Physical Science is a survey of the physical sciences-- physics, chemistry, astronomy, meteorology, and geology-- for non-science majors. This text gives instructors the flexibility to teach from approaches that range from highly descriptive to highly quantitative. Spotlight On feature uses figures, photos, or flowcharts to visually summarize a section or chapter.

Applying Your Knowledge questions, at the end of each chapter, tap into the practical applications of material.

 Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps,

sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact.

Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.
