Understanding the global hotel business is not possible without paying specific attention to hotel chain management and dynamics. Chains are big business, approximately 80 percent of hotels

currently being constructed around the world are chain affiliated and, in 2014, the five largest brands held over a one million rooms. This Handbook aids in filling the gap by exploring and critically evaluates the debates, issues and controversies of all

aspects of hotel chains from their nature, fundamentals of existence and operation, expansion, strategic and operational aspects of their activities and geographical presence. It brings together leading specialists from range of disciplinary backgrounds and regions to provide state-of-the-art theoretical reflection and empirical research on current issues and future debates. Each of the five inter-related section explores and evaluates issues that are of extreme importance to

hotel chain management, focusing on theoretical issues, the expansion of hotel chains, strategic and operational issues, the view point of the individual affiliated hotel and finally the current and future debates in the theory and practice of hotel chain management arising from globalisation, demographic trends, sustainability, and new technology development. It provides an invaluable resource for all those with an interest in hotel management, hospitality, tourism and business

encouraging dialogue across disciplinary boundaries and areas of study. Examine the reasons for the rapid growth of China's tourism industry  
Tourism and Hotel Development in China: From Political to Economic Success is a comprehensive guide to the development of the tourism industry in Mainland China following the end of the Cultural Revolution. Conceived as a textbook but equally valuable as a professional

resource for consultants, researchers, and tourist organizations, this insightful book tracks the unique circumstances that sparked the growth of China's tourism and hotel industry from a political, diplomatic activity to a burgeoning economic industry. The book includes background information on geography, culture, history, politics, and economics, and examines the evolution of tourism policies, inbound vs. outbound travel, hotel operations and trends, and the Chinese

government's role in developing tourism. China may be a latecomer to international tourism development, but visitors have made it one of the world's top 10 travel destinations every year since 1994. Since historic policy shifts in 1978 opened China's doors to the outside world, inbound tourism has played a significant role in building a national economy. And the increase in disposable income among China's citizens has helped create a sizable market for

domestic and outbound tourism as well. Tourism and Hotel Development in China looks at the major factors and characteristics of each type of tourism, international hotel development trends and their influence on China's hotel industry, related human resources issues, travel services, the development of hotel chains in China, compensation and incentive management, and the future of China's tourism and hotel industry. Topics examined in Tourism and Hotel

Development in China include: travel and tourism, pre-and post-1949 the Asia market the intercontinental market international tourism in different regions of China popular urban tourist destinations in China approved outbound destinations outbound travel to Hong Kong challenges facing travel services local protectionism travel agencies hotel franchising foreign vs. local hotel chains outsourcing and much more! Tourism and Hotel Development in

China: From Political to Economic Success follows the journey of China's tourism industry from a public relations vehicle, restricted by the economy and controlled by the government, to an important source of commerce for a country whose national economy was nearly on the verge of collapse.

original plans, so you can really study what works. Extensive case studies demonstrate how a successful new concept is developed. Hotel Design, Planning and Development gives you a thorough overview of this important and fast-growing sector of the hospitality industry.

Planning and Development Routledge The hospitality sector is facing increasing competition and complexity over recent decades in its development towards a global industry. The strategic response to this is still that hospitality companies try to grow outside their traditional territories and domestic markets, while the expansion patterns and M&A activities of international hotel and restaurant chains reflect this phenomenon. Yet,

interestingly, the strategies, concepts, and methods of internationalization as well as the managerial and organizational challenges and impacts of globalizing the hospitality business are under-researched in this industry. While the mainstream research on international management offers an abundance of information and knowledge on topics, players, trends, concepts, frameworks, or methodologies, its ability to produce viable insights

for the hospitality industry is limited, as the mainstream research is taking place outside of the service sector. Specific research directions and related cases like the international dimensions of strategy, organization, marketing, sales, staffing, control, culture, and others to the hospitality industry are rarely identifiable so far. The core rationale of this book is therefore to present newest insights from research and industry in the field of international

hospitality, drawing together recent scientific knowledge and state-of-the-art expertise to suggest directions for future work. It is designed to raise awareness on the international factors influencing the strategy and performance of hospitality organizations, while analyzing and discussing the present and future challenges for hospitality firms going or being international. This book will provide a comprehensive overview and deeper understanding of trends and issues to

researchers, practitioners, and students by showing how to master current and future challenges when entering and competing in the global hospitality industry.
