The Sense of Wonder
 Hassell Street Press
 First published a half-

century ago, Rachel Carson's award-winning *The Sense of Wonder* remains the classic guide to introducing children to the marvels of nature. In 1955, acclaimed conservationist Rachel Carson—author of *Silent Spring*—began work on an essay that she would come to consider one of her life's most important projects. Her grandnephew, Roger Christie, had visited Carson that summer at her cottage in Maine, and together they had wandered the surrounding woods and tide pools. Teaching Roger about the natural wonders around them, Carson began to see them anew herself, and wanted to relate that same magical feeling to others who might hope to introduce a child to the beauty of nature. "If a child is to keep alive his inborn sense of wonder," writes Carson, "he needs the companionship of at least one adult who can share it, rediscovering with him the joy, excitement and mystery of the world we live in." Now available in paperback, *The Sense of Wonder* is a timeless volume that will be passed on from generation to generation, as treasured as the

memory of an early-morning walk when the song of a whippoorwill was heard as if for the first time. Featuring serene color photographs from renowned photographer Nick Kelsh, "this beautifully illustrated edition makes a fine gift for new and prospective mothers and fathers" (Gregory McNamee), and helps us all to tap into the extraordinary power of the natural world. *Old Age from Antiquity to Post-Modernity* Cambridge University Press This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. Hassell Street Press
Presenting an analysis of the ethical dilemmas facing youth workers in their day-to-day practice, this text offers an insight into both the perennial dilemmas of youth work

practice, and the challenges faced.

Drawing and building on the existing literature, this *Element* explores the interesting and challenging philosophical terrain where issues regarding cooperation, commitment, and control intersect. Section 1 discusses interpersonal and intrapersonal Prisoner's Dilemma situations, and the possibility of a set of unrestrained choices adding up in a way that is problematic relative to the concerns of the choosers involved. Section 2 focuses on the role of precommitment devices in rational choice. Section 3 considers the role of resoluteness in rational choice and action. And Section 4 delves into some related complications concerning the nature of actions and the nature of intentions.

The product of a collaboration of over 15 years, this volume is unique because it focuses on convex functions themselves, rather than on convex analysis. The authors explore the various classes and their characteristics, treating

convex functions in both Euclidean and Banach spaces.

Based on themes such as status and welfare, *Old Age from Antiquity to Post-Modernity* examines the role of the elderly in history. This empirical study represents a substantial contribution to both the historical understanding of old age in past societies as well as the discussion of the contribution of post-modernism to historical scholarship.
