 How an Engineering Case Study Report is Organised. A case study analysis is

usually presented as a report and will therefore contain many of the features and structure of reports in general. This section will briefly describe each section, its purpose and structure.
 How an Engineering Case Study Report is Organised | UNSW ...
 Each case study includes a description of the objectives, the experimental facility, and the experimental procedure used to obtain the data. When possible, photos and video clips are used to show the facility and experimental procedure.
 Mechanical Engineering Case Studies
 Case study examples We have collected together some examples of industrial activity in the area of sustainability and have begun compiling them into a set of case studies aiming to stimulate others. There are many examples of changing industrial practice.
 Case study examples - Institute for Manufacturing
 A case study is a report of an event, problem or

activity. A case study format usually contains a hypothetical or real situation. It would also include any intricacies you might come across in the workplace. You can use a case study to help you see how these intricacies might affect decisions.
