When employees gain new knowledge, they can become more empowered and engaged in their work. But the knowledge

needs to be relevant and useful.

Microlearning—training delivered in short bursts—can provide the just-in-time learning employees need. “Microlearning to Boost the Employee Experience” explains how to build a microlearning library to promote effective workplace training. Author

Elise Greene Margol shares why microlearning is valuable and provide tips for creating suitable content for a microlibrary. In this TD at Work issue, you will find: · examples of successful microlearning initiatives · steps for building a microlearning program · suggested learning assets for a microlibrary ·

instructional design tips · a tool for assessing whether microlearning is the right choice.

10 years ago, in the flourishing atmosphere of India's high-tech city, Bangalore, SAP Labs was established as small development facility. Known to be one of the world's most promising destinations for foreign investments, India is where SAP AG chose to locate what is now their largest R&D and Services

Center outside Germany. The unique 10-year success story of this organization is presented by two authors who were instrumental in setting up business of SAP Labs India and contributed in growing it to today's strength of 4000 employees. The authors discuss development, innovation, and management strategies, combining their own personal experiences and those of other longtime company employees along with statements from SAP board members,

to provide a comprehensive and detailed picture of the events and reasoning behind the venture. Anyone interested in understanding the opportunities and challenges of carrying out distributed product development on a global scale from India will find this book an invaluable companion.

The History and Bioethics of Medical Education: "You've Got to Be Carefully Taught" continues the Routledge Advances in the History of Bioethics series by

exploring approaches to the teaching of bioethics from disparate disciplines, geographies, and contexts. Van Rensselaer Potter coined the phrase "Global Bioethics" to define human relationships with their contexts. This and subsequent volumes return to Potter's founding vision from historical perspectives and asks, how did we get here from then? The patient-practitioner relationship has come to the fore in bioethics; this volume asks: is there an ideal

bioethical curriculum? Are the students being carefully taught and, in turn, are they carefully learning? This volume will appeal to those working in both clinical medicine and the medical humanities, as vibrant connections are drawn between various ways of knowing.

This shorter version of the bestselling WORLDS OF MUSIC provides much of the authoritative coverage of the comprehensive version in a format that's accessible

to students without any background or training in music. Using a case-study approach, the text presents in-depth explorations of music from several cultures around the world. The authors, all working ethnomusicologists, base their discussions of music-cultures on their own fieldwork and give students a true sense of both the music and culture that created it. Editor Jeff Todd Titon's opening chapter introduces students to ethnomusicology and

relates each chapter's music to the fundamentals of music in a worldwide context, while the final chapter invites students to undertake a fieldwork research project that increases their understanding of music in daily life. Authentic recordings from the authors' fieldwork are keyed to the text and available online, giving students access to a wide range of music-cultures. These days, every hour of your workday is precious. You have to spend time on those activities that deliver quantifiable results. In this highly competitive environment, you need to boost your productivity to, in turn, boost your career. There is no other profession for which those realities apply more than sales. In

sales, we all want to have a healthy pipeline. But not every prospect in our pipeline is ready and willing to buy. In fact, there is a fair chance some on our list aren't prospects at all. In this second book by sales and productivity consultants Dan Schultheis and Phil Perkins, the authors revisit the important sales concepts introduced in their well-received first book, *Willing to Buy: A Questioning Framework for Effective Closing*. In addition, the authors introduce coaching

techniques that can be utilized by business owners, sales managers, and even sales professionals to reinforce the concepts highlighted in the first well-received book. Once you understand and master the four pillars of the Willing to Buy framework and put them into daily practice, you will not only increase sales but make your workday more enjoyable and productive. *The Complete Professional Part-1* BPP Learning Media This essential, comprehensive digital

These books offer essential reading selected from the pages of Harvard Business Review on topics critical to the success of every manager. Each book is packed with advice and inspiration from the best minds in business. [Rediscover Your Musical Passion](#) PHI Learning Pvt. Ltd. Liveness is a persistent and much-debated

concept in media studies. Until recently, it was associated primarily with broadcast media, and television in particular. However, the emergence of social media has brought new forms of liveness into effect. These forms challenge common assumptions about and perspectives on liveness, provoking a revisiting of the concept. In this book, Karin van Es develops a comprehensive understanding of liveness today, and clarifies the stakes surrounding the category of the live. She

argues that liveness is the product of a dynamic interaction between media institutions, technologies and users. In doing so, she challenges earlier conceptions of the notion, which tended to focus on either one of these contributors to its construction. By analyzing the live in four different cases – a live streaming platform, an online music collaboration website, an example of social TV, and a social networking site – van Es explores the operation of the category and pinpoints the

conditions under which it comes into being. The analysis is the starting point for a broader reflection on the relation between broadcast and social media.

This book explores the impact of contextualized worship arts on the development of church ministry and missions in urban churches in Beira, Mozambique. This applied research, which took place over the course of two years, focuses on

expanding the song-writing workshop model in an effort to enhance culturally appropriate worship in the local church. Results of this study include increased use of local hymnody, intentional use of worship to teach theological truths, engaged pastors and empowered worship leaders, and a greater missional involvement through the use of contextualized worship arts. This book clearly demonstrates the necessity of contextualized worship

arts as a key component of local church growth and the development of its members, encouraging personal discipleship, growing local ministry, and empowering for mission.

You will read how the writer survived a near-fatal motor vehicle accident, which resulted in three skull fractures, a bruised brain, an eight-day coma and having to relearn how to walk and talk - made all the more challenging by a lingering

speech impediment acquired in childhood. Stuttering is an awful burden for a person to carry throughout life. Children can be cruel. The writer's utmost fear, speaking in public, would one day be an ally and allow him to present programs extensively throughout the United States. This book is not about surviving adversity. It's about thriving beyond adversity. Greg Little, a nationally renowned speaker and motivator, has presented to diverse groups, including health

care, business and professional organizations, and educational institutions. His programs emphasize active involvement by participants. Whether teaching professionals to cope with stress, bond as a productive group or realize their hidden strengths, his seminars and keynote addresses are hard hitting and memorable. The most comprehensive book of its kind, Social Work in Health Settings presents a "practice in context" framework which

is then applied in thirty-one casebook chapters, covering a great variety of health care settings from working with survivors of domestic violence through supporting people with HIV to services for military personnel. Reflecting the enormous changes in policy, health care delivery, insurance systems, and the diagnosis and treatment of many conditions, this third edition features all new case chapters. Each chapter considers the impact of dimensions of context including policy,

technology and organization on the client situation and then explores the key practice decisions that structure the helping relationship: the definition of the client; determining goals, objectives and contract; meeting place; use of time; strategies and interventions; stance of the social worker; use of resources outside of the social worker/client relationship; reassessment and

evaluation; and transfer or termination. This thought-provoking volume thoroughly integrates social work theory and practice, and provides an excellent opportunity for understanding particular techniques and interventions. In this era of managed care, downsizing, and moving away from hospital-based work, the approach taken in *Social Work in Health Settings* proves more salient than ever before.
