 Risk & Opportunity
 Risk and Opportunity is the new addition in ISO 9001:2015 standard. A new risk based thinking (RBT) concept is introduced in the standard which requires an organization to identify risks and opportunities so that QMS can achieve desired results, positive effects can be enhanced, Undesired effects can be prevented or reduced and Improvement can be achieved.
 Risk and Opportunity in ISO 9001 – Effvity
 This is to be expected, based on the way the ISO 9001:2015 update treats risk and opportunity. Because the standard does not create a new set of structures or requirements for addressing risk and opportunity, instead opting for an integration of risk-based thinking into the current system, the benefits will largely remain the same.
