Niccolò Machiavelli (1469–1527) is the father of modern political thought, but he is also one of the greatest writers of the Renaissance and his wisdom and style extend far beyond politics to encompass a compelling philosophy of life as well. In *The Quotable Machiavelli*, Maurizio Viroli, one of the world's leading Machiavelli scholars, offers a rich collection of the Florentine's most memorable words on a wide range of subjects, including politics, the human condition, religion, love and happiness, antiquity and history, patriotism, and virtue. Drawing on Machiavelli's entire body of writings, and including little-known quotations as well as famous passages, the book shows the full scope of his thought and belies the cliché that he was a "Machiavellian" cynic. In addition to Machiavelli's own words on dozens of subjects of perennial interest, the book includes some almost unknown texts in which his contemporaries describe him. Complete with a biographical introduction, the book serves as a handy reference and a smart and lively introduction to a masterly thinker and writer. Includes a rich collection of Machiavelli's most memorable words on a wide range of subjects, from politics to the human condition—almost 700 quotations in all Edited and introduced by one of the world's leading Machiavelli scholars Serves as a smart and lively introduction to Machiavelli's life and works Draws on the complete body of Machiavelli's writings Features a brief biography of Machiavelli, a chronology of his life, suggestions for further reading, and an index

**An Introduction** John Wiley & Sons

Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Economics drives the modern world and shapes our lives, but few of us feel we have time to engage with the breadth of ideas in the subject. *50 Economics Classics* is the smart person's guide to two centuries of discussion of finance, capitalism and the global economy. From Adam Smith's *Wealth of Nations* to Thomas Piketty's bestseller *Capital in the Twenty-First Century*, here are the great reads, seminal ideas and famous texts clarified and illuminated for all.

*The Confessions of S. Augustine* Vintage

*Never Too Late To Be Great* is about the power of thinking long. Drawing on wide research into 'lead time' and the 'ten-year rule', bestselling personal development author Tom Butler-Bowdon shows that, contrary to popular belief, people, companies, products and ideas invariably need time to realise their potential. At the age you are now, many famous and remarkable people were only just getting into their stride - and it's likely that you have more time than you think to achieve your goals. It's never too late to begin the journey of being or doing something remarkable. This book will show you how.

The definitive translation by Dick Davis of the great national epic of Iran—now newly revised and expanded to be the most complete English-language edition A Penguin Classic Dick Davis—"our pre-eminent translator from the Persian" (*The Washington Post*)—has revised and expanded his acclaimed translation of Ferdowsi's masterpiece, adding more than 100 pages of newly translated text. Davis's elegant combination of prose and verse allows the poetry of the *Shahnameh* to sing its own tales directly, interspersed sparingly with clearly marked explanations to ease along modern readers. Originally composed for the Samanid princes of Khorasan in the tenth century, the *Shahnameh* is among the greatest works of world literature. This prodigious narrative tells the story of pre-Islamic Persia, from the mythical creation of the world and the dawn of Persian civilization through the seventh-century Arab conquest. The stories of the *Shahnameh* are deeply embedded in Persian culture and beyond, as attested by their appearance in such works as *The Kite Runner* and the love poems of Rumi and Hafez. For more than sixty-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,500 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by

award-winning translators.

For over 2000 years, philosophy has been our best guide to the experience of being human, and the true nature of reality. From Aristotle, Plato, Epicurus, Confucius, Cicero and Heraclitus in ancient times to 17th century rationalists Descartes, Leibniz and Spinoza, from 20th-century greats Jean-Paul Sartre, Jean Baudrillard and Simone de Beauvoir to contemporary thinkers Michael Sandel, Peter Singer and Slavoj Zizek, *50 Philosophy Classics* explores key writings that have shaped the discipline and had an impact on the real world. Philosophy can no longer be confined to academia, and *50 Philosophy Classics* shows how powerful it can be as a tool for opening our minds and helping us think. Whether you are fascinated or daunted by the big questions of how to think, how to be, how to act and how to see, this is the perfect introduction to some of humanity's greatest minds and their landmark books.

**Who We Are, How We Think, What We Do: Insight and Inspiration from 50 Key Books** Oxford University Press

Here is a bracing deconstruction of the framework for understanding the world that is learned as gospel in Economics 101, regardless of its imaginary assumptions and misleading half-truths. Economism: an ideology that distorts the valid principles and tools of introductory college economics, propagated by self-

styled experts, zealous lobbyists, clueless politicians, and ignorant pundits. In order to illuminate the fallacies of economism, James Kwak first offers a primer on supply and demand, market equilibrium, and social welfare: the underpinnings of most popular economic arguments. Then he provides a historical account of how economism became a prevalent mode of thought in the United States—focusing on the people who packaged Econ 101 into sound bites that were then repeated until they took on the aura of truth. He shows us how issues of moment in contemporary American society—labor markets, taxes, finance, health care, and international trade, among others—are shaped by economism, demonstrating in each case with clarity and élan how, because of its failure to reflect the complexities of our world, economism has had a deleterious influence on policies that affect hundreds of millions of Americans.

**Behavioral Finance: The Second Generation** Penguin

An authoritative look at the microeconomics of entrepreneurship. Entrepreneurs are widely recognized for the vital contributions they make to economic growth and general welfare, yet until fairly recently entrepreneurship was not considered worthy of serious economic study. Today, progress has been made to integrate entrepreneurship into macroeconomics, but until now the entrepreneur has been almost completely excluded from microeconomics and standard theoretical models of the firm. *The Microtheory of Innovative Entrepreneurship* provides the framework for introducing entrepreneurship into mainstream microtheory and incorporating the activities of entrepreneurs, inventors, and managers into standard models of the firm. William Baumol distinguishes between the innovative entrepreneur, who comes up with new ideas and puts them into practice, and the replicative entrepreneur, which can be anyone who launches a new business venture, regardless of whether similar ventures already exist. Baumol puts forward a quasi-formal theoretical analysis of the innovative entrepreneur's influential role in economic life. In doing so, he opens the way to bringing innovative entrepreneurship into the accepted body of mainstream microeconomics, and offers valuable insights that can be used to design more effective policies. *The Microtheory of Innovative Entrepreneurship* lays the foundation for a new kind of microtheory that reflects the innovative entrepreneur's importance to economic growth and prosperity.

**On Tour with the IMF** Nicholas Brealey

The first clear and faithful guide to the timeless, practical teachings of the Stoic philosopher Seneca. Stoicism, the most influential philosophy of the Roman Empire, offers refreshingly modern ways to strengthen our inner character in the face of an unpredictable world. Widely recognized as the most talented and humane writer of the Stoic tradition, Seneca teaches us to live with freedom and purpose. His most enduring work, over a hundred "Letters from a Stoic" written to a close friend, explains how to handle adversity; overcome grief, anxiety, and anger; transform setbacks into opportunities for growth; and recognize the true nature of friendship. In *Breakfast with Seneca*, philosopher David Fideler mines Seneca's classic works in a series of focused chapters, clearly explaining Seneca's ideas without oversimplifying them. Best enjoyed as a daily ritual, like an energizing cup of coffee, Seneca's wisdom provides us with a steady stream of time-tested advice about the human condition—which, as it turns out, hasn't changed much over the past two thousand years.
