With increased competition for external funding, technological advancement, and public expectations for transparency, not-for-profit and non-governmental organizations are facing new challenges and pressures. While research has explored the roles of accounting, accountability, and performance management in nonprofit organizations, we still lack evidence on the best practices these organizations implement in the areas of accountability and performance management. This book collects and presents that evidence for the first time, offering insights to help nonprofits face these new challenges head-on. *Performance Management in Nonprofit Organizations* focuses on both conventional and contemporary issues facing nonprofits, presenting evidence-based insights from leading scholars in the field. Chapters examine the design, implementation, and working of accounting, accountability, governance, and performance management measures, providing both retrospective and contemporary views, as well as critical commentaries on accounting and performance related issues in nonprofit organizations. The book's contributors also offer critical commentaries on the changing role of accounting and performance management in this sector. This research-based collection is an interesting and useful read for academics, practitioners, students, and consultants in nonprofit organizations, and is highly accessible to accounting and non-accounting audiences alike.

Can non-governmental organisations contribute to more socially just, alternative forms of development? Or are they destined to work at the margins of dominant development models determined by others? Addressing this question, this book brings together leading international voices from academia, NGOs and the social movements. It provides a comprehensive update to the NGO literature and a range of critical new directions to thinking and acting around the challenge of development alternatives. The book's originality comes from the wide-range of new case-study material it presents, the conceptual approaches it offers for thinking about development alternatives, and the practical suggestions for NGOs. At the heart of this book is the argument that NGOs can and must re-engage with the project of seeking alternative development futures for the world's poorest and more marginal. This will require clearer analysis of the contemporary

problems of uneven development, and a clear understanding of the types of alliances NGOs need to construct with other actors in civil society if they are to mount a credible challenge to disempowering processes of economic, social and political development.

 What happens when UNESCO heritage conventions are ratified by a state? How do UNESCO's global efforts interact with preexisting local, regional and state efforts to conserve or promote culture? What new institutions emerge to address the mandate? The contributors to this volume focus on the work of translation and interpretation that ensues once heritage conventions are ratified and implemented. With seventeen case studies from Europe, Africa, the Caribbean and China, the volume provides comparative evidence for the divergent heritage regimes generated in states that differ in history and political organization. The cases illustrate how UNESCO's aspiration to honor and celebrate cultural diversity diversifies itself. The very effort to adopt a global heritage regime forces myriad adaptations to particular state and interstate modalities of building and managing heritage.

An Introduction John Wiley & Sons
 This book charts the new phase of global struggles around gender equality and sexual democracy: the ultraconservative mobilization against "gender ideology" and feminist efforts to counteract it. It argues that anti-gender campaigns, which emerged around 2010 in Europe, are not a simple continuation of the anti-feminist backlash dating back to the 1970s, but part of a new political configuration. Opposition to "gender" has become a key element of the rise of right-wing populism, which successfully harnesses the anxiety, shame and anger caused by neoliberalism and threatens to destroy liberal democracy. *Anti-Gender Politics in the Populist Moment* offers a novel conceptualization of the relationship between the ultraconservative anti-gender movement and right-wing populist parties, examining the opportunistic synergy between these actors. The authors map the anti-gender campaigns as a global movement, putting the Polish case in a comparative perspective. They show that the anti-gender rhetoric is best understood as a reactionary critique of neoliberalism as a socio-cultural formation. The book also studies the recent wave of feminist mass mobilizations, viewing the transnational revolt of women as a left populist movement. This is an important study for those doing research in politics, cultural studies, gender and sexuality studies and sociology. It will also be useful for activists and policy makers.

Despite an abundance of information on the legal requirements of

directors, there is little practical advice on how to develop a truly effective board. Added to this is today's growing expectation that boards should monitor management as well as take full responsibility for the performance of their organisations. *Boards That Work* addresses this deficiency by showing boards how to develop their own corporate governance charter to document best practice governance policies within the Australian legal environment. Using the findings from contemporary global research, Geoffrey Kiel and Gavin Nicholson bring together the experiences of many boards and directors to present a model of policy documents and processes. Checklists, diagrams, figures and practical examples are extensively used to clearly illustrate key concepts, and a complete sample charter is presented to assist all types of boards in developing their own governance policies and procedures.

Rethinking the Nation State in the Global Economy Wiley
Situating Sustainability reframes our understanding of sustainability through an emerging international terrain of concepts and case studies. These approaches include material practices, such as extraction and disaster recovery, and extend into the domains of human rights and education. This volume addresses the need in sustainability science to recognize the deep and diverse cultural histories that define environmental politics. It brings together scholars from cultural studies, anthropology, literature, law, behavioral science, urban studies, design, and development to argue that it is no longer possible to talk about sustainability in general without thinking through the contexts of research and action. These contributors are joined by artists whose public-facing work provides a mobile platform to conduct research at the edges of performance, knowledge production, and socio-ecological infrastructures. *Situating Sustainability* calls for a truly transdisciplinary research that is guided by the humanities and social sciences in collaboration with local actors informed by histories of place. Designed for students, scholars, and interested readers, the volume introduces the conceptual practices that inform the leading edge of engaged research in sustainability.

 During the 1990s, both the United States and Britain shifted from entitlement to work-based systems for supporting their poor citizens. Much research has examined the implications of welfare reform for the economic well-being of the poor, but the new legislation also affects our view of democracy—and how it ought to function. By eliminating entitlement and setting behavioral conditions on aid, welfare reform challenges our understanding of citizenship, political equality, and the role of the state. In *Welfare Reform and Political Theory*, editors Lawrence Mead and Christopher Beem have assembled an accomplished list of

political theorists, social policy experts, and legal scholars to address how welfare reform has affected core concepts of political theory and our understanding of democracy itself. Welfare Reform and Political Theory is unified by a common set of questions. The contributors come from across the political spectrum, each bringing different perspectives to bear. Carole Pateman argues that welfare reform has compromised the very tenets of democracy by tying the idea of citizenship to participation in the marketplace. But William Galston writes that American citizenship has in some respects always been conditioned on good behavior; work requirements continue that tradition by promoting individual responsibility and self-reliance—values essential to a well-functioning democracy. Desmond King suggests that work requirements draw invidious distinctions among citizens and therefore destroy political equality. Amy Wax, on the other hand, contends that ending entitlement does not harm notions of equality, but promotes them, by ensuring that no one is rewarded for idleness. Christopher Beem argues that entitlement welfare served a social function—acknowledging the social value of care—that has been lost in the movement towards conditional benefits. Stuart White writes that work requirements can be accepted only subject to certain conditions, while Lawrence Mead argues that concerns about justice must be addressed only after recipients are working. Alan Deacon is well to the left of Joel Schartz, but both say government may actively promote virtue through social policy—a stance some other contributors reject. The move to work-centered welfare in the 1990s represented not just a change in government policy, but a philosophical change in the way people perceived government, its functions, and its relationship with citizens. Welfare Reform and Political Theory offers a long overdue theoretical reexamination of democracy and citizenship in a welfare society.

Company Accounting (9th Ed.) - ACCG923 S. Chand Publishing ethics." Certainly our industry is bound by the formal constraints of law in national, state, and local jurisdictions. What this volume reminds us, however, is that those laws are only as good as the personal "sea of ethics" in which each of us operates. THE ETHICS OF PROPERTY INVOLVEMENTS Stephen E. Roulac The Roulac Group San Rafael, California and Visiting Professor University of Ulster Ethical considerations are a dominant theme in the

management literature. As "Ethics and ethical issues surround our liver, ... ethics has become one of the most rapidly growing areas of management research, with over 800 articles and 1,400 books appearing since 1990" (Schminke, Ambrose, and Miles, 1998). Compared to business and business management, however, the research and writing on real estate in an ethics context is in the very early stages of development. The lack of a developed literature on ethics in real estate is reflected in the response by one highly placed executive to my solicitation for funding to support the publication of this volume: "I didn't know there were any ethics in real estate!" Fortunately, the Summa Corporation and the American Real Estate Society believe in the importance of ethics in real estate, for their cosponsorship has made possible this special monograph on the subject of Ethics in Real Estate. The support of the Summa Corporation and the American Real Estate Society of this pioneering volume is warmly and appreciatively acknowledged.

Empathy has provoked equal measures of excitement and controversy in recent years. For some, empathy is crucial to understanding others, helping us bridge social and cultural differences. For others, empathy is nothing but a misguided assumption of access to the minds of others. In this book, Cummings argues that empathy comes in many forms, some helpful to understanding others and some detrimental. Tracing empathy's genealogy through aesthetic theory, philosophy, psychology, and performance theory, Cummings illustrates how theatre artists and scholars have often overlooked the dynamic potential of empathy by focusing on its more "monologic" forms, in which spectators either project their point of view onto characters or passively identify with them. This book therefore explores how empathy is most effective when it functions as a dialogue, along with how theatre and performance can utilise the live, emergent exchange between bodies in space to encourage more dynamic, dialogic encounters between performers and audience.
