Quantitative Human Physiology: An Introduction, winner of a 2018 Textbook Excellence Award (Texty), is the first text to meet the needs of the undergraduate bioengineering student who is being exposed to physiology for the first time, but requires a more analytical/quantitative approach. This book explores how component behavior produces system behavior in physiological systems. Through text explanation, figures, and equations, it provides the engineering student with a basic understanding of physiological principles with an emphasis on quantitative aspects. Winner of a 2018 Textbook Excellence Award (College) (Texty) from the Textbook and Academic Authors Association Features a quantitative approach that includes physical and chemical principles Provides a more integrated approach from first principles, integrating anatomy, molecular biology, biochemistry and physiology Includes clinical applications relevant to the biomedical engineering student (TENS, cochlear implants, blood substitutes, etc.) Integrates labs and problem sets to provide opportunities for practice and assessment throughout the course **NEW FOR THE SECOND EDITION** Expansion of many sections to include relevant information Addition of many new figures and re-drawing of other figures to update understanding and clarify difficult areas Substantial updating of the text to reflect newer research results Addition of several new appendices including statistics, nomenclature of transport carriers, and structural biology of important items such as the neuromuscular junction and calcium release unit Addition of new problems within the problem sets Addition of commentary to power point presentations

Excerpt from *Principles of Human Physiology: With Their Chief Applications to Psychology, Pathology, Therapeutics, Hygiene, and Forensic Medicine* In accordance with the foregoing plan, the Second, Third, and Fifth Chapters of the last Edition of this work, which included a summary of Animal Chemistry, and of the Structure and Actions of the Animal Tissues, amounting in all to about 250 pages, have been omitted from the present. On the other hand, additions have been made, to the amount of above 70 pages; and these by no means constitute the whole of the new matter introduced, since many portions have been re-written, with little or no increase of bulk. It has been the Author's desire, on this as on former occasions, that his Treatise should represent his present convictions and opinions, as completely as if it were making its appearance for the first time; and he has accordingly subjected every part of it to a revision not less careful than that which he would have bestowed upon it, had it less recently passed under a similar scrutiny. Although the minor results of this revision, which are scattered through almost every part of the volume, would not be apparent save on a searching comparison, yet he trusts that they will be found to have increased the utility of the work; - those of more importance, however, he deems it well now to particularize.
