Telling the story of an immortal Scottish warrior doomed to survive through the centuries while watching those he loves die around him, 1986's Highlander was a British film that took the fantasy genre and infused it with a few thousand volts of energy from the rock video industry to create a timeless, genre-defying, classic. The story of an immortal Scottish warrior battling evil down through the centuries, Highlander fused a high concept idea with the kinetic energy of a pop

promo pioneer and Queen's explosive soundtrack to become a cult classic. When two budget-conscious American producers took a chance on a college student's script, they set in motion a chain of events involving an imploding British film studio, an experimental music video director still finding his filmmaking feet, a former James Bond with a spiralling salary, and the unexpected arrival of low-budget indie film company, Cannon Films. Author Jonathan Melville looks back at the creation of Highlander with the help of more than 60 new cast and crew interviews, including stars Christopher Lambert and Clancy Brown, revisiting the gruelling shoot that took them from the back alleys of London, to the far reaches of the Scottish Highlands and onto the mean streets of 1980s New York City.

The increasingly chaotic rhythm of our respiration, and the sense of suffocation that grows everywhere: an essay on poetical therapy. Since the hopeful days of the Occupy movement, many things have changed in the respiration of the world, and we have entered a cycle of spasm, despair, and chaos. Breathing is a book about the increasingly chaotic rhythm of our respiration, about the sense of suffocation that grows everywhere. "I can't breathe." These words panted by Eric Garner before dying, strangled by a police officer on the streets of Staten Island, capture perfectly catching the overall sentiment of our time. In Breathing, Franco "Bifo" Berardi comes back to the subject that was the core of his 2011 book, The Uprising: the place of poetry in the relations between language, capital, and possibility. In The Uprising, he focuses on poetry as an anticipation of the trend toward abstraction that led to the present form of financial capitalism. In Breathing, he tries to envision poetry as the excess of the field of signification, as the premonition of a possible harmony inscribed in the present chaos. The Uprising was a genealogical diagnosis. Breathing is an essay on poetical therapy. How we deal with chaos, as we know that those who fight against chaos will be defeated, because chaos feeds upon war? How do we deal with suffocation? Is there a way out from the corpse of financial capitalism?

Alone Street brings together two major bodies of work by Gregory Crewdson, Cathedral of the Pines (Aperture, 2016) and An Eclipse of Moths (Aperture, 2020), in a single, elegant, and affordable monograph. Both series expand on the artist's obsessive exploration of the psychogeography of small-town, post-industrial New England and underscore the precision and depth of Crewdson's unique mode of photographic storytelling. In each image, light, color, and carefully crafted scenography evoke the feeling that, as art historian Alexander Nemerov has astutely described, "all that ever happened in these places seems crystallized in his tableaux, as if the quiet melancholy of Crewdson's scenes gathered the unruly sorrows and other little-guessed feelings of people long-gone who once stood on those spots." In addition to the full set of images from each series, Alone Street, presents a selection of behind-the-scenes images and storyboards, revealing the extensive preparation and planning that went into the making of each work.

The Decisive Moment Oxford University Press, USA

In this Very Short Introduction, Peter Hainsworth and David Robey take a different approach to Dante, by examining the main themes and issues that run through all of his work, ranging from autobiography, to understanding God and the order of the universe. In doing so, they highlight what has made Dante a vital point of reference for modern writers and readers, both inside and outside Italy. They emphasize the distinctive and dynamic interplay in Dante's writing between argument, ideas, and analysis on the one hand, and poetic imagination on the other. Dante was highly concerned with the political and intellectual issues of his time, demonstrated most powerfully in his notorious work, The Divine Comedy. Tracing the tension between the medieval and modern aspects, Hainsworth and Robey provide a clear insight into the meaning of this

masterpiece of world literature. They highlight key figures and episodes in the poem, bringing out the originality and power of Dante's writing to help readers understand the problems that Dante wanted his audience to confront but often left up to the reader to resolve. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The North American frontier is an enduring symbol of romance, rebellion, escape, and freedom. At the same time, it's a profoundly masculine myth—cowboys, outlaws, Beat poets. Photographer Justine Kurland reclaimed this space in her now-iconic series of images of teenage girls, taken between 1997 and 2002 on the road in the American wilderness. "I staged the girls as a standing army of teenaged runaways in resistance to patriarchal ideals," says Kurland. She portrays the girls as fearless and free, tender and fierce. They hunt and explore, braid each other's hair, and swim in sun-dappled watering holes—paying no mind to the camera (or the viewer). Their world is at once lawless and utopian, a frontier Eden in the wild spaces just outside of suburban infrastructure and ideas. Twenty years on, the series still resonates, published here in its entirety and including newly discovered, unpublished images.

cost of food and energy, climate change, and terrorism. It is thought to be one of the principal causes of poverty around the globe. Its significance in the contemporary world cannot be undervalued. In this Very Short Introduction Leslie Holmes considers why the international community has only highlighted corruption as a problem in the past two decades, despite its presence throughout the millennia. Holmes explores the phenomenon from several different perspectives, from the cultural differences affecting how corruption is defined, its impact, and its various causes to the possible remedies. Providing evidence of corruption and considering ways to address it around the world, this is an important introduction to a significant and serious global issue. Focal-plane sensor-processor imager devices are sensor arrays and processor arrays embedded in each other on the same silicon chip. This close coupling enables ultra-fast processing even on tiny, low power devices, because the slow and energetically expensive transfer of the large amount of sensory data is eliminated. This technology also makes it possible to produce locally adaptive sensor arrays, which can (similarly to the human retina) adapt to the large dynamics of the illumination in a single scene This book focuses on the implementation and application of state-of-the-art vision chips. It provides an overview of focal plane chip technology, smart imagers and cellular wave computers, along with numerous examples of current vision chips, 3D sensor-processor arrays and their applications. Coverage includes not only the technology behind the devices, but also their near- and mid-term research trends.
