The Allegory of the Cave, or Plato's Cave, was presented by the Greek philosopher Plato in his work Republic (514a-520a) to compare "the effect of education (παίδεια) and the lack of it on our nature". It is written as a dialogue between Plato's brother Glaucon and his mentor Socrates, narrated by the latter. The allegory is presented after the analogy of the sun (508b-509c) and the analogy of the divided line (509d-511e). All three are characterized in relation to dialectic at the end of Books VII and VIII (531d-534e). Plato has Socrates describe a group of people who have lived chained to the wall of a cave all of their lives, facing a blank wall. The people watch shadows projected on the wall from objects passing in front of a fire behind them, and give names to these shadows. The shadows are the prisoners' reality.

In this international and interdisciplinary collection of critical essays, distinguished contributors examine a crucial premise of traditional readings of Plato's dialogues: that Plato's own doctrines and arguments can be read off the statements made in the dialogues by Socrates and other leading characters. The authors argue in general and with reference to specific dialogues, that no character should be taken to be Plato's mouthpiece. This is essential reading for students and scholars of Plato. *A Commentary on Book I of More's Utopia Showing Its Relation to Plato's Republic* Cambridge University Press

Colin Starnes radical interpretation of the long-recognized affinity of Thomas More's Utopia and Plato's Republic confirms the intrinsic links between the two works. Through commentary on More's own introduction to Book I, the author shows the Republic is everywhere present as the model of the "best commonwealth," which More must first discredit as the root cause of the dreadful evils in the collapsing political situation of sixteenth-century Europe. Starnes demonstrates how More, once having shorn the Republic of what was applicable to a society that had for a thousand years accepted and been moved by the Christian revelation, then "Christianized" it to arrive at one of the earliest and most coherent accounts of the ideal modern state: the description of Utopia in Book II. Knowing this radically new view of a long-recognized position may be questioned, the author has included a criticism and appreciation of the other major lines of interpretation concerning More's Utopia.

If we are to understand why Plato had a theory of Forms, we must explain, firstly, why he thought it necessary to depart from the ontology of the Socratic dialogues; secondly, why he then posited the existence of entities that have the characteristics that he ascribes to Forms (entities that are 'unmixed', 'unchanging', 'in every way being' and so on); and thirdly, why Plato took this course when other philosophers have not done so (and even he himself and his immediate pupils were later

to modify or abandon the theory). In this study, Robert William Jordan discovers an answer to these questions where we might expect to find one - namely in the arguments Plato gives us in favour of the hypothesis that there are Forms. These arguments, on analysis, reveal not just a concern with the nature of knowledge and explanation, but an interest in the analysis of the apparent contradictions that Plato in his middle period thought to be presented to the intellect by the sensible world. These contradictions, he then thought, could not be resolved except by those with knowledge of the Forms.

This book intersperses philosophical commentary with a new translation of the whole dialogue to present an original case for thinking that Plato's aim in the *Theaetetus* is to further the cause of his own anti-empiricist theory of knowledge by testing -- and destroying -- a series of empiricist theories of knowledge.

Scholars of Plato are divided between those who emphasize the literature of the dialogues and those who emphasize the argument of the dialogues, and between those who see a development in the thought of the dialogues and those who do not. In this important book Russell Dancy focuses on the arguments and defends a developmental picture. He explains the Theory of Forms of the *Phaedo* and *Symposium* as an outgrowth of the quest for definitions canvassed in the Socratic dialogues, by constructing a Theory of Definition for the Socratic dialogues based on the refutations of definitions in those dialogues, and showing how that theory is mirrored in the Theory of Forms. His discussion, notable for both its clarity and its meticulous scholarship, ranges in detail over a number of Plato's early and middle dialogues, and will be of interest to readers in Plato studies and in ancient philosophy more generally.

**Studies Inspired by Pauline Allen** Rowman & Littlefield Publishers

This book consists of Gregory Vlastos' studies on a variety of themes in Plato's metaphysics, epistemology, ethics, and social philosophy. Although many of the essays have appeared in various philosophical and classical journals or symposia, new in the volume are two major studies. One is on Plato's theory of love, exploring its metaphysical dimension and its far-reaching implications for personal and political relations. The other centers on semantic and logical problems in the *Sophist*; it offers solutions to crucial difficulties in this fundamental Platonic work. In these essays the author presents ideas which are likely to provoke comment and may be discussed as vigorously in scholarly journals as has some of his earlier work. The other papers, some of them extensively revised, comprise virtually all the author's published work on Plato, with the exception of a few papers easily accessible elsewhere. This second edition includes three additional essays and extensive notes that were not included in the original edition.

Kant and Moral Theory The historian Herodotus gives the anecdote of Darius, King of Persia, who summoned the Greeks and asked them if they would be willing to eat the bodies of their dead fathers. They replied they would not for any money in the world. Later, Darius asked some Indians of the tribe called Callatae, who do eat their dead parents' bodies, if they would ever consider burning the bodies, as was the custom among Greeks. "One can see by this what custom can do" writes Herodotus. He draws the conclusion that this story vindicates the view some acts may be right for some and wrong for others, depending on their individual conceptions of morality. The Sophists were also associated with relativistic thinking, notably Protagoras who asserts that "man is the measure of all things". However, this view was quite uncommon and moral relativism hardly flourished, as Plato and Aristotle both defended forms of moral absolutism. Ancient Greek philosophers acknowledged moral diversity, but more often under the form of moral scepticism, which states that there is no moral knowledge (rather than moral truth is relative to a culture).

This volume presents an overview of various aspects of the quite diverse philosophical developments that have taken place in Ireland, both past and present. With contributions by some of the leading thinkers in their field, this book is based, although not exclusively so, on papers given at a conference held at Maynooth University, Ireland, in 2012 to celebrate the 50th anniversary of the Irish Philosophical Society. Rather than treating philosophy in Ireland in a systematic and comprehensive way, the contributions give the reader a glimpse of the state of philosophy in Ireland today. They show that, from the beginning, and throughout the centuries, the philosophical tradition in Ireland has been characterised by dialogue. This dialogical aspect of Irish philosophising remains alive today. The book demonstrates how this engagement encompasses the past as interlocutor, as well as interactions with the philosophical debates that take place outside of Ireland, both on the continent and within the Anglo-American tradition. The volume puts forward a strong argument that the future of philosophy in Ireland should not move towards an ever-greater specialisation, thereby resulting in the isolation and impoverishment of individual philosophical traditions. Rather, it argues that the different traditions should remain, and should engage in dialogue with each other, with their philosophical and intellectual past, and stay steadfastly connected with the society around them.
