**Genius Intelligence** Simon and Schuster

Philosopher, entrepreneur, and former National Geographic and New York Times correspondent Zoltan Istvan presents his visionary novel, *The Transhumanist Wager*, as a seminal statement of our times. Scorned by over 500 publishers and literary agents around the world, his philosophical thriller has been called "revolutionary" and "socially dangerous" by readers, scholars, and religious authorities. The novel debuts a challenging original philosophy, which rebuffs modern civilization by inviting the end of the human species—and declaring the onset of something greater. Set in the present day, the novel tells the story of transhumanist Jethro Knights and his unwavering quest for immortality via science and technology. Fighting against him are fanatical religious groups, economically depressed governments, and mystic Zoe Bach: a dazzling trauma surgeon and the love of his life, whose belief in spirituality and the afterlife is absolute. Exiled from America and reeling from personal tragedy, Knights forges a new nation of willing scientists on the world's largest seasteading project, Transhumania. When the world declares war against the floating city, demanding an end to its renegade and godless transhuman experiments and ambitions, Knights strikes back, leaving the planet forever changed.

"Lovely, celebratory. For all the belittling of 'bird brains,' [Ackerman] shows them to be uniquely impressive machines . . ." —New York Times Book Review "A lyrical testimony to the wonders of avian intelligence." —Scientific American An award-winning science writer tours the globe to reveal what makes birds capable of such extraordinary feats of mental prowess. Birds are astonishingly intelligent creatures. According to revolutionary new research, some birds rival primates and even humans in their remarkable forms of intelligence. In *The Genius of Birds*, acclaimed author Jennifer Ackerman explores their newly discovered brilliance and how it came about. As she travels around the world to the most cutting-edge frontiers of research, Ackerman not only tells the story of the recently uncovered genius of birds but also delves deeply into the latest findings about the bird brain itself that are shifting our view of what it means to be intelligent. At once personal yet scientific, richly informative and beautifully written, *The Genius of Birds* celebrates the triumphs of these surprising and fiercely intelligent creatures. Ackerman is also the author of *Birds by the Shore: Observing the Natural Life of the Atlantic Coast*.

"An unusually engaging book on the forces that fuel originality across fields." —Adam Grant Looking at the 14 key traits of genius, from curiosity to creative maladjustment to obsession, Professor Craig Wright, creator of Yale University's popular "Genius Course," explores what we can learn from brilliant minds that have changed the world. Einstein. Beethoven. Picasso. Jobs. The word genius evokes these iconic figures, whose cultural contributions have irreversibly shaped society. Yet Beethoven could not multiply. Picasso couldn't pass a 4th grade math test. And Jobs left high school with a 2.65 GPA. What does this say about our metrics for measuring success and achievement today? Why do we teach children to behave and play by the rules, when the transformative geniuses of Western culture have done just the opposite? And what is genius, really? Professor Craig Wright, creator of Yale University's popular "Genius Course," has devoted more than two decades to exploring these questions and probing the nature of this term, which is deeply embedded in our culture. In *The Hidden Habits of Genius*, he reveals what we can learn from the lives of those we have dubbed "geniuses," past and present. Examining the lives of transformative individuals ranging

from Charles Darwin and Marie Curie to Leonardo Da Vinci and Andy Warhol to Toni Morrison and Elon Musk, Wright identifies more than a dozen drivers of genius—characteristics and patterns of behavior common to great minds throughout history. He argues that genius is about more than intellect and work ethic—it is far more complex—and that the famed "eureka" moment is a Hollywood fiction. Brilliant insights that change the world are never sudden, but rather, they are the result of unique modes of thinking and lengthy gestation. Most importantly, the habits of mind that produce great thinking and discovery can be actively learned and cultivated, and Wright shows us how. This book won't make you a genius. But embracing the hidden habits of these transformative individuals will make you more strategic, creative, and successful, and, ultimately, happier.

**Genius Intelligence** Sounds True

The perfect gift for dog lovers and readers of *Inside of a Dog* by Alexandra Horowitz—this New York Times bestseller offers mesmerizing insights into the thoughts and lives of our smartest and most beloved pets. Does your dog feel guilt? Is she pretending she can't hear you? Does she want affection—or just your sandwich? In their New York Times bestselling book *The Genius of Dogs*, husband and wife team Brian Hare and Vanessa Woods lay out landmark discoveries from the Duke Canine Cognition Center and other research facilities around the world to reveal how your dog thinks and how we humans can have even deeper relationships with our best four-legged friends. Breakthroughs in cognitive science have proven dogs have a kind of genius for getting along with people that is unique in the animal kingdom. This dog genius revolution is transforming how we live and work with dogs of all breeds, and what it means for you in your daily life with your canine friend. *Think Like Sherlock Holmes* Hay House, Inc

How do you catch a man who is never the same man twice? That is the question posed in *The Ninth Orphan*, a top-rated international thriller novel and the first book in *The Orphan Trilogy*. An orphan grows up to become an assassin for a highly secretive organization. When he tries to break free and live a normal life, he is hunted by his mentor and father figure, and by a female orphan he spent his childhood with. On the run, the mysterious man's life becomes entwined with his beautiful French-African hostage and a shocking past riddled with the darkest of conspiracies is revealed. But can the ninth-born orphan ever get off the grid? To find out you'll need to go on a tumultuous journey around the globe to such far-flung locations as China, France, the Philippines, Andorra, America, England, Germany and French Polynesia. The frenetic cat-and-mouse chase moves from airports to train stations and hidden torture prisons, taking the reader on a shocking, nail-biting ride into the world's closet of skeletons that goes beyond conspiracy theories to painful reality. Fast-paced, totally fresh and original, filled with deep and complex characters, *The Ninth Orphan* is a controversial, high-octane thriller with an edge. Merging fact with fiction, it illuminates shadow organizations rumored to actually exist in our world. The novel explores a plethora of conspiracies involving real organizations like the CIA, MI6, and the UN, and public figures such as President Obama as well as the Clinton, Marcos and Bush families. Tackling genetic selection, mind control and secret societies, *The Ninth Orphan* exposes a global agenda designed to keep the power in the hands of a select few. The novel's antagonists are members of a shadow government acting above and beyond the likes of the White House, the FBI, the Pentagon and the NSA. Could something like this ever take place? Or, is it already taking place right now? This unique and unpredictable thriller also has a poignant, romantic sub-plot. The story contains the kind of intimate character portraits usually associated with psychological novels. Buckle up for a wild trip full of death-defying action, cloak and dagger intrigue, unexpected role reversals and surprise endings. Written by father-and-son writing team Lance & James Morcan (authors of *The Orphan Factory*, *The Orphan Uprising* and *Fiji: A Novel*), *The Ninth Orphan* is Book #1 in *The Orphan Trilogy*. A feature film adaptation of *The Ninth Orphan* is also

currently being developed.

This book shows how the Bhagavad Gītā (part of the great Indian epic — the Mahābhārata) can be approached as a powerful tool for change management and as a catalyst for organizational transformation. It presents time-tested leadership strategies drawn from the Bhagavad Gītā that are relevant for today's leaders. This book focuses on how to harmonize the needs of the individual with the needs of society, and by extension, how to harmonize the needs of employees and the organization. It employs an inside-out leadership development approach based on Self-knowledge and Self-mastery, the two highly important areas for practicing effective Self-leadership. The Gītā is a non-sectarian spiritual text with a universal message for living a life of meaning, purpose, and contribution and for leading from our authentic self. It shows how to manage oneself, as a necessary prelude to leading others. Students and organizational leaders will learn to integrate leadership function more effectively into all aspects at the individual, team, and institutional level.

The brain's potential is the human potential! What if there are faster and easier ways to learn and study than the modi operandi currently being taught in mainstream education systems? GENIUS INTELLIGENCE: Secret Techniques and Technologies to Increase IQ is the ultimate treatise on accelerated learning methods. Written by novelists, filmmakers and independent researchers James Morcan & Lance Morcan with a foreword by leading scientist Dr. Takaaki Musha, this book shatters the myth that geniuses are born not developed. It reveals how most instances of above-the-ordinary intelligences are acquired thru superior cognitive techniques or brain enhancing technologies. Renowned geniuses examined include Apple founder Steve Jobs who as a 19-year-old began practicing an ancient discipline that activated previously dormant parts of his brain; Albert Einstein who came up with his great theory of relativity while using a rare method for accessing the subconscious mind; Kim Peek (the real 'Rain Man') who could speed read any book in five minutes flat with total comprehension; Indian mathematical mastermind Srinivasa Ramanujan who, although untrained, created extraordinary formulas that left academics gobsmacked; Wolfgang Amadeus Mozart who composed entire pieces while in a specific altered state of mind. Among the discoveries shared with readers are brain waves common to geniuses and the various ways to induce those brain waves; mental techniques the world's elite and A-List celebrities are quietly using to help them process information while they're asleep or in virtual worlds; chemical substances students and academics the world over employ to kick-start the brain into overdrive; and cutting-edge technologies business tycoons and professional athletes employ to gain a cerebral edge over their competitors. Drawing on the latest findings in neuroscience, GENIUS INTELLIGENCE lists dozens of practical methods to increase IQ and speed-learn any subject. "Talent hits a target no one else can hit. Genius hits a target no one else can see." -Arthur Schopenhauer "The knowledge of all things is possible" -Leonardo da Vinci

"This book by Carson, Marion, and Overdurf is an excellent exploration of the extraordinary trance process of deep trance identification. It is thorough, practical, and clear thereby providing an excellent guide for those seeking far-reaching transformational change. I highly recommend it" Stephen Gilligan Ph.D Generative Trance. Deep Trance Identification (DTI) has captivated the imagination of hypnotists since the mid 20th century. DTI has been used by countless modelers to master hypnosis skills, musical and acting abilities, emotional transformation, and so much more. Historically very little is written about DTI despite it being at the heart of all unconscious learning and transformation. For the first time DTI is presented here in a practical and easily understandable way. Shawn Carson, Jess Marion, and John Overdurf have dedicated years to studying and using DTI and in this book they share their discoveries. They present the art and neuroscience of this hypnotic phenomenon and explain how you can use this modality to change your life and the lives of your

clients. Deep Trance Identification presents an elegant model for using DTI and outlines comprehensive techniques that make the DTI experience deeply transformative.

The book covers numerous tech entrepreneurial founders and software developers, and the exciting brands or products that they created. It goes deep on a handful of them, narrowly divulging exactly how a few software developers and startup founders created breakthrough tech products like Gmail, Dropbox, Ring, Snapchat, Bitcoin, Groupon, and more. It highlights and unpacks the general hero-worship that the media and our own minds practice about tech founders and tech entrepreneurs. This idealization of tech success can create a paradox, preventing average tech professionals from their own successful journeys. This book provides hard evidence that anyone in tech can create, and anyone on the peripheral of tech can break through to the center where innovation, creativity, and opportunity meet. The anecdotes, stories, evidence, facts, arguments, logic, principles, and techniques provided in this book have helped individuals and businesses engage in slow creation cycles, improve the morale of their development teams, and increased their delivery potential of their technology solutions overall. Average Joe covers: Genius - The systematic deconstruction and debunking of the commonly held assumptions in the tech industry around supreme intelligence, and how that intelligence has been worshipped and sought after, despite the facts. Slow Creation - How to force-manufacture creative ideation. How conscious and subconscious cycles of patterns, details, and secrets can lead to breakthrough innovations, and how those P.D.S. cycles, and systematic mental grappling, can be conjured and repeated on a regular basis. Little-C Creativity - The conscious and miniature moments of epiphany that leak into our active P.D.S. cycles of Slow Creation. Flow - Why it's great, but also - why it's completely unreliable and unnecessary. How to perpetually innovate without relying on a flow state. Team Installation - How teams and companies can engage their employees in Slow Creation to unlock dormant ideas, stir up creative endeavors, and jumpstart fragile ideas into working products. User Manipulation - How tech products are super-charged with tricks, secret techniques, and neural transmitters like Dopamine, Oxytocin, and Cortisol; how those products leverage cognitive mechanisms and psychological techniques to force user adoption and user behaviors. Contrarianism - How oppositional and backward-thinking leaders create brand-new categories and the products which dominate those categories. Showmanship - How tech players have presented their ideas to the world, conjured up magic, manufactured mystique, and presented compelling stories that have captured their audiences. Sustainable Mystique Triad - A simple model for capturing audiences consistently without relying on hype and hustle.

The biggest mystery of our era finally gets the balanced and unbiased investigation it deserves. 'ANTIGRAVITY PROPULSION: Human or Alien Technologies?' is a far-reaching exploration into the UFO phenomenon that covers all possible scenarios and discounts nothing. Written by novelists, filmmakers and independent researchers James Morcan & Lance Morcan, with a foreword by advanced interstellar propulsion systems expert Grant Hayman and an afterword by leading scientist and space industry veteran Dr. Takaaki Musha, one of the great enigmas of all time is examined with equal doses of open-mindedness and skepticism. This book includes never-before-mentioned accounts of popular UFO topics like Area 51, Roswell and alien abduction claims, as well as tackling less reported subjects such as Nazi and Japanese antigravity experiments and even rarer theories involving quantum physics and lost civilizations of the ancients. What do all the sightings of UFO's around the world reveal? Who is covering up the existence of these strange craft in our skies? And are the technologies manmade or extraterrestrial in origin? Forget what you think you already know and prepare to be surprised. For those searching for the truth about these exotic technologies and wanting to know why they are being concealed from the public, ANTIGRAVITY PROPULSION is a must read.

Idiot Genius: Willa Snap and the Clockwerk Boy is the first book in a new sci-fi polypunk series by Richard Due, author of the award-winning Moon Realm series. What's it about? Here's Willa (she's eleven): Ever wonder why some crazy scientist hasn't blown up the world? I used to wonder about it all the time. Actually, I was pretty sure my mom would be the one to do it. But now I know better. It turns out there's a force working hard to keep the world from going KABLOOEY. Who are these people? Wait for it: Idiots. Yep, you heard me right. How do I know? Well, apparently, I'm an idiot. At least, according to the Geniuses I am. Confused? I'm not surprised. You're probably an idiot too. It all began on a Thursday at precisely 8 a.m. I was standing in the family room of our lovely two-story house, directly across the street from Squirrel Brand Park in Cambridge, Massachusetts. The same family room that, in a few minutes, I would never ever, ever see again. Ever.

It is easily can be proved that the human brain equipped sense organs can work as an universal measuring tool, and measure with sufficient accuracy after some training not only a distance, mass or volume, but and parameters of important personal functions. Unfortunately, this instrument does not have an indicator device (panel) and results of measurements usually hidden in the depth of subconscious part of mind. To extract these results of measurements, at first, is needed to find an access code for this information, secondly, to deduce this information in a convenient for perception

form, and after that to decipher it. Based on this approach a new method of direct measurement of intellectual parameters was used for appraisal such characteristics of intellect and mind as creativity, intuition, willpower, stress level, vital energy index, etc. Verification of the accuracy of measurement of some bio-physical parameters measured by the same method (for example number of thrombocytes in the blood) is carried out by comparison with laboratory blood tests. Research and physical measurements of a person's intellectual abilities have shown that they can change significantly from the influence of many external factors and, first of all, of light, electromagnetic and sound perceptions of the senses, both for the better and for the worse. This allows significantly increasing the capabilities and expanding the range of use of any entrainment technology. Using algorithms of multi-parameter optimization, the method allows increasing the level of intellect and its components in several times practically for everyone. Measurement of willpower and stress opens the prospect for many people to maintain their health and activity at the proper level throughout life. In the book are collected also some rules and methods allowing to support intellectual abilities of the mind on an optimum level by means of mindset management, control of the subconscious mind, cognitive control, and control emotions. Method of measurement of intellectual abilities and compatibility of team members can be used in process of the hiring, searching a bride, etc.

THE MILLION COPY INTERNATIONAL BESTSELLER Drawn from 3,000 years of the history of power, this is the definitive guide to help readers achieve for themselves what Queen Elizabeth I, Henry Kissinger, Louis XIV and Machiavelli learnt the hard way. Law 1: Never outshine the master Law 2: Never put too much trust in friends; learn how to use enemies Law 3: Conceal your intentions Law 4: Always say less than necessary. The text is bold and elegant, laid out in black and red throughout and replete with fables and unique word sculptures. The 48 laws are illustrated through the tactics, triumphs and failures of great figures from the past who have wielded - or been victimised by - power.

(From the Playboy interview with Jay-Z, April 2003)

PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In *The 48 Laws of Power*, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.
