ESL Readers and Writers in Higher Education describes the challenges ESL students in U.S. postsecondary institutions face when studying in a second language, and offers suggestions for how teachers, advisors, tutors, and institutions might provide support that meets the reading and writing needs of this very important student population. Because the ESL profession as a whole, including what professionals are doing in the classroom, sits under the umbrella of an institutional response to a language-related challenge, some solutions aimed at helping students achieve optimal proficiency lie outside of the classroom. As such, this book is based on the assertion that language development support is not the sole responsibility of language teachers. Everyone on campuses that hosts ESL students bears some responsibility for these students' language development. Chapters are therefore, intentionally adapted to appeal to a wide variety of readers from classroom teachers, and teachers in training, to admissions officers, academic advisors, and international student advisors.

Teaching Academic L2 Writing Routledge

Seminar paper from the year 2008 in the subject English Language and Literature Studies - Linguistics, grade: 1,3, University of Wuppertal (Anglistik/Amerikanistik), course: Contrastive Syntax, language: English, abstract: In how far are active and passive voice in English and German different from each other? What difficulties do learners of English as a second language have to face when they deal with "voice", especially in academic writing? This paper intends to answer these questions by firstly dealing with the descriptions and comparisons of active and passive voice, and partly also middle voice, as far as they are presented in *Understanding English-German Contrasts* by König & Gast. In a second step, certain exemplary problems that L21 learners of English come across when dealing with active and passive voice will be picked from Hinkel's *Teaching Academic ESL Writing: Practical Techniques in Vocabulary and Grammar*. These problems will then be examined by referring back to the text by König & Gast.

Practical Techniques in Vocabulary and Grammar Routledge

The 25 chapters contained in this book were all written by scholars working in the field of applied linguistics and English language teaching in various East Asian contexts. East Asia is large and diverse in terms of socio-economic, linguistic, and ethnic parameters. Statistics alone cannot give a clear understanding of what goes on in rural and urban universities and what challenges English language teachers and learners face in those contexts. To understand this wide gamut of issues in English language teaching in East Asia is thus a very large undertaking. The book addresses some of these issues, arranging its 25 chapters into five sections: namely, Assessing Language Performance; Teaching English Writing; Learner Autonomy; Corpus and Discourse Research; and Learning English in East Asian Contexts. Many of the chapters in this volume concern familiar topics such as linking assessment to teaching, learning and curriculum; conducting assessment validation research; examining meta-cognitive strategies; investigating teaching and learning English for academic purposes; and profiling prevailing word lists for language learners. Other chapters are on novel or

lesser known topics such as non-verbal delivery in speaking assessment; the use of visualization as a reading strategy; learner strategies in a Facebook corpus; effects of discourse signaling cues and rate of speech; and an ontogenetic analysis of college English textbooks. Collectively, these chapters showcase English language learning, teaching, and assessing in a range of contexts using a variety of methods and techniques to deal with issues relevant to East Asian teachers, learners and researchers.

A Resource Book for Data-Driven Learning Routledge

In recent years, the number of nonnative speakers of English in colleges and universities in North America has increased dramatically. As a result, more and more writing teachers have found themselves working with these English as a Second Language (ESL) students in writing classes that are designed primarily with monolingual, native-English-speaking students in mind. Since the majority of institutions require these students to enroll in writing courses at all levels, it is becoming increasingly important for all writing teachers to be aware of the presence and special linguistic and cultural needs of ESL writers. This increase in the ESL population has, over the last 40 years, been paralleled by a similar growth in research on ESL writing and writing instruction--research that writing teachers need to be familiar with in order to work effectively with ESL writers in writing classrooms of all levels and types. Until recently, however, this body of knowledge has not been very accessible to writing teachers and researchers who do not specialize in second language research and instruction. This volume is an attempt to remedy this problem by providing a sense of how ESL writing scholarship has evolved over the last four decades. It brings together 15 articles that address various issues in second language writing in general and ESL writing in particular. In selecting articles for inclusion, the editors tried to take a principled approach. The articles included in this volume have been chosen from a large database of publications in second language writing. The editors looked for works that mirrored the state of the art when they were published and made a conscious effort to represent a wide variety of perspectives, contributions, and issues in the field. To provide a sense of the evolution of the field, this collection is arranged in chronological order.

Teaching College Writing to Diverse Student Populations Routledge

Sustained Content Teaching in Academic ESL/EFL Lulu Press, Inc

English L2 Reading: Getting to the Bottom, Second Edition remains a comprehensive, myth-debunking examination of how L1 features (orthographic system, phonology, morphology) can influence English L2 reading at the “bottom” of the reading process. It provides a thorough but very accessible linguistic/psycholinguistic examination of the lowest levels of the reading process. It is both theoretical and practical. The goal is to balance or supplement (not replace) top-down approaches and methodologies with effective low-level options for teaching English reading. Core linguistic and psycholinguistic concepts are presented within the context of their application to teaching. The text clearly explains the strategies that readers of other languages develop in response to their own writing systems (Chinese, Japanese, Arabic, Hebrew, other alphabets, or transparent Roman alphabetic systems), contrasted with an explanation of the strategies that English readers develop in response to the opaque orthography of English, and explicates how other low-level processing strategies for L1 morphology and word formation may aid or hinder processing in English L2 reading acquisition. A complete, balanced reading ideology should be big enough to embrace all reading theories and practices. In particular, it should be able to accommodate those researchers and teachers who find that attention to the details of language can also help students learn to read better. Many ESL/EFL teachers are interested in supplementing their successful whole-language methods with bottom-up reading strategies, but aren’t sure how to do it. This book fills that gap. Changes in the Second Edition: *updated content in each chapter and clearer organization for the student to make the text more reader friendly; *expansion in Chapter 2 on alphabets, writing systems, and a brief history of written English and spelling; *extended discussion in Chapter 3 of the cognition of written language and reading transfer; *addition of phonemic, vocal, subvocal, and articulatory development and L2 reading processing in Chapter 4, as well as instructional activities and strategies for teaching these skills to L2 readers; *elaboration of graphs and graphemes in Chapter 5, including discussion of developing graphemic knowledge, processing strategies, and their instructional application, and new sections on reading speed, pattern recognition, and word recognition; *development of the probabilistic section in Chapter 6, particularly the probabilities in context of L2 reading; *updated information on the topic of brain activation studies; and *new treatment of the topic of reading fluency, added in responses to requests from many readers of the first edition. Intended for ESL/EFL reading researchers, teacher trainers and teachers, and as a text for MATESOL students, most chapters contain practical suggestions that teachers can incorporate into whole language methods to teach beginning or intermediate ESL/EFL reading (letters, pronunciation, “smart” phonics, morphemes, and vocabulary acquisition) in a more balanced way. Pre-reading discussion and study questions are provided to stimulate interest and enhance comprehension. End-of-chapter exercises help readers apply the concepts.

The *Handbook of Second and Foreign Language Writing* is an authoritative reference compendium of the theory and research on second and foreign language writing that can be of value to researchers,

professionals, and graduate students. It is intended both as a retrospective critical reflection that can situate research on L2 writing in its historical context and provide a state of the art view of past achievements, and as a prospective critical analysis of what lies ahead in terms of theory, research, and applications. Accordingly, the Handbook aims to provide (i) foundational information on the emergence and subsequent evolution of the field, (ii) state-of-the-art surveys of available theoretical and research (basic and applied) insights, (iii) overviews of research methods in L2 writing research, (iv) critical reflections on future developments, and (iv) explorations of existing and emerging disciplinary interfaces with other fields of inquiry.

Academic Vocabulary in Learner Writing University of Michigan Press

The new edition of this comprehensive text fills an important role in teacher professional preparation by focusing on how to teach the grammar and vocabulary that are essential for all L2 writing teachers and student-writers. Before L2 writers can begin to successfully produce academic prose, they need to understand the foundations of the language and develop the language tools that will help them build reasonable quality text. Targeting specific problem areas of students’ writing, this text offers a wealth of techniques for teaching writing, grammar, and vocabulary to second-language learners. Updated with current research and recent corpus analysis findings, the second edition features a wealth of new materials, including new teaching activities; student exercises and assignments; and substantially revised appendices with supplementary word and phrase lists and sentence components. Designed for preservice ESL/ELT/TESOL courses as well as Academic Writing and Applied Linguistics courses, this book includes new, contextualized examples in a more accessible and easy-to-digest format.

Reading, Writing, Listening, and Speaking Boynton/Cook

Teaching Academic ESL Writing: Practical Techniques in Vocabulary and Grammar fills an important gap in teacher professional preparation by focusing on the grammatical and lexical features that are essential for all ESL writing teachers and student-writers to know. The fundamental assumption is that before students of English for academic purposes can begin to successfully produce academic writing, they must have the foundations of language in place--the language tools (grammar and vocabulary) they need to build a text. This text offers a compendium of techniques for teaching writing, grammar, and lexis to second-language learners that will help teachers effectively target specific problem areas of students' writing. Based on the findings of current research, including a large-scale study of close to 1,500 non-native speakers' essays, this book works with several sets of simple rules that collectively can make a noticeable and important difference in the quality of ESL students' writing. The teaching strategies and techniques are based on a highly practical principle for efficiently and successfully maximizing learners' language gains. Part I provides the background for the text and a sample of course curriculum guidelines to meet the learning needs of second-language teachers of writing and second-language writers. Parts II and III include the key elements of classroom teaching: what to teach and why, possible ways to teach the material in the classroom,

common errors found in student prose and ways to teach students to avoid them, teaching activities and suggestions, and questions for discussion in a teacher-training course. Appendices to chapters provide supplementary word and phrase lists, collocations, sentence chunks, and diagrams that teachers can use as needed. The book is designed as a text for courses that prepare teachers to work with post-secondary EAP students and as a professional resource for teachers of students in EAP courses.
