Pharmacology for Medical Graduates - E-Book Elsevier India
 Pharmacology for Nurses - E-Book
Textbook of Oral Medicine, Oral Diagnosis and Oral Radiology - E-Book JP Medical Ltd
 The fourth edition of this book is thoroughly revised and updated in accordance with the syllabus of pharmacology recommended by the Medical Council of India. Following recent developments and advances in Pharmacology, the book provides factual, conceptual and applied aspects of the subject. It is designed to meet the needs of students pursuing undergraduate courses in medicine and also for the practicing doctors. Format based upon the pattern followed by the examiners in framing questions in the exams - both theory and practical Updated content with addition of specific description of drugs under short headings makes it easy to understand Textual presentation in tabular format helps in quick reading and recall Addition of new flowcharts, figures and tables to facilitate greater retention of knowledge Supplementing text with simple diagrams, self-explanatory flow charts, tables and student friendly mnemonics Point-wise presentation of information, useful for exam going UG students Core competencies prescribed by the MCI are covered and competency codes are included in the text Includes new topics on drug dosage forms and calculation of dosage of drugs Addition of cardiovascular drug summary table for quick revision
Pharmacology and Pharmacotherapeutics Springer Science & Business Media
 Pharmacology for Nurses is a unique study material for B.Sc. Nursing students. The book has been based on the INC syllabus and gives up-to-date information on different drugs administered to patients. Invaluably rich and authentic content has been organized very systematically, detailing the different aspects of pharmacology. The book specifies the role of nurse in monitoring and caring the patients under different conditions. Contents strictly in accordance to the INC syllabus Content has been organized as per body systems, for ease of understanding Short, terse and crisp text, which is easy to comprehend Nurse's role has been described as Key Points boxes, wherever applicable Exam-oriented questions appended to every topic Comprehensive index to facilitate quick search for drugs, compounds, etc.
Pharmacology Elsevier India
 This new edition is a comprehensive guide to dental pathology for students presenting the latest information in the field. The book is divided into two parts - General Pathology and Systemic Pathology. The text has been fully revised and reorganised and

the fifth edition includes new topics to ensure students are fully up to date with recent developments. Each topic concludes with a 'gist box' summarising the key points to assist revision. The book features many new illustrations including line sketches, schematic drawings, specimen photographs, photomicrographs and tables. This fifth edition is accompanied by a free book (9789386107961) providing practical exercises and 'key questions for viva voce' with answers, for self assessment. Key Points Fully revised, fifth edition presenting latest information in dental pathology 'Gist boxes' summarise key points of each topic Includes free book of practical exercises and sample viva voce questions Previous edition (9789350250419) published in 2011
Essentials of Medical Pharmacology Jaypee Brothers, Medical Publishers Pvt. Limited
 Newly streamlined and focused on quick-access, easy-to-digest content, Mulholland and Greenfield's Surgery: Scientific Principles & Practice, 7th Edition, remains an invaluable resource for today's residents and practicing surgeons. This gold standard text balances scientific advances with clinical practice, reflecting rapid changes, new technologies, and innovative techniques in today's surgical care. New lead editor Dr. Justin Dimick and a team of expert editors and contributing authors bring a fresh perspective and vision to this classic reference.
Basic Dental Materials Elsevier Health Sciences
 This book is written mainly for Undergraduate Dental Students. Its user-friendly format provides knowledge of pharmacology without extraneous details as needed by BDS students. The book will also be useful for practicing Dentists, Pharmacy and Nursing students. About the Author : - Tara V Shanbhag is serving as Professor at the Department of Pharmacology, Kasturba Medical College, Manipal, Karnataka. She has a teaching experience of more than 20 years and has been examiner to several universities. Dr Shanbhag is an honorable recipient of the Good Teacher award. She also has to her credit several articles in national and international journals. She has also authored a book
Pharmacology: Prep Manual for Undergraduates with Elsevier. Smita Shenoy is Associate Professor at the Department of Pharmacology, Kasturba Medical College, Manipal, Karnataka. She has contributed articles to different national and international journals. Veena Nayak is Assistant Professor at the Department of Pharmacology, Kasturba Medical College, Manipal, Karnataka. She has contributed articles to different national journals.
Drug Screening Methods Elsevier Health Sciences
 This book is written mainly for Undergraduate Dental Students. Its user-friendly format provides knowledge of pharmacology without extraneous details—as needed by BDS students. The book will also be useful for practicing Dentists and Pharmacy students. Meets the requirement of the syllabus proposed by Dental Council

of India (DCI) Includes drugs with dose, mechanism of action, pharmacokinetics, adverse effects, drug interactions and therapeutic uses Supplemented with the addition of some new topics like Pharmacovigilance and Drug Dosage Forms Contains important medical emergencies in dental practice and oral side effects of drugs in tabular format Large number of diagrams, flowcharts and tables will facilitate quick learning and greater retention of the concepts Thoroughly updated edition that highlights the important aspects of pharmacology for students pursuing undergraduate courses in Dentistry
Katzung & Trevor's Pharmacology Examination and Board Review JP Medical Ltd
 This new edition has been fully revised to bring pharmacologists and trainees fully up to date with the latest developments in the field of medical pharmacology. Beginning with an introduction to general pharmacological principles, the following sections discuss drugs for common and less common disorders found in different regions of the body. The seventh edition includes new drugs, as well as the latest therapeutic guidelines from authoritative sources such as the World Health Organisation (WHO) and the British National Formulary (BNF). Each topic includes key point summary boxes as well as illustrations, flowcharts and tables to enhance learning. A 'problem-directed study' question at the end of each chapter helps trainees test their knowledge. An extensive appendices section includes a list of essential medicines, drugs that should/shouldn't be prescribed in pregnancy and lactation, and suggestions for further reading. Key points Fully revised, new edition presenting latest developments in medical pharmacology Includes therapeutic guidelines from WHO and BNF Problem-directed study questions and key point summary boxes enhance learning Previous edition published in 2008
Katzung & Trevor's Pharmacology Examination and Board Review, Thirteenth Edition JP Medical Ltd
 The fourth edition of this book is thoroughly revised and updated. Following recent developments and advances in pharmacology, the book provides factual, conceptual and applied aspects of the subject. It is designed to meet the needs of students pursuing undergraduate courses in dentistry and for practicing dentists. New to This Edition • Full 4-colour format with significant revision of figures and flowcharts. • Many drugs like anticancer, anthelmintic, antimalarial, antiviral have been updated along with treatment guidelines for HIV and tuberculosis. • Key points for dentists added wherever relevant, stimulates enthusiasm for subject. • Inclusion of prescription writing section to help students accurately write prescriptions. Salient Features • Updated content, figures, flowcharts with addition of specific description of drugs presented as headings and subheadings with different font. This style of presentation would not only make it easier for

students to understand the subject in a better manner but would also help them to quickly review and revise the subject before examination. • Text is presented in a simple, precise and point-wise manner, with complex information summarized in tables, student-friendly mnemonics, line diagrams and flowcharts, which makes the learning and comprehension easier for students. • Mechanism of action of drugs are illustrated with diagrams and 11 animations for better understanding. • Separate chapter on dental pharmacology discuss about the drugs used in dentistry. Online Resources Complimentary access to full e-book along **Pharmacology for Dentistry** Lippincott Williams & Wilkins The new edition of this revision manual provides students with the latest advances and information in medicine. Divided into 25 chapters, the text covers the diagnosis and management of diseases and disorders in all medical subspecialties. The second edition has been fully revised and features new topics including recent advances, new drugs, geriatrics, and immunology. Disease aetiology, diagnostic procedures, radiological investigations and basics of ECG readings are discussed in depth. Important clinical examination-oriented questions are included in each section, with key points emphasised to assist revision. The comprehensive text is highly illustrated with clinical photographs and diagrams. Important management techniques are highlighted in coloured tables. Key points Comprehensive revision manual covering all medical subspecialties for undergraduates Fully revised, second edition featuring many new topics Includes clinical examination-oriented questions to assist revision Previous edition (9789386056610) published in 2016

Essentials of Medical Physiology Elsevier India

The fourth edition of this book is thoroughly revised and updated in accordance with the syllabus of pharmacology recommended by the Medical Council of India. Following recent developments and advances in Pharmacology, the book provides factual, conceptual and applied aspects of the subject. It is designed to meet the needs of students pursuing undergraduate courses in medicine and also for the practicing doctors. . Format based upon the pattern followed by the examiners in framing questions in the exams - both theory and practical . Updated content with addition of specific description of drugs under short headings makes it easy to understand . Textual presentation in tabular format helps in quick reading and recall . Addition of new flowcharts, figures and tables to facilitate greater retention of knowledge . Supplementing text with simple diagrams, self-explanatory flow charts, tables and student friendly mnemonics . Point-wise presentation of information, useful for exam going UG students Includes new topics on drug dosage forms and calculation of dosage of drugs Addition of cardiovascular drug summary table for quick revision

Pharmacology for Medical Graduates, 4th Updated Edition Elsevier Health Sciences

This is a first of its kind textbook in pharmacology for pharmacy students. With simple language and easy to understand contents it completely covers the pharmacology syllabus. Flow charts explain every mechanism of action. Multiple boxes and tables given throughout the book. Student friendly format for easy comprehension. Compare and contrast series in the book helps in understanding the subject better and retaining the facts longer. **Essential Pathology for Dental Students** Elsevier Health Sciences This book is primarily designed for undergraduate medical and dental students. Also, it is an authoritative reference source for postgraduates and practicing neurologists and neurosurgeons. All chapters revised and updated, including details on cranial nerves and their lesions, blood supply and cerebrovascular accidents, motor and sensory disorders. new line diagrams, and real life photographs and MRI scans. Simple, to-the-point, easy-to-understand exam-oriented text Numerous, four coloured, large sized, and easy-to-draw diagrams Text provides unique problem based clinical and functional perspective

Pharmacology for Dental Students John Wiley & Sons

More than ten years ago, the faculty members of the Department of Pharmacology at the University of Oklahoma College of Medicine developed a review book of medical pharmacology in response to requests from our second year medical students who were preparing to sit for the Part I examination of the National Board of Medical Examiners. The students expressed a need for an organized approach to cope with the volume of basic science curricular material presented during the first two years. Therefore, our review book was not designed to provide a comprehensive text on pharmacology, but rather to provide the students with a significant core of information, as a refresher, after they had successfully completed a basic course in pharmacology. This book represents a major revision of our

review of medical pharmacology. The book has been reorganized, updated and expanded to provide current information on major new drugs and information on older drug groups that typically are covered on licensure examinations. The book also has been expanded to include a large number of new questions for self-examination. The faculty have endeavored to retain a reasonably concise, relevant and readable review book that will provide the students with a thorough review of pharmacology. Students are advised to refer to comprehensive textbooks, as needed, to fill in any gaps in their knowledge which may be disclosed by the self-examinations.

Pharmacological Classification of Drugs McGraw Hill Professional Score your highest on medical pharmacology courses and board exams with the world's bestselling pharmacology review book! More than 1,000 Q&A! This authoritative resource from the authors of pharmacology's most trusted textbook delivers a clear, concise review of fundamental concepts backed by more than 1,000 review questions and answers. With fully up-to-date content, the chapter-based approach facilitates use with course notes or larger texts. Everything you need to excel: 1,000+ board-review type questions Concise discussion of the major concepts that underlie basic principles or specific drug groups in every chapter Two comprehensive 100-question practice exams with answer keys and explanations for correct answers List of high-yield terms and definitions Skill Keeper Questions that help you understand the connections of related topics 180 photos and illustrations—including explanatory figures and tables, and overview diagrams that visually organize drug groups and concepts Checklist of tasks you should be able to perform upon completion of the chapter Summary tables that provide key information about specific drug mechanisms of action and effects, clinical uses, pharmacokinetics, drug interactions, and toxicities Test-taking strategies for improving your test performance **Pharmacology for Nurses, 3e - E-Book** Jaypee Brothers, Medical Publishers Pvt. Limited

Drug discovery and development is a challenging, expensive and time consuming field of research, requiring contributions from chemists, pharmacologists, toxicologists, clinicians, and practitioners. The ultimate goal is to generate a safe and biologically active drug which can stall, or even reverse, the pathological events that cause the disease condition. But in the search for the drug a host of tests and trials must be applied to evaluate the efficiency and safety of the newly developed molecule in the biological system. These trials or "screening methods" are critical. On their basis, the new molecule either becomes accepted for usage, or is discarded forever. Advances in drug research have forced the need for quicker, more automated screening methods, using molecular techniques applied in vitro, in vivo and in clinical systems. Researchers need to know the latest developments outside their own speciality. With this book, Professor Gupta has brought together in one coherent volume the most up to date developments of consolidated screening methods for biological systems. By paying attention to the practical techniques used in academia and the commercial pharmaceutical industry, "Drug Screening Methods" will enjoy a broad readership, serving both the professional community and the student of pharmacology.

Pharmacology for Medical Graduates, 4th Updated Edition - E-Book Elsevier Health Sciences

The Prep Manual for Undergraduates now, more aptly named as Pharmacology for Medical Graduates, Third Edition includes significant expansion and revision of the existing Second Edition. The style and presentation form has been maintained - simple diagrams, self-explanatory flow charts, tables and student friendly mnemonics. Some new topics like cognitive enhancers, CNS stimulants, Drugs for the treatment of Psoriasis and Acne vulgaris have been introduced. Definitions, treatment schedules as per WHO (for tuberculosis, leprosy, malaria, HIV), RNTCP (for TB) guidelines and classification of blood pressure as per JNC, 2003 guidelines have been included and we acknowledge the same. This extensively revised edition will be useful not only for the students of medicine but also for practicing doctors. Salient Features Format based upon the pattern which is followed by the examiners in framing questions in the exams- both theory and Practical. Updated content with addition of new drugs Addition of new flowcharts, Figures and tables to facilitate quick learning and greater retention of knowledge Specific description of drugs under short headings makes it easy to understand. Easy to understand and point-wise presentation of information, useful for exam going UG students. Supplementing text with simple diagrams, self-explanatory flow charts, tables and student friendly mnemonics. **Pharmacology: Prep Manual for Undergraduates E-book** Anshan

Pub

With ever-expanding knowledge and advances in medicine, the sixth edition of this book is significantly revised and presented in new full-colour format. Structured in question-answer format, this book is a must-have for all undergraduate medical students as it prepares them for both theory and viva-voce examinations. It is also useful for dentistry and nursing students. • Thorough revision of all the chapters without changing basic framework to keep up with the latest changes in the field of medicine. • Revision of topics especially respiratory system, immunological factors in disease, diseases of the cardiovascular system, diseases of the gastrointestinal system, acute poisoning and environmental emergencies, oncology, diseases of the kidneys and genitourinary system, diseases due to infections, endocrine and metabolic diseases. • Presentation of text pointwise with suitable boxes and tables, which helps the student in quick learning and revision. • Addition of newer innovations and treatments modalities. • Inclusion of clinical decision pathways for some of the commonly encountered critical and non-emergent disease conditions • Expansion of normal values of investigations and understanding the evolution of disease. • Management of acute medical emergencies like acute myocardial infarction, acute pulmonary oedema, acute anaphylactic and hypovolumic shock, status asthmaticus, tension pneumothorax, status epilepticus, haemoptysis, gastrointestinal bleeding, diabetic coma, snake bites, common poisoning, etc. • Emphasis has been laid on clinical presentation with description of the drugs. New to this Edition • Addition of many new line diagrams, tables, flowcharts to facilitate greater retention of knowledge. • Updates on Zika, Ebola, Nipah, sepsis, monoclonal antibodies, adult immunisation, paracetamol poisoning, acute radiation syndrome, myelodysplastic syndrome, lymphoid malignancies, influenza, tuberculosis, human immunodeficiency virus infection, hepatitis B and C, heart failure, rheumatic fever, pulmonary hypertension and hyperlipidaemia. Additional Feature • Complimentary access to full e-book

Pharmacology: Prep Manual for Undergraduates, 2/e Jaypee Brothers, Medical Publishers Pvt. Limited

The bestselling USMLE study tool -- packed with everything you need to ace the exam on your first try 4 STAR DOODY'S REVIEW! "This is one of the better board review books in pharmacology and it closely follows the most widely used textbook for teaching pharmacology . . . This eighth edition is needed to keep pace with this rapidly growing discipline." -- Doody's Review Service From the authors of the leading pharmacology textbook comes the newest edition of the best pharmacology review in the field. Ideal for medical pharmacology course review and USMLE Step 1 preparation, this skill-building guide comes with more than 1000 USMLE-type questions with answers -- nearly 3 times as many as any other pharmacology review! Features: A concise yet thorough review of basic and clinical pharmacology, covering every must-know concept Organized to reflect course syllabi, focusing on the clinical use and pharmacology of drug categories rather than individual drugs Two USMLE-style Practice Exams with 120 questions each In each chapter, "Skill Keepers" sharpen your recall of key principles from earlier chapters A series of 15-20 USMLE-style questions in each chapter Key terms with definitions Strategies for improving test performance A detailed index and appendices allow you to look up drugs and side effects in an instant All chapters fully updated with the latest drug information Numerous figures and tables, such as those designed to delineate the differences between similar drugs **Essentials of Pharmacology For Dentistry** Elsevier Health Sciences Thoroughly updated content supported with numerous figures, flowcharts, and tables, along with addition of specific description of drugs makes learning and comprehension easy for students. National Tuberculosis Elimination Program has been updated as per latest treatment guidelines by Central TB Division. Textual presentation in tabular format makes it easy to read and interpret the information. Prepares student for both theory and viva voce exams. Coverage of all competency codes integrated within the text as per new competency-based undergraduate curriculum to make the reference easy. New topics on drugs for criminal offences, herbal medicines, dietary supplements, nutraceuticals, Antimicrobial Stewardship Program, National Health Programs. Treatment guidelines have been updated. Key points have been added wherever relevant to stimulate enthusiasm for subject and also to supplement revision. More than 45 case studies with questions to prepare students for problem-based learning have been added. Section on prescription writing has been added to help students write prescriptions accurately. Additional Feature Complimentary access to full e-book
