The Trouble With Big Data Internet Dating King's Diaries

Paid work is absolutely central to the culture and politics of

capitalist societies, yet today's work-centred world is becoming increasingly hostile to the human need for autonomy, spontaneity and community. The grim reality of a society in which some are overworked, whilst others are condemned to intermittent work and unemployment, is progressively more difficult to tolerate. In this thought-provoking book, David Frayne questions the central place of work in mainstream political visions of the future, laying bare the ways in which economic demands colonise our lives and priorities. Drawing on his original research into the lives of people who are actively resisting nine-to-five employment, Frayne asks what motivates these people to disconnect from work, whether or not their resistance is futile, and whether they might have the capacity to inspire an alternative form of development, based on a reduction and social redistribution of work. A crucial dissection of the work-centred nature of modern society and emerging resistance to it, *The Refusal of Work* is a bold call for a more humane and sustainable vision of social progress.

This book is available as open access through the Bloomsbury Open programme and is available on www.bloomsburycollections.com. It is funded by Trinity College Dublin, DARIAH-EU and the European Commission. This book explores the challenges society faces with big data, through the lens of culture rather than social, political or economic trends, as demonstrated in the words we use, the values that underpin our interactions, and the biases and assumptions that drive us. Focusing on areas such as data and language, data and sensemaking, data and power, data and invisibility, and big data aggregation, it demonstrates that humanities research, focussing

on cultural rather than social, political or economic frames of reference for viewing technology, resists mass datafication for a reason, and that those very reasons can be instructive for the critical observation of big data research and innovation. *The Writings of Thomas Paine* Cambridge University Press
Hidden somewhere, in nearly every major city in the world, is an underground seduction lair. And in these lairs, men trade the most devastatingly effective techniques ever invented to charm women. This is not fiction. These men really exist. They live together in houses known as Projects. And Neil Strauss, the bestselling author and journalist, spent two years living among them, using the pseudonym Style to protect his real-life identity. The result is one of the most explosive and controversial books of the last decade—guaranteed to change the lives of men and transform the way women understand the opposite sex forever. On his journey from AFC (average frustrated chump) to PUA (pick-up artist) to PUG (pick-up guru), Strauss not only shares scores of original seduction techniques but also has unforgettable encounters with the likes of Tom Cruise, Britney Spears, Paris Hilton, Heidi Fleiss, and Courtney Love. And then things really start to get strange—and passions lead to betrayals lead to violence. *The Game* is the story of one man's transformation from frog to prince to prisoner in the most unforgettable book of this generation.

A foundational work on historical and social studies of quantification What accounts for the prestige of quantitative methods? The usual answer is that quantification is desirable in social investigation as a result of its successes in science. Trust in

Numbers questions whether such success in the study of stars, molecules, or cells should be an attractive model for research on human societies, and examines why the natural sciences are highly quantitative in the first place. Theodore Porter argues that a better understanding of the attractions of quantification in business, government, and social research brings a fresh perspective to its role in psychology, physics, and medicine. Quantitative rigor is not inherent in science but arises from political and social pressures, and objectivity derives its impetus from cultural contexts. In a new preface, the author sheds light on the current infatuation with quantitative methods, particularly at the intersection of science and bureaucracy.

Professor Richard Wiseman offers many quick and practical ways to improve your life gleaned from today's cutting edge-science, and in the process gives a psychologist's myth-busting response to the self-help movement. Whether you're looking to be more decisive in your life, to find a new job, or simply to be happier, the chances are that this book has the answers you need. For years, the self-help industry has failed the public, often promoting exercises that destroy motivation, ruin relationships, increase anxiety and reduce creativity. Here, psychologist Richard Wiseman exposes these modern-day mind myths and

presents a fresh approach to change that helps people achieve their aims and ambitions in minutes not months. From mood to memory, persuasion to procrastination, resilience to relationships, Wiseman outlines the research supporting this new science of rapid change and describes how these quirky techniques can be incorporated into everyday life. • Find out why putting a pencil between your teeth instantly makes you feel happier • Discover why even thinking about going to the gym can help you keep in shape • Learn how putting just one thing in your wallet will improve the chance of it being returned if lost • Discover why writing down your goals is more effective than visualizing them • Find out why retail therapy doesn't work to improve mood and what does

"Aloha" is at once the most significant and the most misunderstood word in the Indigenous Hawaiian lexicon. For K&257;naka Maoli people, the concept of "aloha" is a representation and articulation of their identity, despite its misappropriation and commandeering by non-Native audiences in the form of things like the "hula girl" of popular culture. Considering the way aloha is embodied, performed, and interpreted in Native Hawaiian literature, music, plays, dance, drag performance, and even ghost tours from the twentieth century to the present, Stephanie Nohelani Teves shows that misunderstanding of the concept by non-Native audiences has not prevented the K&257;naka Maoli from using it to create and empower community and articulate its distinct Indigenous

meaning. While Native Hawaiian artists, activists, scholars, and other performers have labored to educate diverse publics about the complexity of Indigenous Hawaiian identity, ongoing acts of violence against Indigenous communities have undermined these efforts. In this multidisciplinary work, Teves argues that Indigenous peoples must continue to embrace the performance of their identities in the face of this violence in order to challenge settler-colonialism and its efforts to contain and commodify Hawaiian Indigeneity.

In *Travesties and Transgressions*, David Cressy examines how the orderly, Protestant, and hierarchical society of post-Reformation England coped with the cultural challenges posed by beliefs and events outside the social norm. He uses a series of linked stories and close readings of local texts and narratives to investigate unorthodox happenings such as bestiality and monstrous births, seduction and abortion, excommunication and irregular burial, nakedness and cross-dressing. Each story, and the reaction it generated, exposes the strains and stresses of its local time and circumstances. The reigns of Elizabeth, James, and Charles I were witness to endless religious disputes, tussles for power within the aristocracy, and arguments galore about the behaviour and beliefs of common people. Questions raised by 'unnatural' episodes were debated throughout society at local and national levels, and engaged the attention of the magistrates, the bishops, the crown, and the court. The resolution of such questions was not taken lightly in a world in which God and the devil still fought for people's souls.

Good Economics for Hard Times Simon and Schuster

Computer mediated interpersonal interactions are defining our daily lives as we know it. Studying this phenomenon with various methodologies, across different cultures and traditions is a crucial component in understanding social ties. This book brings together articles that approach online dating from a range of cultural and critical perspectives. The research decodes the level

of engagement and manner of approaching online dating in various countries such as France, India, China, Turkey, Cuba, USA and Portugal. Mapping the history of dating and courtship shows the evolution of these practices even before the introduction of the online medium and traces parallels and differences between old and new traditions.

The Pyramids and the Pentagon Simon and Schuster

A fresh perspective on the Ballets Russes, focusing on relations between music, dance and the cultural politics of belle-époque Paris.

What do you do when your marriage is so unhappy that you begin to fantasize about your husband's funeral? That's how bad it got for Alisa Bowman. . . So she launched a last-ditch effort to save her marriage. Project: Happily Ever After is her fearlessly honest and humorous account of how she went from being a "divorce daydreamer" to renewing her wedding vows -- and all of the steps in between. From bikini waxes to erotica, romance instruction manuals to second honeymoons, the silent treatment to power struggles, she goes where many marriage-improvement gurus have feared to tread. Equal parts funny, poignant, and most importantly, useful, Bowman's story will give other miserably-married folks courage and hope. And in addition to telling her own story, she packs straightforward prescriptive guidance, including a "10-Step Marital Improvement Guide." Readers will laugh. They'll cry. And they can start on the road toward their own happy ending!

Magic Bullets Harper Collins

A bright, talented junior at Catamount College in the druggy 1970s, Gillian Brauer strives to realise more than a poet's craft in her workshop with the charismatic, anti-establishment professor Andre Harrow. For Gillian has fallen in love - with Harrow, with his aesthetic sensibility and bohemian lifestyle, with his secluded cottage, with the mystique of his imposing, russet-haired French wife, Dorcas. A sculptress, Dorcas has outraged the campus and alumnae with the crude, primitive, larger than life-sized wooden totems that she has exhibited under the motto 'We are beasts and this is our consolation'. As if mesmerised, Gillian enters the rarefied world of the Harrows. She is special, even though she knows her classmates have preceded her here. She is helpless. She is powerful. And she will learn in full the meaning of Dorcas' provocative motto . . .

But Is It Art? PublicAffairs

A landmark work from the author of *Orientalism* that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from *Mansfield Park* to *Heart of Darkness* and *Aida*. Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, *Culture and Imperialism* reopens the dialogue between literature and the life of its time.
