*Paul Kossoff: All Right Now* MIT Press

From the foreword: "One of the High Line's powers is its ability to evoke time, to remind us of the changes we've experienced during our own lives, to bring forth echoes of the past, and to make us guess what life might be like years from now. I love the photos on these pages, because they have that power, too." --Joshua David, Co-Founder of the Friends of the High Line. Ten Avenues Press, in association with Friends of the High Line, announce the publication of *High Line Nudes*. In 2006, photographer Kevin McDermott took three of his friends up on the abandoned railroad tracks that would become New York City's High Line park to shoot a series of nudes. As McDermott states in his introduction, "at the time I took these photos, what I sought from its beauty was its sense of isolation, being alone, surrounded by nature in the middle of this metropolis." A decade later, this location is now one of the most visited tourist destinations in NYC and one of the largest real estate developments in the world. *High Line Nudes* captures a seemingly impossible, but beautiful moment in the history of the West Side Rail Yards, Chelsea and an ever changing New York City. The cloth hardcover book is beautifully printed in color and rich black and white duotone images.

*Bently & Egg* Robert Lee

Communism in twentieth-century Europe is predominantly narrated as a totalitarian movement and/or regime. This book aims to go beyond this narrative and provide an alternative framework to describe the communist past. This reframing is possible thanks to the concepts of generation and gender, which are used in the book as analytical categories in an intersectional overlap. The publication covers twentieth-century Poland, Czechoslovakia/Czech Republic, the Soviet Union/Russia, former Yugoslavia, Turkish communities in West Germany, Italy, and Cuba (as a comparative point of reference). It provides a theoretical frame and overview chapters on several important gender and generation narratives about communism, anticommunism, and postcommunism. Its starting point is the belief that although methodological reflection on communism, as well as on generations and gender, is conducted extensively in contemporary research, the overlapping of these three terms is still rare. The main focus in the first part is on methodological issues. The second part features studies which depict the possibility of generational-gender interpretations of history. The third part is informed by biographical perspectives. The last part shows how the problem of generations and gender is staged via the medium of literature and how it can be narrated.

*CA Magazine* Basic Books (AZ)

With blue, green, and gold foliage and shapes ranging from spiky to weeping, conifers have the potential to be garden design stars. But they are commonly misused in gardens and landscapes, leading to looming spruces squashed against a house or rows of kettledrum-shaped yews along a sidewalk. When used correctly and creatively, conifers can be star players in creating beautiful,

long-lasting plant combinations or serene backyard havens. *Designing with Conifers* shows readers exactly how to choose the best conifers for specific needs. Chapters cover shape, color, and conifers for specific sites and conditions, including front gardens, hedges and screens, topiary, dwarf conifers, shade gardens, Asian-style gardens, bonsai, and miniature railroad gardens. Also includes useful appendices that list of conifers for various problems and conditions, like conifers for areas plagued by deer and the best conifers for Christmas trees and Southern gardens. Each section is enlivened with gorgeous color photographs. Whatever landscape situation or challenge a gardener designer faces, *Designing with Conifers* shows how to make the best choice from this beautiful, useful, and versatile group of plants.

*The GenX Reader* Albatross Press

Affectionately known as 'Koss', Paul Kossoff's playing touched people. It still does today, more than forty years after his sad and untimely death at the age of twenty-five. This authorised biography pays fitting tribute to a much-loved and widely admired musician whose influence and inspiration is still very evident. It's all here: Kossoff's musical childhood, his formative years with Black Cat Bones, forming Free at seventeen, that group's dizzying success, breakup, reforming and dissolution, the solo years, Back Street Crawler - the sessions, the tours and big concerts, the triumphs, the tragedies and the heartbreak - J.P. James takes the reader right there. Over four distinct sections, Kossoff's many guitars and the equipment he used to make them sing are fully documented; a brand-new detailed analysis of Kossoff's distinctive playing style and technique is presented for the first time; a broad overview of Kossoff's creative life draws on the voices of family, friends and fellow musicians; and finally, Kossoff's musical influences, approach to playing and his wider musical interests, hopes and dreams are explored - all drawn from his own words. Cramming so much into his short years, Paul Kossoff left a rich musical legacy, and he is indeed *All Right Now*. Thoroughly researched and sensitively written, given often in Kossoff's own words and packed with anecdotes from those who were there, musicians and fans alike will enjoy this authoritative and comprehensive biography.

*The ISDN Consultant* McGraw-Hill Humanities, Social Sciences & World Languages

Dean, Alex, and the other survivors of the Monument 14 have escaped the disaster zone and made it to the safety of a Canadian refugee camp. Some of the kids have even been reunited with their families and are making tentative plans for the future. Then, Niko learns that his lost love, Josie, has survived ... For Josie, separated from the group and presumed dead, life has gone from bad to worse. Trapped in a terrible prison camp with other exposed O blood types and traumatized by her experiences, she has given up all hope of rescue. Meanwhile, scared by the government's unusual interest in her pregnancy, Astrid - along with her two protectors, Dean and Jake - flees the camp to join Niko on his desperate quest to be reunited with Josie. In a stunningly fierce conclusion to the Monument 14 trilogy, author Emmy Laybourne ups the stakes even more for a group of kids who have already survived the unthinkable. Can they do so one last time? 'Monument 14 is raw, honest, gritty, and full of emotionally taut storytelling. I had to hug so many kittens after reading it that the

pet store asked me not to come back." Lish McBride, author of *Hold Me Closer, Necromancer* 'Riveting' New York Times

**Molecular Visions (Organic, Inorganic, Organometallic) Molecular Model Kit #1 by Darling Models to accompany Organic Chemistry** Matador

*The Minimalist Vegan* by Masa and Michael Ofei is less of a how-to book, and more of a why-to book. A manifesto on why to live with less stuff and with more compassion. They explore the intersection of minimalism and veganism and all that each complimentary lifestyle has to offer. They dive deep into conscious living and what it actually means. With chapters on topics such as "The More Virus" and *Courageously Simple* to *The Superior Species* and *A Plastic World*, Masa and Michael cover every aspect to help challenge your way of thinking. Their hope is that by the end of it, you'll have the thirst and passion to architect your life in a way that brings you purpose and joy each and every day. They have written this book to be read within a few hours. Yes, even if you'd consider yourself to be a slow reader! Each chapter can be read independently, so you can jump ahead to a section that resonates with you. However, reading the book from start to finish is a great way to build momentum as you manifest your ideas and dive into a more conscious way of living.

**I Am a Strange Loop** Georgia Le Carre

How lessons from kindergarten can help everyone develop the creative thinking skills needed to thrive in today's society. In kindergartens these days, children spend more time with math worksheets and phonics flashcards than building blocks and finger paint. Kindergarten is becoming more like the rest of school. In *Lifelong Kindergarten*, learning expert Mitchel Resnick argues for exactly the opposite: the rest of school (even the rest of life) should be more like kindergarten. To thrive in today's fast-changing world, people of all ages must learn to think and act creatively—and the best way to do that is by focusing more on imagining, creating, playing, sharing, and reflecting, just as children do in traditional kindergartens. Drawing on experiences from more than thirty years at MIT's Media Lab, Resnick discusses new technologies and strategies for engaging young people in creative learning experiences. He tells stories of how children are programming their own games, stories, and inventions (for example, a diary security system, created by a twelve-year-old girl), and collaborating through remixing, crowdsourcing, and large-scale group projects (such as a Halloween-themed game called *Night at Dreary Castle*, produced by more than twenty kids scattered around the world). By providing young people with opportunities to work on projects, based on their passions, in collaboration with peers, in a playful spirit, we can help them prepare for a world where creative thinking is more important than ever before.

Argues that the key to understanding ourselves and consciousness is the "strange loop," a special kind of abstract feedback loop that inhabits the brain.

**Gems from Tozer** McGraw-Hill Education

California-Mexican-style recipes and menus from the beloved Food Network host From the long-time host of Food Network's *Mexican Made Easy* and now co-host of *The Kitchen* comes Marcela's most personal collection of recipes yet, a reflection of her experience growing up in Tijuana and traveling back and forth to San Diego to see family and friends and for school. This book captures a culture centered around food, loved ones, and gatherings with mouthwatering recipes and in vibrant

photography, all shot at Valladolid's home. Mexican food really is simple at its core, if you have some extra time for slow roasting meats or to prepare a few salsas, and the results are sure to impress. There are small bites like Cod Fritters with Chipotle Tartar Sauce and Grilled Steak and Cheese Tostadas; entrees such as Red Chile Lamb Stew and Roasted Tomatillo Salmon; and even drinks and desserts for special occasions, including Strawberry Layered Tres Leches Cake. With mouthwatering recipes and evocative photography, Casa Marcela presents Mexican food in a way never seen before.

The New York Times bestselling author draws from his popular show #AskGaryVee to offer surprising, often outrageous, and imminently useful and honest answers to everything you've ever wanted to know—and more—about navigating the new world. Gary Vaynerchuk—the inspiring and unconventional entrepreneur who introduced us to the concept of crush it—knows how to get things done, have fun, and be massively successful. A marketing and business genius, Gary had the foresight to go beyond traditional methods and use social media tools such as Twitter, Facebook, and YouTube to reach an untapped audience that continues to grow. #AskGaryVee showcases the most useful and interesting questions Gary has addressed on his popular show. Distilling and expanding on the podcast's most urgent and evergreen themes, Gary presents practical, timely, and timeless advice on marketing, social media, entrepreneurship, and everything else you've been afraid to ask but are dying to know. Gary gives you the insights and information you need on everything from effectively using Twitter to launching a small business, hiring superstars to creating a personal brand, launching products effectively to staying healthy—and even buying wine. Whether you're planning to start your own company, working in digital media, or have landed your first job in a traditional company, #AskGaryVee is your essential guide to making things happen in a big way.

**Savage Drift** Springer Nature

Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behaves the reader to consider tha

Cursed by older generations, Generations X means a lot of things to a lot of people. They are a culture, a demographic, an outlook, a style, an economy, a scene, a literature, a political ideology, an aesthetic, an age, a decade, and a way of life. Here is a collage of the most revered voices of

Generation X, demonstrating that while twentysomethings may, indeed, have dropped out of American culture (as it is traditionally defined), they also stand as a testament to American ingenuity, optimism, instinct, and intelligence.

Empath Echo Branson had finally found a home in the bayou, until a hurricane swept it away and left something hungry in its place.

Lifelong Kindergarten Tata McGraw-Hill Education

This is the legendary book that started it all! The UK banned it. The US Government wanted to know, "how did he get all this information? It's all classified!" The book that started thousands of careers in information security and was ignored by Congress, NATO, Allied countries and because of that, the world is at CyberWar - just as Winn Schwartau showed in exacting detail. This ground breaking book is more relevant than ever - and is the primer for how and why we are in the mess of cyberwar and cyberterrorism we are in now. It sold almost 400,000 copies and should be on every shelf - or Kindle! for anyone who cares about information security. Information Warfare outlines it all! All of its predictions have come true... and you should know why. For a couple of bucks... just get it.

You know those "mmmmm..." moments? You're reading a pretty good book and then suddenly you stumble upon that one paragraph. It's a paragraph so rich and profound that you find yourself reaching for the nearest underlining device before you know what hit you. A. W. Tozer was famous for embedding such paragraphs in all of his writing. Gems from Tozer is a collection of the "mmmmm..." paragraphs from Tozer's most popular books, booklets, and leaflets. So, you can get the best nuggets of wisdom from over twenty sources in one profundity-packed volume. And these gems are organized by topic so you can focus on what's most relevant to you. Whether you want to learn more about worship, the Holy Spirit, or the pursuit of God, you'll find concise and timeless wisdom herein. Discover Tozer's greatest treasures today.

Information Warfare HarperCollins

Molecular models are as vital a tool for the study of chemistry as calculators are for the study of mathematics. Molecular Visions models may be assembled in infinite combinations enabling the user to construct not only familiar configurations but also undiscovered possibilities. Models are intended to inspire the imagination, stimulate thought, and assist the visualization process. They present the user with a solid form of an abstract object that can otherwise only be visualized by the chemist. While chemistry textbooks use letters and graphics to describe molecules, molecular models make them "real". MOLECULAR VISIONS Organic Kit #1 is in a green plastic box, 9"x4"x2"
