Thinking and Speaking in Two Languages Multilingual Matters

All teachers at all grade levels in all subjects have speaking assignments for students, but many teachers believe they don't know how to teach speaking, and many even fear public speaking themselves. In his new book, *Well Spoken*, veteran teacher and education consultant Erik Palmer shares the art of teaching speaking in any classroom. Teachers will find thoughtful and engaging strategies for integrating speaking skills throughout the curriculum. Palmer stresses the essential elements of all effective oral communication, including: Building a Speech: Audience, Content, Organization, Visual Aids, and Appearance, Performing a Speech: Poise, Voice, Life, Eye Contact, Gestures, and Speed, Evaluating a Speech: Creating Effective Rubrics, Guiding Students to Excellence *Well Spoken* contains a framework for understanding the skills involved in all effective oral communication, offers practical steps and lesson ideas that any teacher needs to successfully teach speaking in a variety of situations from classroom discussions to formal presentations and includes a set of tools for students from how to grab the audience's attention to how to use emphatic hand gestures and adjust speed for effect. Discover why, year after year, students returned to Palmer's classroom to thank him for teaching them how to be well spoken. You may find, after reading this book, that you have become a better speaker, too.

New Ways in Teaching Speaking Routledge

This book focuses on understanding the process of problem construction in oral communication in foreign language contexts, examining how speakers of English as a second language approach issues in oral communication, as well as the strategies they employ to overcome these difficulties. Using theories of general communication, and in particular current approaches to L2 oral communication and strategies in interactional discourse, the authors construct a theoretical framework for defining, identifying and classifying learners' problems and coping strategies when speaking English as a second or foreign language. The book offers a coherent process-oriented description of the complex and multidimensional nature and typology of oral interaction problems in EFL contexts, and it will be of interest to practitioners, teachers, researchers, students, and curriculum designers in Applied Linguistics and TESOL.

Leading researchers in the field of spoken discourse and language teaching offer an empirically informed, issues-based discussion of the present state of research into spoken language. They address some of the complex and rewarding opportunities offered by these emerging insights for language education and, specifically, for TESOL. They ask whether new data and evidence that spoken discourse is a distinctive genre will challenge existing language theories and teaching. What could be the practical outcomes for curriculum, teaching approaches, materials and assessment? A stimulating resource for researchers and for professional and student language teachers.

In this book, Zaretta Hammond draws on cutting-edge neuroscience research to offer an innovative approach for designing and implementing brain-compatible culturally responsive instruction. The book includes: Information on how one's culture programs the brain to process data and affects learning relationships Ten "key moves" to build students' learner operating systems and prepare them to become independent learners Prompts for action and valuable self-reflection

Teaching & Researching: Language Learning Strategies John Benjamins Publishing Company

The volume constitutes a state-of-the-art account of issues related to teaching, learning and testing speaking in a second language. It brings together contributions by Polish and international scholars which seek to create links between theory, research and classroom practice, report the findings of studies investigating the impact of linguistic, cognitive and affective factors on the development and use of speaking skills, and provide concrete pedagogic proposals for instruction and assessment in this area. As such, the book will be of interest not only to second language acquisition theorists and researchers, but also to foreign language teachers willing to enhance the quality of speaking instruction in their classrooms.

Handbook of Research in Second Language Teaching and Learning Routledge

This book guides language teachers in planning and teaching activities that promote the development of speaking and listening skills at all levels of target language proficiency, for teachers of any modern language. Kathleen M. Bailey draws on her extensive experience as a language teacher, teacher educator, and language learner to interweave practical activities with the research and theory that support their use. Activities include the use of pictures, songs, drama techniques, tasks, and projects to promote the development of speaking and listening skills. The author shares reflections of her own and encourages readers to reflect on their own experiences and become aware of their existing mental constructs through multiple reflection tasks and discussion questions. Each chapter provides focusing questions. The systematic chapter structure scaffolds the readers' understanding of the concepts explored, which include communication strategies, interactive and non-interactive listening, speaking anxiety, accentness and intelligibility, and much more. Through its companion website this book provides access to resources that enable readers to continue their own professional development as teachers of listening and speaking in second and foreign language contexts.

Feedback is arguably the most critical and powerful aspect of teaching and learning. Yet, there remains a paradox: why is feedback so powerful and why is it so variable? It is this paradox which Visible Learning: Feedback aims to unravel and resolve. Combining research excellence, theory and vast teaching expertise, this book covers the principles and practicalities of feedback, including: the variability of feedback, the importance of surface, deep and transfer contexts, student to teacher feedback, peer to peer feedback, the power of within lesson feedback and manageable post-lesson feedback. With numerous case-studies, examples and engaging anecdotes woven throughout, the authors also shed light on what creates an effective feedback culture and provide the teaching and learning structures which give the best possible framework for feedback. Visible Learning: Feedback brings together two internationally known educators and merges Hattie's world-famous research expertise with Clarke's vast experience of classroom practice and application, making this book an essential resource for teachers in any setting, phase or country.

The Art of Teaching Speaking Palgrave Macmillan

This book is unique in bringing together studies on instructed second language acquisition that focus on a common question: "What renders this research particularly relevant to classroom applications, and what are the advantages, challenges, and potential pitfalls of the methodology adopted?" The empirical studies feature experimental, quasi-experimental and observational research in settings ranging from the classroom to the laboratory and CALL contexts. All contributors were asked to discuss issues of cost, ethics, participant availability, experimental control, teacher collaboration, and student motivation, as well as the generalizability of findings to different kinds of educational contexts, languages, and structures. This volume should be of interest to graduate students in second language research, practicing teachers who want some guidance to navigate the sometimes overwhelming array of publications, and to researchers who are planning studies on instructed second language learning or teaching and are looking to make principled decisions on which of the existing methodologies to adopt.

Speaking in a Second Language Brookes Publishing Company

For millions of individuals all over the world, speaking in a second language is a daily activity. It is therefore important that research in applied linguistics should contribute empirically to the study of second language spoken interaction. The aim of this volume is to make such a contribution by providing research-based insights into current approaches to the teaching and learning of this skill. Two key dimensions define the papers included here—their novelty and scope. First, the book provides a novel approach to the study of speaking in a second language by combining recent findings in usage-based linguistics with current issues in teaching. Second, the chapters cover a range of theoretical perspectives, including sociolinguistic and interactional competence, gestures, dynamic systems theory and code-switching. The volume offers a contemporary analysis of research in second language speaking that will be of interest to researchers, graduate students, teachers and other professionals working in the fields of communication and applied linguistics.

Bringing together theory, research, and practice to dismantle Anti-Black Linguistic Racism and white linguistic supremacy, this book provides ethnographic snapshots of how Black students navigate and negotiate their linguistic and racial identities across multiple contexts. By highlighting the counterstories of Black students, Baker-Bell demonstrates how traditional approaches to language education do not account for the emotional harm, internalized linguistic racism, or consequences these approaches have on Black students' sense of self and identity. This book presents Anti-Black Linguistic Racism as a framework that explicitly names and richly captures the linguistic violence, persecution, dehumanization, and marginalization Black Language-speakers endure when using their language in schools and in everyday life. To move toward Black linguistic liberation, Baker-Bell introduces a new way forward through Antiracist Black Language Pedagogy, a pedagogical approach that intentionally and unapologetically centers the linguistic, cultural, racial, intellectual, and self-confidence needs of Black students. This volume captures what Antiracist Black Language Pedagogy looks like in classrooms while simultaneously illustrating how theory, research, and practice can operate in tandem in pursuit of linguistic and racial justice. A crucial resource for educators, researchers, professors, and graduate students in language and literacy education, writing studies, sociology of education, sociolinguistics, and critical pedagogy, this book features a range of multimodal examples and practices through instructional

maps, charts, artwork, and stories that reflect the urgent need for antiracist language pedagogies in our current social and political climate.

Speaking is a dynamic, interpersonal process and one that strongly influences how we are perceived by others in a range of formal and everyday contexts. Despite this, speaking is often researched and taught as if it is simply writing delivered in a different mode. In *Teaching and Researching Speaking*, Rebecca Hughes suggests that we have less understanding than we might of important meaning-making aspects of speech such as prosody, gaze, affect, and the ways speakers collaborate and negotiate with one another in interaction. This thoroughly revised and updated second edition looks to the future of the field, offering: A new chapter on assessment, discussing 'high stakes' oral language testing contexts such as immigration New material considering access to spoken data via the worldwide web and new technologies that allow neurolinguistic insights formerly hidden from view Summaries and case studies to help the reader understand how to approach researching speaking and encourages practitioners to
