Its low power and small size make it suitable for portable, battery-powered applications.

## ADAS1000 Datasheet and Product Info | Analog Devices

The evaluation kit consists of an evaluation board kitted with two ADAS1000 devices capable of demonstrating ECG capture up to 12 leads. This board is ideal for exploring concepts and adopting the ADAS1000 into advanced medical systems. The board can be operated as part of an end user's system via the ADAS1000 SPI interface or as a standalone evaluation of the ADAS1000 using the support of the controller board and a standard PC

to run the evaluation software.

Evaluation Board for ADAS1000 ECG Front End  
The Evaluation Board for ADAS1000 ECG Front End demonstrates the

integrated ECG device for medical instrumentation.

It is ideal for exploring concepts and integrating the ADAS1000 into advanced medical

systems and can be operated as part of an end users system via the ADAS1000 SPI interface or as a standalone evaluation of the ADAS1000.
