A mesmerizing memoir from a literary legend, giving readers a new perspective on the origins of Hatchet and other famed survival stories. His name is synonymous with high-stakes wilderness survival adventures. Now, beloved author Gary Paulsen portrays a series of life-altering moments from his turbulent childhood as his own original survival story. If not for his summer escape from a

shockingly neglectful Chicago upbringing to a North Woods homestead at age five, there never would have been a Hatchet. Without the encouragement of the librarian who handed him his first book at age thirteen, he may never have become a reader. And without his desperate teenage enlistment in the Army, he would not have discovered his true calling as a storyteller. An entrancing account of grit and growing up, perfect for newcomers and lifelong fans alike, this is the famed author at his rawest and most real.

**The Wilderness Survival Guide** Harper Collins

The most comprehensive holistic guide to transforming adult ADD / ADHD. "The Drummer and the Great Mountain - A Guidebook to Transforming Adult ADD/ADHD" starts with the premise that ADD/ADHD is a neurological type, not a disorder -- shared by countless artists and great minds throughout history. It offers a soulful, comprehensive, and holistic support system for creative individuals looking to maximize their potential and minimize their challenges with focus and consistency. Topics covered: Nutrition, Exercise, Emotional Support Tools, Time Management, Life Visioning, Creating Effective Support Systems, ADD / ADHD and Addiction, Meditation and Mindfulness Practices, and much more. Who Can Benefit: 1. Anyone diagnosed (or self-diagnosed) with ADD / ADHD. 2. Artists, musicians, entrepreneurs, and creative-types who struggle with consistency, structure, self-motivation, and possibly addictive tendencies. 3. People taking ADD / ADHD medication who are looking for effective, natural alternatives. 4. Social Workers, therapists, and wellness professionals seeking a comprehensive support plan for their clients. 5. Spouses, partners, and parents looking for ways to effectively support their loved ones. 6. Teachers, life coaches and support professionals wanting to discover more in-depth tools of support. "The Drummer and the Great Mountain is an informative, practical guidebook for those of us with the artistic or entrepreneurial temperament, offering a treasure trove of survival tools, personal growth techniques and coping mechanisms for a personality type that can often be at odds with our linear, rational society." ~ Warren Goldie, Author "This book seems to not only span the whole spectrum of the ADD/ADHD subject but pierces deeply, bringing into focus the essential value of each part of our lives to augment - even perfect - our given natures; no matter how unique, rare or misunderstood." ~ Doro Kiley, Life Coach "Michael has taken a deeper look at how the foods we eat affect our brain chemistry. He has done a beautiful job explaining this phenomenon in clear and understandable terms; offering a realistic roadmap on how to recognize and take control of detrimental dietary patterns." ~ Jennifer Copyak, Nutritionist

**Wilderness Survival Handbook** Simon and Schuster

The basis of adequate prepping is being prepared for both common and dire events that may occur

under the worst of all possible circumstances. These circumstances might include the breakdown in normal emergency support services (such as calling 911), the lack of an ability to obtain additional supplies, and the probability that you will not be able to rely on anyone but members of your immediate group or yourself. Prepping requires forethought with regard to food, water supplies, power, and protection - all areas of significant technical preparation. Self-reliant medical care is no exception. This book provides the basis of prevention, identification, and long-term management of survivable medical conditions and can be performed with minimal training. It helps you identify sources of materials you will need and should stock-pile, it discusses storage issues, and directs you to sources for more complex procedures that require advanced concepts of field-expedient techniques used by trained medical persons such as surgeons, anesthesiologists, dentists, or midwives and obstetricians.

If you breathe and have a pulse, you NEED this book. -Cody Lundin Cody Lundin, director of the Aboriginal Living Skills School in Prescott, Arizona, shares his own brand of wilderness wisdom in this highly anticipated new book on commonsense, modern survival skills for the backcountry, the backyard, or the highway. It is the ultimate book on how to stay alive-based on the principal of keeping the body's core temperature at a lively 98.6 degrees. In his entertaining and informative style, Cody stresses that a human can live without food for weeks, and without water for about three days or so. But if the body's core temperature dips much below or above the 98.6 degree mark, a person can literally die within hours. It is a concept that many don't take seriously or even consider, but knowing what to do to maintain a safe core temperature when lost in a blizzard or in the desert could save your life. Lundin delivers the message with wit, rebellious humor, and plenty of backcountry expertise. Cody Lundin and his Aboriginal Living Skills School have been featured in dozens of national and international media sources, including Dateline NBC, CBS News, USA Today, The Donny and Marie Show, and CBC Radio One in Canada, as well as on the cover of Backpacker magazine. When not teaching for his own school, he is an adjunct faculty member at Yavapai College and a faculty member at the Ecosa Institute. Cody is the only person in Arizona licensed to catch fish with his hands, and lives in a passive solar earth home sixty miles from Prescott, Arizona. **The Outdoor Survival Book** Random House

You're alone in the forest on a fine autumn day with nothing but a multitool. You're stuck there for a week. Should you be more worried about finding a source of uncontaminated water or about a bear that might be in the area? Neither, says Les Stroud. The bear will most likely avoid you, and

dehydration will affect you faster than parasites in untreated water. Your bigger worry should be shelter—the daytime might be nice, but it's likely going to be cold at night. And that's just the beginning. The concept of Survivorman is simple: left in a remote location, Les must survive for seven days on his own without food, water or equipment. Now, he shares his expert knowledge in *Survive!*, a fully illustrated guide based on his experiences on six continents and filled with field-tested advice. Many books on survival are culled from Second World War-era training techniques that are out-of-date or just plain wrong. *Survive!* debunks these dated myths, exploring basic and advanced tactics that show you how to cope in any survival situation. Brought to life with Les's own anecdotes and the tales of others, *Survive!* is the perfect manual for anyone -- from beginner to armchair traveller to seasoned explorer -- who wants to meet nature's dangers with confidence. As Les writes, "If you believe you can make it through the bad times, and you are not intimidated by the forces of nature, you will markedly increase your chances of survival." *SURVIVE!* includes detailed information on the following: preparing for survival, mentally and physically fire-making techniques basic survival kit components finding, collecting and making water sources of food types of shelter

There's never been a better time to "be prepared." Matthew Stein's comprehensive primer on sustainable living skills—from food and water to shelter and energy to first-aid and crisis-management skills—prepares you to embark on the path toward sustainability. But unlike any other book, Stein not only shows you how to live "green" in seemingly stable times, but to live in the face of potential disasters, lasting days or years, coming in the form of social upheaval, economic meltdown, or environmental catastrophe. *When Technology Fails* covers the gamut. You'll learn how to start a fire and keep warm if you've been left temporarily homeless, as well as the basics of installing a renewable energy system for your home or business. You'll learn how to find and sterilize water in the face of utility failure, as well as practical information for dealing with water-quality issues even when the public tap water is still flowing. You'll learn alternative techniques for healing equally suited to an era of profit-driven malpractice as to situations of social calamity. Each chapter (a survey of the risks to the status quo; supplies and preparation for short- and long-term emergencies; emergency measures for survival; water; food; shelter; clothing; first aid, low-tech medicine, and healing; energy, heat, and power; metalworking; utensils and storage; low-tech chemistry; and engineering, machines, and materials) offers the same approach, describing skills for self-reliance in good times and bad. Fully revised and expanded—the first edition was written pre-9/11 and pre-Katrina, when few Americans took the risk of social disruption seriously—*When Technology Fails* ends on a positive, proactive note with a new chapter on "Making the Shift to Sustainability," which offers practical suggestions for changing our world on personal, community

and global levels.

*Bushcraft Illustrated* John McPherson

Written for use in formal United States Air Force survival training courses, the U.S. Air Force Survival Handbook is the bible for pilots who want to stay alive—no matter what. Assuming, as the Air Force does, that flight personnel may be faced at any time with a bailout or crash landing in hostile territory without supplies, the advice here is superlatively practical, but also surprisingly readable and interesting. Detailing specific survival threats at sea, in the tropics, in the desert, in Arctic conditions, and the psychological perils of imprisonment and torture, this handbook is replete with fascinating and useful (if unsettling) information. Precisely written, profusely illustrated, and completely authoritative, this is an essential book for anyone—soldier or civilian—looking for knowledge that could prove to be the difference between life and death in a dangerous situation.

**I Know Why the Caged Bird Sings** Simon and Schuster

From the best-selling team at Outdoor Life this essential guide to surviving in the wilderness is for survivalists and hobbyists alike. For those who have been accustomed to reading books on wilderness skills that entertain but fall short of actually teaching you "how to" accomplish the tasks and skills at hand, this book is a pleasant surprise - written for those who wish to actually head into the wilderness and practice the skills of our ancestors. *Primitive Wilderness Living and Survival Skills* is a compilation of ten booklets written over the course of seven years each chapter a complete, concise "how-to" in itself. Unlike many who have written on this subject in the past, John and Geri McPherson have spent years daily practicing these skills, perfecting methods through trial and error - and documenting it. This vast knowledge is passed on to the reader. Illustrated with over 700 photographs crammed into 400 pages, this massive work is not a rehashing and perpetuation of myths. These are tried and true methods of primitive wilderness living and survival skills. Field and Stream says: "The McPherson's book....deals with taking flat nothing into boondocks and staying for a long period of time. If you'd like to know how to make a spear thrower, or pottery, or brain cure deer hides, or build a permanent

shelter from what you find at and, here is the place to learn." And Sports Afield: "...Full of practical, tested advice for living off the land." Also the Museum of the Fur Trade: "This is without doubt the
