A serious but readable study that should be widely read by all concerned with leadership issues. Long Range Planning This book is the most up-to-date available investigation of the understanding of tyranny and terror that psychologists, psychoanalysts and experts on group and institutional behaviour can provide. Manfred Kets de Vries has produced a masterpiece. He draws on a wealth of published research in the field and relates it in an academically excellent, yet eminently readable, way to the premier problem of the beginning of the 21st century. I strongly recommend it. Anton Obholzer, formerly Tavistock Centre London, Psychoanalyst and Organizational Consultant From constructive narcissism to reactive narcissism, we are but one step away from megalomania and terror. Professor Kets de Vries traces the origin of leadership by terror to

early childhood in this case study of Shaka Zulu. A gruesome story warns us that terror may be inherent in the human condition. Abraham Zaleznik, Harvard Business School, US Kets de Vries has written another terrific book on leadership. However, this work will prove both timely and insightful to students of leadership and political psychology. Through the tale of Shaka Zulu, Kets de Vries introduces us to our very own despotic tendencies and thus familiarizes the reader with the human side, however horribly oppressive and destructive, of leadership by terror. Here is a genuine contribution to the field of leadership studies. Michael A. Diamond, University of Missouri Columbia, US

What makes despotic leaders tick? How do they become despots? On a lesser (but far more common) scale: why are some people ruthlessly abrasive in the workplace? Why do some business leaders appear to lose their sense of humanity? How and why do they create a culture of fear, uncertainty and doubt in their companies? Lessons on Leadership by Terror attempts to

discover what happens to people when they acquire power, and whether the abuse of power is inevitable. Manfred Kets de Vries examines the life of the nineteenth-century Zulu king Shaka Zulu in order to help us understand the psychology of power and terror. During his short reign, Shaka Zulu established one of the most successful regimes based on terror that has ever existed, from which the traits of despotic leaders are illustrated. Shaka's life history is a study in the psychology of terror, and he can be a proxy for the behavior of any despot, be it from antiquity or modern times. From his leadership behavior fifteen cautionary lessons are derived, offering valuable principles for contemporary leaders. The book also explores the characteristics of totalitarian states, and discusses what can be done to prevent despotic leaders from coming to the fore. Clear parallels are drawn between Shaka's behavior and that of other, more contemporary, leaders including Hitler, Stalin, Pol Pot and Saddam Hussein. This fascinating and highly original book will

be of enormous interest to a broad audience from students and academics focusing on leadership, political science, and political psychology, to practitioners such as managers, executives, consultants, and leadership coaches.

In an increasingly monologic world of war, exploitation and fear of the other, dialogue within and between humans, and with the world around us, is critical to a humane future. This book explores dialogue and learning in theory, practice and praxis across a spectrum of lifelong education contexts. It develops a philosophical basis by examining the lives, works and dialogic traditions of four key thinkers: Socrates, Martin Buber, Mikhail Bakhtin and Paulo Freire. It then examines dialogue and learning in contexts ranging from early childhood development to adult, community and higher education. In doing so, it develops and illustrates the innovative concepts of dialogic space, boundary learning and diacognition. It has a specific focus on learners and learning in contexts of oppression and marginality, and with a

view to personal and social emancipation. It is located in an African context, specifically South Africa, although its resonance is both local and global. The book marks an innovative contribution to our understanding of dialogue and learning, framed by the great dialogic traditions of the past, and is a dialogical provocation to the ongoing generation of praxis. This book is valuable for grounding lifelong learning experiences within an African context. It underlines the complexities involved in carrying out authentic dialogue at different stages of education in Africa throughout the lifespan, exploring cases of border crossing and boundary maintenance. Peter Mayo, University of Malta and Series Editor of the International Issues in Adult Education Series [A Practical Guide for Second Language Learners](#) Encyclopaedia Britannica, Inc. This volume covers the language situation in Malawi, Mozambique, and the Philippines explaining the linguistic diversity, the historical and political contexts and the current language situation - including language-in-

education planning, the role of the media, the role of the religion, and the roles of non-indigenous languages. The authors are indigenous and have been participants in the language planning context.

is to gather in a single narrative the rather disparate stories of Dominican friars in Southern Africa over the past four centuries. It is a social history of the Dominicans in Southern Africa, that is, a history that deals specifically with the social and cultural factors of historical development.
