Develop mobile virtual reality apps using the native Google Cardboard SDK for Android About This Book Learn how to build practical applications for Google's popular DIY VR headset Build a reusable VR graphics engine on top of the Cardboard Java SDK and OpenGL ES graphics libraries The projects in this book will showcase a different aspect of Cardboard development—from 3D rendering to handling user input Who This Book Is For The book is for established Android developers with a good knowledge level of Java. No prior OpenGL or graphics knowledge is required. No prior experience with Google Cardboard is expected, but those who are familiar with Cardboard and are looking for projects to expand their knowledge can also benefit from this book. What You Will Learn Build Google Cardboard virtual reality applications Explore the ins and outs of the Cardboard SDK Java classes and interfaces, and apply them to practical VR projects Employ Android Studio, Android SDK, and the Java language in a straightforward manner Discover and use software development and Android best practices for mobile and Cardboard applications, including considerations for memory management and battery life Implement user interface techniques for menus and gaze-based selection within VR Utilize the science, psychology, mathematics, and technology behind

virtual reality, especially those pertinent to mobile Cardboard VR experiences Understand Cardboard VR best practices including those promoted by Google Design Lab. In Detail Google Cardboard is a low-cost, entry-level media platform through which you can experience virtual reality and virtual 3D environments. Its applications are as broad and varied as mobile smartphone applications themselves. This book will educate you on the best practices and methodology needed to build effective, stable, and performant mobile VR applications. In this book, we begin by defining virtual reality (VR) and how Google Cardboard fits into the larger VR and Android ecosystem. We introduce the underlying scientific and technical principles behind VR, including geometry, optics, rendering, and mobile software architecture. We start with a simple example app that ensures your environment is properly set up to write, build, and run the app. Then we develop a reusable VR graphics engine that you can build upon. And from then on, each chapter is a self-contained project where you will build an example from a different genre of application, including a 360 degree photo viewer, an educational simulation of our solar system, a 3D model viewer, and a music visualizer. Given the recent updates that were rolled out at Google I/O 2016, the authors of Cardboard VR Projects for Android have collated some technical notes to help you execute the projects in this book with Google VR Cardboard Java SDK 0.8, released in May 2016. Refer to the article at <https://www.packtpub.com/sites/default/files/downloads/GoogleVRUpdateGuideforCardbook.pdf> which explains the

updates to the source code of the projects. Style and approach This project based guide is written in a tutorial-style project format, where you will learn by doing. It is accompanied by in-depth explanations and discussions of various technologies, and provides best practices and techniques.

For almost thirty years, David Thomson's Biographical Dictionary of Film has been not merely "the finest reference book ever written about movies" (Graham Fuller, Interview), not merely the "desert island book" of art critic David Sylvester, not merely "a great, crazy masterpiece" (Geoff Dyer, The Guardian), but also "fiendishly seductive" (Greil Marcus, Rolling Stone). This new edition updates the older entries and adds 30 new ones: Darren Aronofsky, Emmanuelle Beart, Jerry Bruckheimer, Larry Clark, Jennifer Connelly, Chris Cooper, Sofia Coppola, Alfonso Cuaron, Richard Curtis, Sir Richard Eyre, Sir Michael Gambon, Christopher Guest, Alejandro Gonzalez Inarritu, Spike Jonze, Wong Kar-Wai, Laura Linney, Tobey Maguire, Michael Moore, Samantha Morton, Mike Myers, Christopher Nolan, Dennis Price, Adam Sandler, Kevin Smith, Kiefer Sutherland, Charlize Theron, Larry Wachowski and Andy Wachowski, Lew Wasserman, Naomi Watts, and Ray Winstone. In all, the book includes more than 1300 entries, some of them just a pungent paragraph, some of them several thousand words long. In addition to the new "musts," Thomson has added key figures from film history—lively anatomies of Graham Greene, Eddie Cantor, Pauline Kael, Abbott and Costello, Noël Coward, Hoagy Carmichael, Dorothy Gish, Rin Tin Tin, and more. Here is a great, rare book, one that encompasses the chaos of art, entertainment, money, vulgarity, and nonsense that we call the movies. Personal, opinionated, funny, daring, provocative, and passionate, it is the one book that every filmmaker and film buff must own. Time Out named it one of the ten best books of the 1990s. Gavin

Lambert recognized it as "a work of imagination in its own right." Now better than ever—a masterwork by the man playwright David Hare called "the most stimulating and thoughtful film critic now writing."

In the middle of this century's first decade, "bromance" emerged as a term denoting an emotionally intense bond between straight men. Yet bromance requires an expression of intimacy that always toys with being coded as something other than "straight" male behavior, even as it insists that such intimacy must never be misinterpreted.

In *Reading the Bromance: Homosocial Relationships in Film and Television*, editor Michael DeAngelis has compiled a diverse group of essays that address the rise of this tricky phenomenon and explore the social and cultural functions it serves. Contributors consider selected contemporary film and television texts, as well as the genres that historically inspired them, in order to explore what needs bromance attempts to fulfill in relationships between men—straight or otherwise. Essays analyze films ranging from *I Love You, Man* to *Superbad*, *Humpday*, *I Now Pronounce You Chuck and Larry*, *The Hangover*, and the Jackass films, and include studies of representative examples in international cinema such as *Y tu mama tambien* and classic and contemporary films of the Bollywood genre. The volume also examines the increasingly prevalent appearance of the bromance phenomenon in television narratives, from the “male bonding” rituals of *Friends* and *Seinfeld* to more recent manifestations in *House*, *The Wire*, and the MTV reality series *Bromance*. From historical analysis to discourse analysis, sociological analysis, and queer theory, this volume provides a broad range of methodological and theoretical approaches to the phenomenon in the first booklength study of the bromance genre. Film and television scholars as well as readers interested in pop culture and queer studies will enjoy the insights of *Reading the Bromance*.

The Newbery Medal and Coretta Scott King Award-winning classic about a boy who decides to hit the road to find his father—from Christopher Paul Curtis, author of *The Watsons Go To Birmingham—1963*, a Newbery and Coretta Scott King Honoree. It's 1936, in Flint Michigan. Times may be hard, and ten-year-old Bud may be a motherless boy on the run, but Bud's got a few things going for him: 1. He has his own suitcase full of special things. 2. He's the

author of Bud Caldwell's *Rules and Things for Having a Funner Life and Making a Better Liar Out of Yourself*. 3. His momma never told him who his father was, but she left a clue: flyers advertising Herman E. Calloway and his famous band, the Dusky Devastators of the Depression!!!!!! Bud's got an idea that those flyers will lead him to his father. Once he decides to hit the road to find this mystery man, nothing can stop him—not hunger, not fear, not vampires, not even Herman E. Calloway himself.
