antiviral drug discovery and development approaches, particularly focusing on current innovations and future trends.

Strength-based, Trauma-sensitive, Resilience-building Communication Strategies Rooted in Positive Youth Development Springer

Did you know that in the United States alone, more than one in four children live in a home without a father? When Alec Lacey recognized this crisis and launched his parenting podcast *2018*, his mission was simple: to give dads an opportunity to encourage others, by sharing the experiences and wisdom they've gained during their respective journeys. A few years and hundreds of interviews later--including with many high-profile dads from sports, media, politics, the military, and other industries--Alec has curated a rich collection of anecdotes that provides guidance and inspiration on a wide array of topics, including but not limited to Advice for about-to-be or new dads Finance and education Discipline Dating and social life Faith, values, and service Fitness and health, for both children and fathers How to be a fatherhood ambassador First Class Fatherhood will engage the reader with thought-provoking ideas and realistic solutions from fathers who have been through it all. Alec believes that being a father is the most important role a man can play in the game of life. And his hope is that this book will help change the narrative of fatherhood and family life, and greatly reduce the number of children growing up without a father in the home.

The History of Astronomy: A Very Short Introduction Seagull Books London Limited

Roman Abramovich, the billionaire owner of Chelsea FC, was a penniless orphan who rose from the ashes of Soviet Russia to become one of the richest and most powerful men in the world. His fascinating life story has been shrouded in mystery - until now. Journalists Dominic Midgley and Chris Hutchins get to grips with the Russian boss of Chelsea FC, who has revolutionised English football since he bought the club in the summer of 2003, since when it has won two Premiership titles. Every aspect of his past, present and future is examined - his upbringing, including his Jewish background, the friendships that helped him break into the top ranks of the Kremlin, his leading role in the rise of the oligarchs in Russia, the business deals that made him a fortune in less than ten years, and the ambition that promises to make him as big a name in the West as in his homeland. Using exhaustive primary research, the authors uncover the exclusive stories behind the billions Abramovich made in Russia as Western-style capitalism was introduced by President Putin. They also investigate his reasons for investing part of it in a fashionable London football club. The rise of Roman Abramovich from provincial orphan to one of the most powerful men in Russia is a story that has all the ingredients of a thriller: risk-taking, courage, shrewdness, ruthlessness and, above all, a subtle and manipulative charm. An incredible story' - Mail on Sunday; 'Well researched and fluently written' - The Times; 'Draws a picture of a man of immense ruthlessness, nerve and charm . . . offers a Vanity Fair of Russian oligarchy' - The Spectator; A superb insight into the Chelsea boss . . . a must read for both football fans and business tycoons' - Sunday Business Post; 'A well-researched investigation into the life and times of Chelsea's owner' - World Soccer; 'The first sustained effort to uncover the making of Chelsea's oligarch' - Guardian; 'Authors Dominic Midgley and Chris Hutchins go to commendable lengths to tell the story' - Sunday Times; 'Where this book sets itself apart is in its quest to discover Abramovich's true identity. Interviews with his childhood friends, neighbours and teachers in Russia offer an original perspective on the man while access to the informed such as Boris Berezovsky, his one-time mentor, provides a picture of a canny dealmaker and consummate politician' - The Times; 'Most fascinating account . . . should be read by anyone not just with an interest in sport but also in business and in politics' - Press and Journal.

MEDIA Amer Academy of Orthopaedic

The Cinema of Eisenstein is David Bordwell's comprehensive analysis of the films of Sergei Eisenstein, arguably the key figure in the entire history of film. The director of such classics as *Potemkin*, *Ivan the Terrible*, *October*, *Strike*, and *Alexander Nevsky*, Eisenstein theorized montage, presented Soviet realism to the world, and mastered the concept of film epic. Comprehensive, authoritative, and illustrated throughout, this classic work deserves to be on the shelf of every serious student of cinema.

Emancipation Through Muscles Arms & Armour

At the end of World War II, J. Robert Oppenheimer was one of America's preeminent physicists. For his work as director of the Manhattan Project, he was awarded the Medal for Merit, the highest honor the U.S. government can bestow on a civilian. Yet, in 1953, Oppenheimer was denied security clearance amidst allegations that he was "more probably than not" an "agent of the Soviet Union." Determined to clear his name, he insisted on a hearing before the Atomic Energy Commission's Personnel Security Board. In the Matter of J. Robert Oppenheimer contains an edited and annotated transcript of the 1954 hearing, as well as the various reports resulting from it. Drawing on recently declassified FBI files, Richard Polenberg's introductory and concluding essays situate the hearing in the Cold War period, and his thoughtful analysis helps explain why the hearing was held, why it turned out as it did, and what that result meant, both for Oppenheimer and for the United States. Among the forty witnesses who testified were many who had played vitally important roles in the making of U.S. nuclear policy: Enrico Fermi, Hans Bethe, Edward Teller, Vannevar Bush, George F. Kennan, and Oppenheimer himself. The hearing provides valuable insights into the development of the atomic bomb and the postwar debate among scientists over the hydrogen bomb, the conflict between the foreign policy and military establishments over national defense, and the controversy over the proper standards to apply in assessing an individual's loyalty. It reveals as well the fears and anxieties that plagued America during the Cold War era.
