Intended for student use at home as a supplement to schoolwork or at school as a phonics text, this workbook presents the most common and regular sounds of vowels. The short vowels are presented first. The lesson for each vowel consists of six pages of exercises. On the first page, the vowel sound is introduced by a cartoon. On the second and third pages, students learn to recognize the short vowel sounds by saying the names of pictures and completing short vowel words. The remaining three pages of the lesson provide practice in using the vowel sound in context. The second half of the workbook deals with long vowel sounds, which are presented in the same manner as the short vowel sounds, except that the different spellings for each of the vowel sounds are treated individually to aid in the students' recognition of the long vowels. There are three reviews in the workbook: one for the short vowels, one for the long vowels, and a general review. (MG)

influences their manifestation. Drawing upon seminal works in the fields of language contact in general, Spanish in contact with indigenous and regional languages, and laboratory approaches tied to the languages in question, the volume's contents employ acoustic and quantitative approaches, as well as both controlled and spontaneous data elicitation procedures, to shed light on how linguistic, historical, and social variables drive contact phenomena, and in turn, shape specific varieties of Spanish. It will pique the interest of researchers and students of fields such as contact linguistics, language variation and change, segmental and suprasegmental phonetics and phonology, and sociolinguistics.

Color Coded Blending Books for Beginning Readers Cambridge Scholars Publishing

When teaching children to read, color coding the alphabet can help them learn the different kinds of letters in the English language. Color coding also helps highlight common letter combinations, such as consonant blends, and shows how these combinations create a variety of consonant and vowel sounds. As a result, children learn to recognize letter and sound patterns, helping the reading process become more intuitive. This approach is often used in Montessori teachings. For example: Red: Consonants (b, c, d, f, g, h, j, k, l, m, n, p, q, r, s, t, v, w, x, y, z) and Consonant Blends (bl, br, cl, cr, dr, fr, tr, fl, gl, gr, ld, nd, nk, pl, pr, sk, sl, sm, sn, sp, st) Blue: Short Vowels (a, e, i, o, u) Green: H-Digraphs (sh, th, ch), Long Vowels (a, e, i, o, u), Silent e (e) and Spelling Patterns (ck, ff, ll, ss, ay, ee, ow, oo, ou, ow, er, or, ar, ing). Once the red consonants and blue short vowels are mastered, the remaining spelling variations are noted in green to distinguish that these sounds are different than the recognizable consonants or short vowels. The series is taught in a specific order to develop familiarity: Short a Short i Short a and i Short o Short a, i, o, Short u Short a, i, o, u Short e Short a, i, o, u, e Consonant Blends H-Digraphs Silent e / Long Vowels Consonant Phonogram Spelling Patterns ck, ff, ll, ss Vowel Phonogram Spelling Patterns ay, ee, ow, y, oo, ou, ow, er, or, ar. BONUS: Short Vowels and Silent e Comparisons. Written by a mom and edited by a Montessori Director.

One of the main focuses within the first years of your child's schooling is learning phonics. From the first day of school, your child will begin learning sounds that create the basis for secure reading, writing and spelling skills. Learning the phonics provides children with the tools to be able to 'decode' words effectively. There is no longer a need to learn words simply by the way they look or sound, understanding and applying phonics releases the need to 'remember' every word, spelling and grammar rule that applies to the English language. Learning letter and vowel sounds is the first step. Color and learn short vowel sounds, helps to make learning fun. Color and Learn, Short Vowel Sounds is part of a larger programme to help parents support their children through this process.
