JILLIAN MACK

The Artful Parent Capstone

From castles to animal masks, pirate ships, and even dinosaurs! You will be amazed at how much you can do with a simple cardboard box. A DIY projects book for kids that use recycling as a way to build creativity, imagination, and interactive play for kids aged 7-12. It features clear step-by-step instructions and detailed photographic explanations that will inspire imaginative minds. The sky is the limit with Out Of The Box! This book is designed to help kids learn and play. They will learn about the idea of upcycling and reusing materials that otherwise would be thrown away. This book has 25 brilliant projects for them to choose from. Detailed instructions and photographs along with colorful inspiration sheets will delight and inspire for hours of endless fun. Out Of The Box will help kids develop their creativity and imagination through interactive play, and inspire them to find a thousand more projects to build. Think Out Of The Box! A box is

just a box, right? Wrong! It could be a pirate ship, a butterfly, or a family of penguins! Out of the box will encourage kids to see a cardboard box as more than junk. Kids can build their imaginations and creative skills by reusing household cardboard. Learn to build and decorate a range of projects to share, wear, and play with. This educational book will show kids how to: - Develop cardboard skills - Build a castle, city and pirate ship - Design penguins, butterflies, and rabbits - Create games like ring toss - Produce wearables like Pharaoh's finery and masks - Decorate funky flowers and lazy lizards - And much, much more! DK is all about inspiring young minds, teaching them new skills and expanding their knowledge, imaginations, and perspectives. Help them to realize their true potentials by adding to your DK collection today. Awards Book category winner of the Creative Play Award 2017

Out of the Box Shambhala Publications

Provides instructions, tips, and patterns for making games, toys, and other objects out of cardboard boxes.

Cat Castles Lonely Planet Kids

Eco-Friendly Cardboard Crafts to Make and Play With At last, a genius way for you to put all that cardboard lying around the house to good use! Mailing boxes, paper towel rolls, cereal cartons and more can be transformed into a range of crafts, toys and games that guarantee hours of fun, imaginative playtime. Blast off in a cardboard Rocket, set up a fun Ice Cream Cart or become royalty in a Castle Cubby with life-size play structures that will delight your little ones. Let big imaginations run wild with pretend play creations like cool Butterfly Wings, a handy Tool Belt or a Mini Monster Truck that's built for jumps and tricks. Create games that will challenge and engage your kids with projects like a Pinball Machine, Tabletop Soccer and Cardboard Labyrinth. With all of Kathryn's best tips and tricks for sourcing, upcycling and handling cardboard, plus a wide range of inventive projects, this incredible collection is your go-to guide for easy, eco-friendly ways to transform cardboard into crafty creations your kids will love.

Unboxed Capstone

The day the refrigerator arrives in its large brown carton, Christina Katerina and her mother are both excited, but for very different reasons. Christina quickly claims the box, where she creates a castle, a clubhouse, and other fantastic playthings with her sometimes-friend Fats Watson.

Quirk Books

How many times have you spent money on some fancy new things for your child, only to have her ignore the toy and instead crawl into the large box it came in? From Apartment Door Numbers to Storage Tote, Photo Frame, and even Mirror! You will be amazed at how much you can do with a simple cardboard box. This book shows you tons of idea made from cardboard-thing that you always have in your house. It comes with high quality illustrations for each project. Grab some paper, cardboard, duct tape, and other materials and invite your kids to join the process. Get this book and choose some interesting cardboard projects to make.

Adventures in Cardboard Lark Books

From easy toys and great gifts to wonderful room decorations, these 50 projects give children a terrific way to recycle and feel creative, too. "This appealing volume is not only a craft book; it also educates users to be more aware of packaging, waste, and of making conscious decisions about how products are used and discarded. Years of Earth Day ideas flow from between the covers of this creative book."—School Library Journal.

Recycled Crafts Ideas With Cardboard Walter Foster Jr

With topics sure to stimulate creative thinking and artistic prowess, these fun ocean crafts will motivate little ones to venture outside for inspiration. Perfect for your preK explorers and your elementary artists. Make a craft inspired by ocean--and learn something, too! What can you create with just a cardboard box and some construction paper? Your very own coral reef! Use easy-to-follow directions to make thirteen crafts (and one recipe), each one focused on the ocean. Crafts include fun facts and additional resources, giving covert learning opportunities for your little explorer and reducing screentime.

Craft Projects for Minecraft and Pixel Art Fans Capstone

Develop mobile virtual reality apps using the native Google Cardboard SDK for Android About This Book Learn how to build practical applications for Google's popular DIY VR headset Build a reusable VR graphics engine on top of the Cardboard Java SDK and OpenGL ES graphics libraries The projects in this book will showcase a different aspect of Cardboard development—from 3D rendering to handling user input Who This Book Is For The book is for established Android developers with a good knowledge level of Java. No prior OpenGL or graphics knowledge is required. No

prior experience with Google Cardboard is expected, but those who are familiar with Cardboard and are looking for projects to expand their knowledge can also benefit from this book. What You Will Learn Build Google Cardboard virtual reality applications Explore the ins and outs of the Cardboard SDK Java classes and interfaces, and apply them to practical VR projects Employ Android Studio, Android SDK, and the Java language in a straightforward manner Discover and use software development and Android best practices for mobile and Cardboard applications, including considerations for memory management and battery life Implement user interface techniques for menus and gaze-based selection within VR Utilize the science, psychology, mathematics, and technology behind virtual reality, especially those pertinent to mobile Cardboard VR experiences Understand Cardboard VR best practices including those promoted by Google Design Lab. In Detail Google Cardboard is a low-cost, entry-level media platform through which you can experience virtual reality and virtual 3D environments. Its applications are as broad and varied as mobile smartphone applications themselves. This book will educate you on the best practices and methodology needed to build effective, stable, and performant mobile VR applications. In this book, we begin by defining virtual reality (VR) and how Google Cardboard fits into the larger VR and Android ecosystem. We introduce the underlying scientific and technical principles behind VR, including geometry, optics, rendering, and mobile software architecture. We start with a simple example app that ensures your environment is properly set up to write, build, and run the app. Then we develop a reusable VR graphics engine that you can build upon. And from then on, each chapter is a self-contained project where you will build an example from a different genre of application, including a 360 degree photo viewer, an educational simulation of our solar system, a 3D model viewer, and a music visualizer. Given the recent updates that were rolled out at Google I/O 2016, the authors of Cardboard VR Projects for Android have collated some technical notes to help you execute the projects in this book with Google VR Cardboard Java SDK 0.8, released in May 2016. Refer to the article at <https://www.packtpub.com/sites/default/files/downloads/GoogleVRUpdateGuideforCardbook.pdf> which explains the updates to the source code of the projects. Style and approach This project based guide is written in a tutorial-style project format, where you will learn by doing. It is accompanied by in-depth explanations and discussions of various technologies, and provides best practices and techniques.
