Over the last decade task-based

approaches to language learning and

teaching (TBLT) have become a global

focus of increased levels of research.

Governments around the world have

turned to TBLT as a potential solution for

curricula that lack authentic and

meaningful engagement with language learning and are failing to motivate students as a result. This book focuses on Asia, where this shift has been particularly in evidence. TBLT has often been implemented in top-down approaches to curriculum development, which presents a huge range of challenges at the cultural as well as the pedagogic level. Contemporary Task Based Language Teaching in Asia looks at the drivers, stakeholders and obstacles across the region. Some countries have adapted TBLT to deal with the local constraints, others have found it hard to apply and many are still in the process of investigating its implementation in their specific contexts. This collection is important to all involved in language development, from curriculum reform to materials development. It assists from programme evaluation to the setting of assessment standards. The chapters cover all aspects of language education across Asia, from primary to tertiary, private and public education, as well as innovations at local, regional and national levels.

The approach allows students to work independently, supported by detailed information and advice, as well we model answers provided in both the Course Book and the Instructor's Manual. The units are organized as follows: Introduction to the Skills of Extended Writing and Research Using Evidence to Support Your Ideas Structuring Your Project and Finding Information Developing Your Project Developing a Focus Introductions, Conclusions, and Definitions Incorporating

Data and Illustrations Preparing for Conference Presentations and Editing Your Work Each unit has weblinks offering additional information and activities.
