The MLA Style Manual has been the standard guide for graduate students, teachers, and scholars in the humanities and for professional writers in many fields. The second edition contains several added sections and updated guidelines on citing electronic works -- including materials found on the World Wide Web. There is an expanded chapter on the publication process, from manuscript to published work, and advice for those seeking to publish their articles or books. A chapter by the attorney Arthur F. Abelman reviews legal issues, such as copyright law, the concept of fair use, the provisions of a typical publishing contract, defamation, and the emergence of privacy law. Other chapters discuss stylistic conventions and the preparation of manuscripts, theses, and dissertations and offer an authoritative and comprehensive presentation of MLA documentation style.

The Edinburgh Postnatal Depression Scale (EPDS) is a questionnaire and was designed as a simple means of screening for postnatal depression in health care settings. The scale is now in use around the world and this book is a practical guide to using the scale in clinical practice, its origins and development background. This second edition has been revised and contains much advice based on years of experience. All chapters and references have been updated and the chapters on screening and counselling have been considerably revised, the evidence base on interventions for perinatal depression is provided, plus details of innovative methods such as internet-based therapy. The book includes the EPDS questionnaire itself in 58 other languages, plus a discussion of the questionnaire's cultural validity. The scale can also be used by researchers seeking information on factors which influence the emotional well-being of new mothers and their families and guidance is also given on use of the scale in research settings. The book will be useful for psychologists, psychiatrists, health visitors, midwives, family doctors, obstetricians and community psychiatric nurses, plus researchers in perinatal health.
