018-01049 Rev 1.6c. Energy Command 30. General. The Energy Command 30 (EC-30) is an Automatic Generator Starting (AGS) System that provides both automatic and manual control of Onan Diesel, Gasoline, and Liquid Propane (LP) engine driven AC generators (referred to in this manual as a genset). EC-30 also provides critical system information such as the battery state-of-charge, key operational information such as quiet time, genset service and fault messages. Operator and Installation Manual - Cummins Weekly inspection and maintenance Check the intake resistance indicator or replace the air filter. Drain the water and sediment in the fuel tank/fuel filter. If the fuel used is dirty or the ambient temperature is low, more condensate is produced in the fuel tank and filter. Maintenance and Operation of Cummins Engine Any generator set used for emergency or primary source must have periodic service and maintenance performed. Setting up a planned maintenance schedule, and performing all associated testing will insure generator availability upon demand. Possibilities of generator failure increase when service and maintenance checks are not performed.
